Dictionary of financial terms in English German Spanish French Italian and Dutch Elsevier's Dictionary of Financial and Economic Terms José Daniel Kwacz H., 1996 In the field of business finance and economy the English language has taken first place even between people institutions and countries whose respective native tongues are foreign to the English language Spanish has become a very necessary language in different countries thus the combination of both languages provides an instrument of communication that is indispensable and unavoidable This dictionary takes into account the frequent difficulties which economists financiers interpreters and others may have in fully understanding the scope of a given field expressions or even words that in the highly specialised jargon of economics have acquired very concise meanings Intensive research into definitions in the extremely vast field of economics finance and business has produced a dictionary well designed to fulfill the needs of users of a two language dictionary Proper and very factual explanations and definitions are given for each word or group of words thus making absolutely clear to professionals which term to use *Elsevier's Dictionary of Financial Terms* D. Phillips, M.-C. Bignaud, F.J. Thomson, 1997-05-15 Since the publication of the first edition of this dictionary 1979 the world of finance has undergone many profound changes The compilers of this second edition have taken account of these developments by eliminating outdated entries by including about 450 new ones and by updating and thoroughly revising all other entries This dictionary thus fully reflects the terminology currently in use in the world of finance It has easy multilingual cross referencing via indexes is user friendly and presents an exhaustive combination of a dictionary with a thesaurus It is descriptive rather than prescriptive and thus records all the terms actually in use to express particular concepts leaving the choice of the most appropriate equivalent which obviously depends on the context to the user
