Happy Meat Shyon Baumann, Emily Huddart Kennedy, Josee Johnston, Merin Oleschuk, 2025-06-17 North Americans love eating meat Despite the increased awareness of the meat industry's harms violence against animals health problems and associations with environmental degradation the rate of meat eating hasn't changed significantly in recent years Instead what has emerged is an uncomfortable paradox a need to square one's values with the behaviors that contradict those values Using a large scale multidimensional and original dataset Happy Meat explores the thoughts and emotions that underpin our moral decision making in this meat paradox Conscientious meat eaters turn to the notion of happy meat to make sense of their behaviors by consuming meat they see as more healthy ethical and sustainable Happy meat might be labeled grass fed free range antibiotic free naturally raised or humane The people who produce and consume it together make up the complex landscape of conscientious meat eating in modern Western societies The discourse of happy meat ultimately may not be a sufficient response to all the critiques of meat eating rife as it is with contradictions However it offers a powerful case for understanding how moral boundaries and notions of the good eater are constructed through negotiations of values identity and status
