Bonilla, Antonio Martínez-Amat, Richard Kreider, Francisco Álvarez Salvago, 2025-08-20. The rapid growth of the aging population is related with prevalent age-related cognitive impairments usually associated with problems in quality of life and increased cost of healthcare. Older adults with neurocognitive disorders have been identified as having a high risk of falling. Nonetheless, the relationship of neurocognitive disorders with physical function has been poorly studied. Currently, there are numerous studies that have analyzed the association between the cognitive status in with physical function in older people. In addition, relationship said cognitive status with serious problems such as sarcopenia and the risk of falls. In this line, there are RCTs that are being offered that have demonstrated efficacy on physical and cognitive improvement in older people such as multicomponent exercise programs, qigong training, and resistance exercise programs. *Congressional Record* United States.
