Health Financing For Poor People:

Health Financing for Poor People Alexander S. Preker, Guy Carrin, 2004 One of the most urgent development challenges facing many low and middle income countries is the need for adequate financing systems to pay for health care provision to the estimated 1.3 billion impoverished people living in rural areas or working in the informal sector in urban areas. This publication considers ways of improving the financing of health care at low income levels as part of a global strategy for increased investment in health and poverty reduction. Topics discussed include global and regional trends in healthcare financing, strengths and weaknesses of community based health financing and experiences in Asia and Africa, country case studies using household survey analysis from Senegal, Rwanda, India and Thailand, deficit financing and the impact of risk sharing on achieving health system goals. *Making Health Financing Work for Poor People in Tanzania* Dominic Haazen, 2012-03-29 Tanzania is currently developing a Health Financing Strategy to provide a medium to long term road map for a sustainable and integrated health financing system. This book is designed to inform this discussion by providing an analytical basis for the assessment of options, a series of policy options which could be considered. **Health Financing in the Developing World** Guy Carrin, 2011 A collection of peer reviewed articles and contributions to books, this overview of the finance of health insurance concentrates on developing countries. The material covers various financing strategies and explains how each can or cannot help improve the transition toward universal coverage. The model plans shown here are particularly useful for policy makers and technical advisers who have to decide upon health financing policies or are engaged in a debate about them and the sample forms can be adjusted to the particular economic and political context of the developing countries involved. In addition, there are reminders that this process varies in some countries; universal coverage may take time and require a step by step approach. In other developing countries a swift transition to universal coverage may be quite feasible. **Good Practices in Health Financing** Pablo Enrique Gottret, George Schieber, Hugh Waters, 2008-01-01 This volume focuses on nine countries that have completed or are well along in the process of carrying out major health financing reforms. These countries have significantly expanded their people's health care coverage or maintained such coverage after prolonged political or economic shocks, e.g. following the collapse of the Soviet Union. In doing so, this report seeks to expand the evidence base on good performance in health financing reforms in low and middle income countries. The countries chosen for the study were Chile, Colombia, Costa Rica, Estonia, the Kyrgyz Republic, Sri Lanka, Thailand, Tunisia and Vietnam. **Health Financing Revisited** Pablo Enrique Gottret, George Schieber, 2006-01-01 This overview of health financing tools, policies and trends, with a particular focus on challenges facing developing countries, provides the basis for effective policy making. Analyzing the current global environment, the book discusses health financing goals in the context of both the underlying health demographic, social, economic, political and demographic analytics, as well as the institutional realities faced by developing countries and assesses policy options in the context of global evidence, the international aid

architecture cross sectoral interactions and countries macroeconomic frameworks and overall development plans **Poverty and Health** DAC Network on Poverty Reduction, World Health Organization, 2003 Investment in health is a strategically important and often underestimated component of economic development This study sets out a systematic approach to improving health in poor countries For emerging countries substantially improved health outcomes are a prerequisite to breaking out of the poverty cycle This book on poverty and health jointly published by the OECD and WHO sets out the essential components of a broad scope pro poor health approach for action within the health system and beyond it It is for development practitioners in the area of health issues

Health Financing in Indonesia, 2009-01-01 In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor funded through the public budget Nevertheless over half the population still lacks health insurance coverage and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt In addition significant deficiencies in the efficiency and equity of the current health system unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage Ue and the desired result of improvements in population health outcomes and financial protection For Indonesia to achieve UC systems performance must be improved and key policy choices with respect to the configuration of the health financing system must be made Indonesia's health system performs well with respect to some health outcomes and financial protection but there is potential for significant improvement High level political decisions are necessary on key elements of the health financing reform package The key transitional questions to get there include the benefits that can be afforded and their impacts on health outcomes and financial protection how the more than 50 percent of those currently without coverage will be insured how to pay medical care providers to assure access efficiency and quality developing a streamlined and efficient administrative structure how to address the current supply constraints to assure availability of promised services how to raise revenues to finance the system including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers the 85 percent of workers in firms of less than five employees and the 70 percent of the population living in rural areas

The Impact of Health Insurance in Low- and Middle-Income Countries Maria-Luisa Escobar, Charles C. Griffin, R. Paul Shaw, 2011-01-01 Over the past twenty years many low and middle income countries have experimented with health insurance options While their plans have varied widely in scale and ambition their goals are the same to make health services more affordable through the use of public subsidies while also moving care providers partially or fully into competitive markets Colombia embarked in 1993 on a fifteen year effort to cover its entire population with insurance in combination with greater freedom to choose among providers A decade later Mexico followed suit with a program tailored to its federal system Several African nations have introduced new programs in the past

decade and many are testing options for reform For the past twenty years Eastern Europe has been shifting from government run care to insurance based competitive systems and both China and India have experimental programs to expand coverage These nations are betting that insurance based health care financing can increase the accessibility of services increase providers productivity and change the population s health care use patterns mirroring the development of health systems in most OECD countries Until now however we have known little about the actual effects of these dramatic policy changes Understanding the impact of health insurance based care is key to the public policy debate of whether to extend insurance to low income populations and if so how to do it or to serve them through other means Using recent household data this book presents evidence of the impact of insurance programs in China Colombia Costa Rica Ghana Indonesia Namibia and Peru The contributors also discuss potential design improvements that could increase impact They provide innovative insights on improving the evaluation of health insurance reforms and on building a robust knowledge base to guide policy as other countries tackle the health insurance challenge

Health, Economic Development and Household Poverty

Sara Bennett,Lucy Gilson,Anne Mills,2007-09-12 Accessible and edited by authors based at a top institution this book provides readers with an excellent summary in an easy to read style of this burgeoning field of research In this volume Bennett Gilson and Mills have gathered together essays written by academics and experts in the fields of health policy and economic development each underscoring the need for political commitment to meet the needs of the poor and the development of strategies to build this commitment covering evidence regarding the links between health economic development and household poverty evidence on the extent to which health care systems address the needs of the poor and the near poor innovative measures to make health care interventions widely available to the poor Current and topical this book is of great relevance to policy makers and practitioners in the field of international health and development and researchers engaged with global health and poverty as well as being ideal reading for students of international health and development

Health and Poverty

Gijs Walraven,2013-10-18 There is growing interest and concern about the unacceptable differentials in health between and within countries This comes out of the realization that poor people will only be able to prosper and emerge from poverty if they enjoy better health Healthy populations are a precondition for sustainable development Using a novel combination of the personal studies of patients and description of conditions or diseases this book provides a highly original and accessible introduction to key issues in global health today Especially during the past decade global health initiatives have become a prominent part of the international aid picture bringing new resources political commitment and more attention for international health issues in the media The author provides examples of diseases and

problems related to health that disproportionally impact the poor and gives their experiences a human face through individual case studies A specific case study of a health problem such as malaria tuberculosis and HIV or health financing introduces each chapter and is followed by a historical review of the problem why it is still now a problem for poor people or poor countries and what can be done about it These will inspire the reader to become more engaged with international health and development

Health Systems Policy, Finance, and Organization Guy Carrin, Kent Buse, Kristian Heggenhougen, Stella R. Quah, 2010-05-22 This volume is unique in its systematic approach to these three pillars of health systems analysis will give readers of various backgrounds authoritative material about subjects adjacent to their own specialties Assembling such comparative materials is usually an onerous task because so many programs possess their own vocabularies goals and methods This book will provide common grounds for people in programs as diverse as economics and finance allied health business and management and the social sciences including psychology Gives readers of various backgrounds authoritative material about subjects adjacent to their own specialties Provides common grounds for people in programs as diverse as economics and finance allied health business and management and the social sciences including psychology Making services work for poor people World Bank, **Innovations in Health Care Financing** George Schieber, 1997-01-01 Spanish edition World Bank Technical Paper No 345S This report examines specific policies for achieving sustainable development of the mining industry in the countries of Latin America and the Caribbean The report highlights the importance of the mining sector to national economies of the region and discusses World Bank assistance in formulating policy Also available in English ISBN 0 8213 3816 1 Stock no 13816 **Financing Micro Health Insurance: Theory, Methods And Evidence** David M Dror, 2018-12-27 Healthcare for all at affordable prices is still a major but universally elusive goal Everyone spends money on healthcare and it is the most impoverishing consumption item Thus most governments and the United Nations promote Universal Health Coverage each country s unique blend of tools for healthcare financing including taxes subsidies and market controls Most people in low and middle income countries LMICs have no health insurance of any kind And most LMIC governments lack the political will information or resources to require their citizens to buy health insurance themselves or to subsidize insurance for all who cannot afford the price This book deals with financing voluntary and contributory health insurance for resource poor and rural groups in LMICs This book addresses three issues The first is how to catalyse demand for health insurance and develop insurance literacy among the largely illiterate and innumerate target population using training programs to build an enabling consensus allowing locals to create and administer such schemes The second involves the process of developing simplified methods for risk assessment which can help to underwrite risks price the micro health insurance schemes and ensure proper implementation The third issue is formulating a compelling business case which would make this health insurance affordable financially sustainable and operationally scalable This book develops insurance education and financial literacy for students of economics business administration
