Health Practitioners In Ontario:

New Health Practitioners John E. Fogarty International Center for Advanced Study in the Health Sciences, 1975 *New Health Practitioners* Robert L. Kane, M.D., 1974 **Case Studies in Canadian Health Policy and Management, Second Edition** Raisa Deber, Catherine L. Mah, 2014-04-18

Covering a wide range of issues the 22 cases included in *Case Studies in Canadian Health Policy and Management* constitute an exceptional resource for bringing real life policy questions into the classroom. Based on actual events the cases have been developed with input from mid career professionals with strong field experience and extensively tested in Raisa B Deber's graduate case study seminar at the University of Toronto. Each case features both a substantive health policy issue and a selection of key concepts and methods appropriate to examining public policy, public health and health care management issues. In each case the authors provide a summary of the case and the related policy issues, a description of events, suggested questions for discussion, supporting information and both works cited and further reading. Suitable for graduate and undergraduate classrooms in programs in a variety of fields, *Case Studies in Canadian Health Policy and Management* is an exceptional educational resource. This second edition features all new cases as well as adding an introductory chapter that provides a framework and tools for health policy analysis in Canada.

Doctors in Canada Bernard R. Blishen, 1991-12-15

Through the twentieth century the nature of medical practice has changed more quickly, more dramatically and far more publicly than that of any other profession in Canada. In this study Bernard Blishen identifies the social and political pressures on the medical profession and assesses how it has responded to them. Among the changes doctors have confronted are third party pressures from government and hospital bureaucracies, greater public knowledge, improved technology, recognition of patients' rights and legal challenges. Blishen discusses how the doctors achieved dominance in the health field, reviews demographic changes within the profession and the larger population, examines data on the changing health status of Canadians and charts physician supply against patient demand. He finds that the chief source of his profession's collegial strength has been the homogeneity of its membership. This homogeneity is declining with increasing numbers of women and ethnic groups in the profession and increasing specialization. Blishen offers a comprehensive, quantified overview of a profession in transition and suggests the implications of its changes for all Canadians.
