Health Promotion New Discipline Or Multi Discipline:

Health Promotion Ricca Edmondson, Cecily Kelleher, 2000 A fully revised edition of Ben Pimlott's classic biography of the Queen. There will be no better biography of Elizabeth II. PETER HENNESSY Independent on Sunday The institution of monarchy in Britain is in deep crisis. Scarcely a day goes by without some new revelation about the private life of some or other of the Royals splashed all over the tabloid newspapers and public interest in the House of Windsor is more feverish and obsessional than ever. Royal books written by journalists and royal watchers are ten a penny and all without exception concentrate on the private lives and traumas of their subjects. This is the only book to take the present Queen seriously as the subject of historical biography or to examine in depth the influences that formed her or the ideas she represents. Ben Pimlott described by Andrew Marr in the Independent as the best writer of political biography now writing treats the Head of State who has been uniquely placed at the centre of the national stage since childhood to the rigorous and objective scrutiny he has applied to major political personalities using a wide range of new sources including interviews, diaries and letters and papers in the Royal Archives. The Queen looks at the social, political and psychological aspects of his subject in detail as well as at the changing role of Monarchy in the British Constitution. In the process the book displays all the author's formidable analytic and narrative skills and provides a gripping yet sensitive account of one of the most publicised yet least known figures of our time. It is vital reading for all those who care about public life in Britain past, present and to come. **Health**

Promotion Robin Bunton, Gordon MacDonald, Gordon Macdonald, 2005-09-23 Health promotion is an increasingly central tenet in health professionals' lives. It has come into the public eye as the subject of party politics and policy, but where does the movement come from? This book brings together views from a range of subjects, some not always associated with health promotion such as marketing or communication theory. Others such as social policy or psychology may have obvious connections to make here; the implications for practice are discussed fully for the first time. The volume adds up to a timely reflection on the state of health promotion today and will provide practitioners and academics alike with a clearer understanding of a discipline at the frontier of contemporary policy and practice. **Researching Health Promotion**

Stephen Platt, Jonathan Watson, 2002-09-09 Providing a critical review of the current state of health promotion research. This book re-conceptualises the field of health promotion as collaborative and integrating enterprise rather than as a battlefield for disciplinary and intellectual clashes. It makes a significant contribution to ongoing epistemological, theoretical and methodological debates in health promotion research. With contributors from Sweden, Switzerland, Denmark, Ireland, the UK and the US. Researching Health Promotion will be of interest to students and professionals working in health promotion, public health, medicine and health policy. **The SAGE Encyclopedia of Cancer and Society** Graham A.

Social Medicine in the 21st Century Samuel Barrack, 2011-04 PLoS Medicine s October 2006 issue contained a special collection of eleven magazine articles and five research papers devoted entirely too social medicine The collection featured many of the leaders in the field including Paul Farmer Arthur Kleinman David Satcher Nancy Scheper Hughes Dorothy Porter and Leon Eisenberg The Kaiser Family Foundation has conducted interviews with two of the authors of papers in this collection David Satcher and Paul Farmer In its launch issue in October 2004 PLoS Medicine signaled a strong interest in creating a journal that went beyond a biological view of health to incorporate socioeconomic ethical and cultural dimensions For example that first issue contained a policy paper on how the health community should respond to violent political conflict a debate on whether health workers should screen all women for domestic violence and a study on the global distribution of risk factors for disease Two years on our October 2006 issue takes our interest even further It contains a special collection of ten magazine articles and fi ve research papers devoted entirely to social medicine We are delighted that the collection features many of the leaders in the fi eld including the renowned medical anthropologists Paul Farmer and Arthur Kleinman the former United States Surgeon General David Satcher and the Harvard professor of social medicine and psychiatry Leon Eisenberg Most of our readers have welcomed our inclusive view of what a medical journal should highlight Some however have been critical suggesting that we should publish less soft stuff and more hard science These critics might argue that in this era of stem cell research and the human genome project of molecular medicine and DNA microarray technology the notion of social medicine seems irrelevant and outmoded But the ultimate role of a medical journal is surely to contribute to health improvement and that means looking not just at molecules but at the social structures that contribute to illness The stark fact is that most disease on the planet is attributable to the social conditions in which people live and work The socially disadvantaged have less access to health services and get sicker and die earlier than the privileged Despite impressive technological advances in medicine global health inequalities are worsening
