Crompton, 2006-09-19 The presence of deliberately added or adventitious organic and inorganic compounds in soils can cause contamination of the crops which are grown on the land or animals feeding on the land and consequently can cause adverse toxic effects on man animals birds and insect life Also drainage of these substances from the soil by rainwater can cause pollution of adjacent streams then rivers and eventually the oceans The purpose of this book is to draw together the world wide literature on the occurrence and analytical determination of all types of organic organometallic and inorganic compounds in soils animals crops plants grains

Compounds Richard E. Tucker,2012-12-06 Increasing international concern is being expressed regarding the contamination of the environment with polychlorinated dibenzo p dioxins PCDDs and polychlorinated dibenzofurans because certain of these chemicals have been shown to be highly toxic to animals and are ubiquitous in the environment They are known to be distributed as contaminants of commercial products and as by products from combustion processes A considerable volume of information has accumulated on these chemicals in the past two decades particularly for the most toxic of them 2 3 7 8 tetrachlorodibenzo p dioxin 2 3 7 8 TCDD However this body of knowledge has not succeeded in resolving genuine judgmental differences among experts in the field as to the degree of hazard to human health and the environment In light of the widespread public concern it is clearly imperative to come to grips with the continuing scientific controversy to review the data assess the issues to see where areas of agreement exist and where further research is needed to resolve remaining areas of disagreement This volume represents an effort to contribute to these goals **Toxicological Profile for Mirex and Chlordane** ,1995
