Health In The Guatemalan Highlands:

Health in the Guatemalan Highlands Ulli Steltzer, 1983 Health in the Highlands David Carey Jr., 2023-07-11 Populated by curanderos midwives bonesetters witches doctors nurses and the indigenous people they served this nuanced history demonstrates how cultural and political history misogyny racism and racialization influence public health In the first half of the twentieth century the governments of Ecuador and Guatemala sought to spread scientific medicine to their populaces working to prevent and treat malaria typhus and typhoid to boost infant and maternal well being and to improve overall health Drawing on extensive original archival research David Carey Jr shows that highland indigenous populations in the two countries tended to embrace a syncretic approach to health combining traditional and new practices At times both governments encouraged or at least allowed such a synthesis even what they saw as nonscientific care was better than none Yet both especially Guatemala s also wrote off indigenous lifeways and practices with both explicit and implicit racism going so far as to criminalize native medical providers and to experiment on indigenous people without their consent Both nations had authoritarian rule but Guatemala s was outright dictatorial tending to treat both women and indigenous people as subjects to be controlled and policed Ecuador on the other hand advanced a more pluralistic vision of national unity and had somewhat better outcomes as a result

A New Dawn in Guatemala Richard Luecke, 1993 **God and Production in a Guatemalan Town** Sheldon Annis, 2010-06-04 Since the late 1970s Protestantism has emerged as a major force in the political and economic life of rural Guatemala Indeed as Sheldon Annis argues in this book Protestantism may have helped tip Guatemala s guerrilla war in behalf of the army during the early 1980s But what is it about Protestantism and about Indians that has led to massive religious conversion throughout the highlands And in villages today what are the dynamics that underlie the competition between Protestants and Catholics Sheldon Annis addresses these questions from the perspective of San Antonio Aguas Calientes an Indian village in the highlands of midwestern Guatemala Annis skillfully blends economic and cultural analysis to show why Protestantism has taken root The key character in his drama is the village Indian s tiny plot of corn and beans the milpa which Annis analyzes as an idea as well as an agronomic productive system By exploring milpa logic Annis shows how the economic environmental and social shifts of the twentieth century have acted to undercut the colonial creation of Indianness and in doing so have laid the basis for new cultural identities

Underbelly Rachel Hall-Clifford, 2024-05-14 An unsettling exploration of the hidden power dynamics of global health seen through the lens of childhood diarrhea and its treatment within the Guatemalan context Deaths from childhood diarrhea seem preposterous in high income countries Yet for children under five years old in the rest of the world diarrhea is the third highest cause of mortality Despite a glut of prevention and treatment programming spanning more than forty years this least glamorous of global health ills remains a critical problem In *Underbelly* Rachel Hall Clifford takes a hard look at the pathways of global health funding and development policies and the outcomes they deliver for recipient individuals and communities Drawing on

fifteen years of ethnographic research in highland Guatemala Hall Clifford focuses on the provision of primary health care services as a critical exemplar of how global health and development programs fall short Guatemala has a fragmented health system the author explains that guarantees health as a human right but also suffers from systemic racism inadequate health services and access to those services community distrust from a legacy of harm and violence and a demeaning paternalism Bringing together the discourses of global health and medical anthropology Underbelly explores the ways in which global health its actors structures and systems perpetuates the challenges it purports to fix this is the underbelly Hall Clifford argues that global health programs conceived in offices distant from the places in which they are delivered often have unintended consequences and contribute to pluralistic and exclusionary health systems that mirror neoliberal economies She argues that if we are to fix this entrenched crisis of health inequity we must use the immense resources of global health to center local communities as drivers of change With a foreword written by Waleska Lopez Canu an Indigenous Maya medical director and an afterword by Arthur Kleinman renowned expert in global health this book underscores the importance of looking deeper into what seems on its surface incontrovertibly good to understand the more complex realities on the ground and in people's lives

Friedman, 1963 *Religious Transformation in Maya Guatemala* John P. Hawkins, 2021-05-01 Mayas and indeed all Guatemalans are currently experiencing the collapse of their way of life This collapse is disrupting ideologies symbols life practices and social structures that have undergirded their society for almost five hundred years and it is causing rapid and massive religious transformation among the K iche Maya living in highland western Guatemala Many Maya are converting to Christian Pentecostal faiths in which adherents and leaders become bodily agitated during worship Drawing on over fifty years of research and data collected by field school students Hawkins argues that two factors cultural collapse and systematic social and economic exclusion explain the recent religious transformation of Maya Guatemala and the style and emotional intensity through which that transformation is expressed Guatemala serves as a window on religious change around the world and Hawkins examines the rapid pentecostalization of Christianity not only within Guatemala but also throughout the global South The pentecostal wail as he describes it is ultimately an acknowledgment of the angst and insecurity of contemporary Maya *Covid's Chronicities*

Indian Medicine in Highland Guatemala Sandra Lee Orellana, 1987

Privatization and the New Medical Pluralism Anita Chary, Peter Rohloff, 2015-09-17

Privatization and the New Medical Pluralism is the first collection of its kind to explore the contemporary terrain of healthcare in Guatemala through reflective ethnography This volume offers a nuanced portrait of the effects of healthcare privatization for indigenous Maya people who have historically endured numerous disparities in health and healthcare access The collection provides an updated understanding of medical pluralism which concerns not only the tensions and exchanges between ethnomedicine and biomedicine that have historically shaped Maya people s experiences of health but also the multiple competing biomedical institutions that have emerged in a highly privatized market driven environment of care The

contributors examine the macro structural and micro level implications of the proliferation of non governmental organizations private fee for service clinics and new pharmaceuticals against the backdrop of a deteriorating public health system In this environment health seekers encounter new challenges and opportunities relationships between the public private and civil sectors transform and new forms of inequality in access to healthcare abound This volume connects these themes to critical studies of global and public health exposing the strictures and apertures of healthcare privatization for marginalized populations in Guatemala

Traditional Midwives Robbie Davis-Floyd, Betty-Anne Daviss, Inayat Ali, 2025-10-30 Traditional Midwives Cross Cultural Perspectives is a pioneering work that delves deeply into the worlds of traditional midwives shedding light on their practices roles and the immense cultural value they hold within their respective communities wherever they are still allowed to practice This book not only champions the significance of traditional midwifery but also critiques the often misguided global and national initiatives that seek to move all childbirths into biomedical facilities These facilities as clearly shown by the chapters in this book are frequently underequipped and under staffed often providing substandard care that can often be obstetrically violent and abusive The push to move all births into such facilities disregards the quality of care that traditional midwives provide and undermines the trust and rapport they have built within their respective communities This global push is particularly detrimental to rural women because biomedical facilities are often located far away from such communities This geographical distance makes access to maternity care difficult if not impossible especially for rural women Furthermore almost none of the biomedical practitioners are willing to live and practice in such remote areas thereby leaving thousands of especially rural women without any maternity care provision Other critical points that this book addresses are the failures of the governmental efforts to train traditional midwives in higher level skills As the chapters in this book also clearly demonstrate the essence of traditional midwifery lies in experiential learning where skills are passed down through observation practice and mentoring By bringing to light the multiple challenges that are currently being faced by traditional midwives and the shortcomings of biomedical facilities this book serves as a crucial reminder of the need for culturally safe and sensitive community based maternity care that traditional midwives are fully able to provide It is an essential read for policymakers healthcare professionals students and for anyone who is interested in traditional midwives and their practices
