Health Policy Reform National Variations And Globalization:

Health Policy Reform, National Variations and Globalization Christa Altenstetter, James Warner Bjorkman, 1997
This work discusses national variations in health care policy reforms covering issues in both financing and delivery of services such as managed care health insurance institutional ideas and involvement of foreign experts Specific topics include Canadian health care reform and the politics of decentralisation European Integration and Health Policy Panos Minogiannis, 2018-02-06 The impact of European integration on diverse national social policies is still largely unknown While policy decision making remains at the country level there is a strong possibility that indirectly as a result of ideological imperatives and financial constraints policies will change National health policy is a case in point This important volume explores the current and probable effect of European integration on health care protection Will it tend to encourage all European member states to provide equitable and universal access to quality care Or is the European integration process likely to lead to social exclusion of some The high degree of social welfare as a health expectancy holds great significance for decisions in countries like the United States facing similar pressures for expanded coverage In answering these questions Panos Minogiannis examines policies in Greece France Germany and the Netherlands Minogiannis frames his argument through an exploration of the history of the institutionalization of health care Chapter 1 explores the nature of challenges that health care faces in an era of integration and the ways in which these challenges have emerged Chapter 2 discusses centralization of governance in Brussels describing the structure and relations of different European Union institutions and their interactions with member states The final portions of the book through case studies of the Dutch French German and Greek health reforms explore the history of the political development of health care institutions with a particular interest in reform proposals in the last fifteen years Chapter 7 brings together lessons from previous chapters and discusses the dynamics of health policy making in the European Union Minogiannis concludes that health insurance will most likely remain at the member state level as far as politics are concerned at least for the present although policy makers will most likely have to deal with the issue of cross border health more comprehensively than in the past Those interested in comparative policy and in particular health care policy will find this volume highly informative reading Those interested in the impact of European integration will find it provocative Panos Minogiannis is with the Mailman School of Public Health at Columbia University and is a research associate at the Eisenhower Center **Comparative Health Policy** Robert H. Blank, Viola Burau, Ellen Kuhlmann, 2017-10-11 A broad ranging introduction to the provision funding and governance of health care across a variety of systems This revised fifth edition incorporates additional material on low middle income countries as well as broadened coverage relating to healthcare outside of hospitals and the ever increasing diversity of the healthcare workforce today **EBOOK: Critical Challenges For Health Care Reform In Europe** Richard B. Saltman, Josep Figueras, Constantino Sakellarides, 1998-10-16 This volume explores the central issues driving the present process of

healthcare reform in Europe 17 chapters written by scholars and policy makers from all parts of Europe draw together the available evidence from epidemiology and public health economics public policy organizational behaviour and management theory as well as real world policy making experience laying out the options that health sector decision makers confront Through its cross disciplinary cross national approach the book highlights the underlying trends that now influence health policy formulation across Europe An authoritative introduction provides a broad synthesis of present trends and strategies in European health policy

Transatlantic Policymaking in an Age of Austerity Flor Aarts, 2004-11-11 Transatlantic Policymaking in an Age of Austerity integrates the study of politics and public policy across a broad spectrum of regulatory and social welfare policies in the United States and several nations of Western Europe The editors and a sterling list of contributors look at policymaking in the 1990s through the present providing a comparative politics framework stressing both parallel development and the differences between and among the nations Similar prevailing ideas and political factors can be identified and transatlantic comparisons made providing for a clearer understanding of the policymaking process Faith in regulated markets and the burden of rising welfare costs are concerns found on both sides of the Atlantic Western democracies also share political climates colored by economic austerity low trust in government pressures from interest groups and a sharply divided electorate Because of differing political processes and differing policy starting points a variety of disparate policy decisions have resulted Real world policymaking in the areas of welfare health labor immigration reform disability rights consumer and environmental regulation administrative reforms and corporate governance are compared Ultimately the last decade is best characterized as one of drift sluggish changes with little real innovation and much default to the private sector In general policymakers on both sides of the ocean constrained by economic necessity have been unable to produce policy outcomes that satisfy the key segments of the electorate The contributors examine the United States Great Britain France and Germany as well as a number of other European countries and study the European Union itself as a policymaking institution Transatlantic Policymaking in an Age of Austerity distills the prominent issues politics and roles played by governmental institutions into a new understanding of the dynamics of policymaking in and among transatlantic nations

International Policy Studies Stuart S. Nagel, David Rosenblum, 2000 The basic elements of this book involve integrating five policy problems and four fields of knowledge The five policy problems are economic technology social political and legal The four developing regions are Africa Asia Eastern Europe and Latin America The four fields of knowledge are natural science social science humanities and law

Globalizing Tobacco Control Roddey Reid, 2005-12-20 Reid develops an approach to globalization and health that goes beyond simplistic dichotomies such as the puritanism of the United States in contrast with the more libertine cultures of other countries and he also eschews the equally simplistic view that the world is becoming homogenized David J Hess Rensselaer Polytechnic Institute A tangible aspect of living working and traveling in the 21st century is the experience of moving between smoke filled and smoke free environments In

Globalizing Tobacco Control Roddey Reid examines what lies behind this experience the revolution in public attitudes and health codes that regulate daily routines and the life of the body While the gradual replacement of smoking with non smoking as the social norm is a global phenomenon it has not followed the same trajectory everywhere Reid compares anti smoking campaigns in the United States France and Japan for what they reveal about the nature of globalization and liberal arts of government He explores distinctive national histories of tobacco evolving global marketing strategies of transnational tobacco corporations social marketing techniques used to tailor public health messages to particular ethnic communities and the programs of international public health organizations Learning in Public Policy Claire A. Dunlop, Claudio M.

Radaelli, Philipp Trein, 2018-04-28 This book explains the causal pathways the mechanisms and the politics that define the quantity and quality of policy learning A rich collection of case studies structured around a strong conceptual architecture the volume comprises fresh original empirical evidence for a large number of countries sectors and multi level governance settings including the European Commission the European Union and individual countries across Europe Australia Canada and Brazil The theoretically diverse chapters address both the presence of learning and its pathologies deploying state of the art methods including process tracing diffusion models and fuzzy set techniques The Transformation of the Social Right to Healthcare Katharina Böhm, 2016-06-17 This pathbreaking book investigates welfare state change in the area of health

care a field widely neglected by comparative welfare state research While some work on health care expenditure exists health care rights have not been systematically studied since social rights have exclusively focused on entitlement to cash benefits Addressing this research gap Böhm analyses in what way the social right to health care has been modified in the course of general welfare state transformation since the late 1970s Taking England and Germany as examples she assesses how health care reforms conducted under the conditions of constrained budgets demographic ageing and rapid medical progress have altered access to and generosity of public health care systems over the past 35 years The book's findings significantly increase our understanding of social rights and reveals fundamental differences of approach while Germany provides absolute and enforceable rights to health care for each entitled individual English social health care rights are directed towards the population as a whole and contingent upon the availability of resources i.e. they are not absolute and not enforceable This distinction between individual and collective social rights will be an important contribution to the theory of social rights given its applicability to other types of social rights and its usefulness in tracing changes in social rights over time **The HIV Pandemic** Peter Piot, 2007-12-14 As we approach the 25th anniversary of the first recognition of HIV AIDS

in 1981 this book reflects on the international impact of the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been infected since that date This ambitious book written by 165 authors from 30 countries offers a multi country comparative study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and health systems of the individual countries affected Increasingly the shift

of health systems has been from prevention only as the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals and users of the services have been forced to think differently about how services are financed how resources are allocated how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system Most chapters combine a health policy expert with an HIV specialist allowing both a top down health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue *The World Health Report 2003* World Health Organization,2003

We have a real opportunity now to make progress that will mean longer healthier lives for millions of people Vision for a Canada Strong and Free Mike Harris,Preston Manning,2007 Making Medicare Gregory P. Marchildon,2012-01-01 This collection fills a serious gap in the existing literature by providing a comprehensive policy history of Medicare in Canada

Gender and the Public Sector Jim Barry, Mike Dent, Maggie O'Neill,2003-09-02 Drawing on sociology and social policy this intriguing volume considers gender and professional identity from a variety of perspectives including feminism and post modernism

Jessica R. Adolino, Charles H. Blake,2010-01-05 The study of comparative public policy reveals the intensely political nature

of policy choices While policy analysts often look to policy successes and failures outside their borders to draw valuable lessons and insights cultural economic political and institutional conditions vary from country to country and strongly affect how policy analysis is ultimately used By combining a conceptual discussion of policy making with an examination of seven specific policy areas Jessica Adolino and Charles Blake show how politics in the realm of the environment education taxation economics immigration health care and social welfare shapes policy choices The second edition of *Comparing Public Policies* has been revised and updated to reflect the most recent political and policy developments This new edition expands coverage of the internationalization of domestic policy making by including a European Union case study in each issue area along with further discussion of the role of international interest groups in the policy process The seven policy chapters have been revised and updated to examine current issues in the United States Japan Germany France the United Kingdom Italy and the European Union such as the heightened calls for immigration policy reform the return to higher budget deficits in several countries the efforts to lower tax rates in countries with falling expenditures and in countries with rising spending levels the often unsuccessful attempts to control increasing health care costs in countries with aging populations the spirited debate over the future role of the welfare state in an increasingly globalized economy the at times divergent education reform debates regarding the role of assessment and calls for decentralization the uneven environmental performance in the reduction of carbon dioxide emissions Chapters include analyses of crossnational trends past and present and a final chapter reexamines the internationalization of public policy in industrialized countries Useful pedagogical features have been incorporated throughout the text including In Depth boxes that offer detailed discussion of the political process or analytical techniques and Country At a Glance boxes that provide quick reference to political institutions A wealth of recent data is displayed in numerous tables and a glossary gives students a practical guide to terminology
