recommendations for policy makers in these two regions and elsewhere Delivers relevant case studies and experiences on digital healthcare from Asia and Gulf Region covering important advances in digital healthcare Provides recommendations for policy makers in Asia the Gulf Region and around the world Discusses implications for main stakeholders i e patients doctors IT experts directors and policy managers and recommendations for policy makers in these two regions and elsewhere Investigates the interplay of several important research areas e g digital healthcare 5G AI Big Data and Blockchain with an emphasis on healthy aging *Promoting Healthy Aging Across the Lifespan* Elena Carrillo-Alvarez, Miriam Rodriguez-Monforte, Jordi Vilaró, Katherine Simone McGilton, 2024-12-26 Worldwide there is a generalized trend toward aged societies Between 2015 and 2050 the proportion of the world's population over 60 years will nearly double from 12% to 22% As life expectancy continues to increase and natality rates lower not only the composition of countries will change but also its health landscape However an increased life expectancy does not necessarily mean a healthy life In most high income countries more than 20% of those years are lived in ill health due to chronic conditions caused by non communicable diseases which compromises functional ability and well being key components of healthy aging In this way not only people's lives but also societal structures are being affected Based on the life course approach to healthy aging aging starts from conception In this regard the promotion of healthy aging requires preventive strategies that enhance capacities during growth and development maintain them for as long as possible after maturity and slow down their rate of decline Moreover considering healthy aging across the lifespan entails focusing on different factors life opportunities and choices that might significantly influence health status lifestyle as well as health and social inequalities in older age and challenges the focus of most research on the topic which exclusively investigates the effect of influences operating in the later stages of life

Healthy Aging, An Issue of Clinics in Geriatric Medicine , E-Book Susan M. Friedman, 2020-11-28 This issue of Clinics in Geriatric Medicine guest edited by Dr Susan Friedman is devoted to Healthy Aging Articles in this issue include Healthy Aging Across the Stages of Old Age How Geriatric Principles Inform Healthy Aging Multimorbidity Function and Cognition in Aging Preserving Cognition Preventing Dementia Preserving Engagement Nurturing Resilience The Frailty Cycle Reducing frailty to promote healthy aging Addressing Obesity to Promote Healthy Aging Lifestyle Medicine and Healthy Aging Nutrition and Healthy Aging Physical Activity and Healthy Aging Mindfulness Stress and Aging The Role of Prevention in Healthy Aging Best Practices for Promoting Healthy Aging Getting from Here to There Motivational Interviewing and Other Techniques to Promote Healthy Aging and more [Healthy Aging, Mental Health, and Sexuality](#) Alex Siu-Wing Chan, Elsie Yan, Steve Wai Hee Chan, 2023-10-23 Sexuality is the manner in which we undergo and exhibit sexuality It includes emotions wants behaviors and identities as well as a variety of forms of physical contact or stimulation Intimacy is a sense of togetherness and connection in a relationship which may or may not include physical contact Aging creates possibilities for older individuals to reinterpret what sexuality and intimacy entail for them as a result of life changes

Certain older individuals want both a sexual and an intimate partnership while others are fine with either and some may opt to reject both sorts of partnership. Normal aging also causes physiological changes that might interfere with the capacity for and enjoyment of sexual activity. Our bodies such as our size, skin and muscular condition shift as we age. Certain older individuals are unhappy with their deteriorating bodies. They may be concerned that their lover no longer finds them appealing. Intimacy and a satisfying sex life may be hindered by physical issues brought on by health disorders as well as by stress and anxiety. Men and women have different sexual problems. Erectile Dysfunction or ED occurs when a man has difficulty achieving or maintaining an erection. In certain cases ED is caused by prostate cancer therapies such as prostatectomy, a procedure in which the prostate is surgically removed in its entirety or in part. The condition is also caused by other health issues such as excessive blood sugar, heart disease or pelvic trauma. Notwithstanding the transformations brought on by natural aging, sexuality remains a vital aspect of our lifestyles as we age. Sexual health and function are essential elements of healthy aging. Sexual activity is connected with superior psychological health, self-esteem, marriage quality as well as personal well-being, whereas its absence is linked to a worse standard of living. Considering the significance of sexual function and sexual well-being in evaluating healthy aging as well as the inadequate knowledge of urological health among elderly people, this research topic highlights some of the key urological health aspects relevant to the journeys and mental or medical consequences of healthy aging, psychological wellbeing and sexuality. Among the broad questions of interest are the following: The experiences of older adults who identify as having a urological disorder or a mental disorder; Sexual health and sexual function dysfunction in older adults; Correlation between psychological disorder and urological health among older adults; Culture sociological discussion between psychological distress and healthy aging among older adults; Addressing sexual function and sexual well-being and healthy aging; Case studies of effective practice; Specific sexual orientation issues among older adults with urological disorders; Incorporating a patient care address for older adults with urological illnesses into the community. We are thus seeking innovative research papers, review articles, hypothesis and theory pieces, viewpoint articles, short research report articles, commentary articles, opinion articles and book reviews. We expect that by combining the ideas of scholars from diverse disciplines or contexts we will be able to explore the relationship between the significance of sexual function and sexual well-being in defining healthy aging and bridge the knowledge gap in urological health among older adults.

Active and Healthy Aging and Quality of Life: Interventions and Outlook for the Future, volume II Shekhar Chauhan, Petra Heidler, David Jean Simon, 2024-09-10. The continuous growth of older populations as a consequence of demographic changes is a huge global challenge. The growing proportion of older adults not only burdens the healthcare system specifically in developing countries but also posits a challenge at the household level specifically in nuclear and one person households. For societies as a whole to avoid costly and negative effects it is crucial to increase their knowledge of how to promote good health among older adults so that they can live longer and enjoy a better

quality of life Active aging is the process of optimizing opportunities for health participation and security in order to enhance quality of life as people age An active and healthy life has remained one of the most important aspirations for all people both young and older adults alike This ambition has become a genuine possibility for many due to a rising life expectancy among people of diverse attributes across the world While celebrating longer life and more financial security in later life than ever before we need to challenge how these aspirations can be sustained through our own behavioral responses and through public policy institutional reforms and innovations The challenge is to identify recommend and promote strategies and interventions that stimulate and sustain the activity independence and health of people of all ages especially older adults and in the process promote the well being and quality of life of people and make public welfare systems more sustainable

Metabolic Diseases and Healthy Aging: Prevention and Public Health Policy Based on Risk Factors Yun Gao ,Xiao Tan,Xiaohan Tanner Zhang,2024-11-06 Healthy aging is defined as the process of developing and maintaining the functional ability that enables well being in older age As population aging accelerates rapidly worldwide healthy aging has become a major public health challenge However in later life several metabolic diseases such as diabetes and hypertension and their complications cardiovascular and renal diseases et al impose significant barriers to healthy aging These conditions are influenced by various metabolic risk factors such as smoking high calorie diet and obesity Moreover these risk factors can also affect the aging process itself by disrupting the balance of metabolic regulation in the body Therefore understanding the complex interactions between aging and metabolic diseases is essential for improving public health outcomes in older populations This Research Topic aims to explore the links between metabolic risk factors chronic and metabolic diseases and healthy aging We wish to unveil evidence on how to prevent treat and manage metabolic risk factors and diseases in older adults in order to offer recommendations for future research and policy interventions toward healthy aging and public health
