studies arranged as in a lexicon from Amusement Arcade to Embodiment and Game Art to Simulation and World Building  
 Written by scholars and practitioners from a variety of disciplines including game development curatorship media  
 archaeology cultural studies and technology studies the essays offer a series of distinctive critical takes on historical topics  
 The majority of essays look at game history from the outside in some take deep dives into the histories of play and simulation  
 to provide context for the development of electronic and digital games others take on such technological components of  
 games as code and audio Not all essays are history or historical etymology there is an analysis of game design and a  
 discussion of intellectual property but they nonetheless raise questions for historians to consider Taken together the essays  
 offer a foundation for the emerging study of game history Contributors Marcelo Aranda Brooke Belisle Caetlin Benson Allott
