The Emergence of a National Economy V.J.H. Houben, J.Th. Lindblad, 2021-09-06 History matters At the beginning of a new century and amidst the turmoil of a new democracy a historical perspective on modern Indonesia is needed more than ever This innovative economic history connects back to the colonial era and helps to explain why the transition from colonialism to Independence and from the New Order to democracy has been so difficult and sometimes traumatic The Emergence of a National Economy identifies three grand themes in this transformation globalisation state formation and economic integration Globalisation affected the Indonesian archipelago even before the arrival of the Dutch the New Order experience was only the most recent wave Modern state formation began in Java under Governor General Daendels 1808 11 and culminated in the centralised military bureaucratic state of Soeharto s New Order 1966 98 A national economy emerged gradually from the 1930s as the Outer Islands were reoriented towards an industrialising Java These three themes link chronological chapters from the pre 1800 period through the modern colonial era to the breakdown of the colonial system after 1930 the birth of modern Indonesia the remarkable economic transformation under the New Order and the meltdown during the Asian crisis of 1997 98 This overarching story gives a unity and rhythm to Indonesia s modern history while helping to explain why the future is likely to be different The four authors senior scholars from Australia Howard Dick Germany Vincent Houben the Netherlands Thomas Lindblad and Indonesia Thee Kian Wie draw on a very wide range of sources to combine the insights of history economic history and economics **The Emergence of a National Economy** Howard Dick, Howard W. Dick, 2002 The product of a ten year scholarly collaboration by four senior international scholars this is the first chronological account for 50 years of Indonesia s modern economic history **Indonesia's Economy Since**

Independence Kian Wie Thee, 2012 This book contains a collection of papers on various aspects of Indonesia s economic and its industrial development It discusses the early independence period in the 1950s the Soeharto era 1966 1998 and the ensuing two economic crises namely the Asian Financial Crisis of 1997 98 and the Global Financial Crisis of 2008 Beyond Political Skin Phạm Văn Thủy, 2019-01-01 This book explains the dynamics behind the economic transformation from the colonial era to the post independence period in Indonesia and Vietnam It analyses the different Vietnamese and Indonesian government approaches to the economic legacies of colonialism remaining in these countries after independence It also demonstrates that despite critical differences between the two nation states the Vietnamese and Indonesian leaderships were pursuing similar long term goals to create a truly independent national economy The book discusses the way in which the Indonesian government established complete economic control resembling the socialist transformation of North Vietnam in the 1950s and the various means by which the government of South Vietnam concentrated economic power in its own hands during the late 1950s and early 1960s It also explores how the Indonesian government was determined remove the economic legacy of Dutch colonialism by placing the entire economy under strong state control and ownership in accordance with the

spirit of Guided Democracy and Guided Economy in the late 1950s and the early 1960s This book is a point of reference for students researchers and academics interested in a comparative analysis of the economic systems implemented by the colonial and fascist powers in Indonesia and Vietnam Handbook on the Northeast and Southeast Asian Economies Anis Chowdhury,2007-01-01 Provides a broad overview of economic and social developments in the countries covered Brunei Darussalam Cambodia China Hong Kong Indonesia Japan Lao Malaysia Myanmar North Korea The Philippines Singapore South Korea Taiwan Thailand Viet Nam Southeast Asia's Chinese Businesses in an Era of Globalization Leo Suryadinata,2006 Addresses the rise of China and its impacts on Southeast Asia s economies and businesses especially on those of ethnic Chinese Also discusses Southeast Asian government policies particularly their economic and business policies towards local Chinese and Southeast Asian Chinese businesses both conglomerates and SMEs in an era of globalization

Resource Nationalism in Indonesia Eve Warburton,2023-11-15 In Resource Nationalism in Indonesia Eve Warburton traces nationalist policy trajectories in Indonesia back to the preferences of big local business interests Commodity booms often prompt more nationalist policy styles in resource rich countries Usually this nationalist push weakens once a boom is over But in Indonesia a major global exporter of coal palm oil nickel and other minerals the intensity of nationalist policy interventions increased after the early twenty first century commodity boom came to an end Equally puzzling the state applied nationalist policies unevenly across the land and resource sectors Resource Nationalism in Indonesia explains these trends by examining the economic and political benefits that accrue to domestic business actors when commodity prices soar Warburton shows how the centrality of patronage to Indonesia s democratic political economy and the growing importance of mining and palm oil as drivers of export earnings enhanced both the instrumental and structural power of major domestic companies giving them new influence over the direction of nationalist change Republicanism, Communism, Islam John T. Sidel,2021-05-15 In Republicanism Communism Islam John T Sidel provides an alternate vantage point for understanding the variegated forms and trajectories of revolution across the Philippines Indonesia and Vietnam a perspective that is de nationalized internationalized and transnationalized Sidel positions this new vantage point against the conventional framing of revolutions in modern Southeast Asian history in terms of a nationalist template on the one hand and distinctive local cultures and forms of consciousness on the other Sidel s comparative analysis shows how in very different decisive and often surprising ways the Philippine Indonesian and Vietnamese revolutions were informed enabled and impelled by diverse cosmopolitan connections and international conjunctures Sidel addresses the role of Freemasonry in the making of the Philippine revolution the importance of Communism and Islam in Indonesia s Revolusi and the influence that shifting political currents in China and anticolonial movements in Africa had on Vietnamese revolutionaries Through this assessment Republicanism Communism and Islam tracks how these forces rather than nationalism per se shaped the forms of these revolutions the ways in which they unfolded and the legacies which they left in their wakes **Post-Conflict Development**

in East Asia Brendan M. Howe, 2016-04-08 East Asia is a region deeply affected by conflict Colonial ideological and national wars have left their scars and legacies on regional international and national governance Yet East Asian post conflict development experiences have been viewed as remarkably successful The three largest economies of East Asia Japan China and South Korea have all experienced dramatic growth but immediately prior to their periods of expansion all experienced the devastating impacts of international conflicts and or civil upheaval These post conflict development success stories do not however tell the whole tale Other states in East Asia and in particular certain regions within some of these states while apparently emerging from similar conflictual backgrounds have experienced far less positive transitions This volume critically assesses measurements of success in East Asian post conflict development from a human centered perspective This involves a major re evaluation of accepted accounts of domestic governance and international relations in East Asia from both a comparative and inter disciplinary viewpoint Case study rich this volume provides policy prescriptions for East Asian donors and actors in an effort to provide Asian solutions for Asian problems

Development and Distribution Andy Sumner, 2018-07-03 Since the Second World War surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations East Asia has exceeded most regions in its achievement of convergence and much has been written on comparative industrialization and development in North East Asia Less discussed is South East Asia and the surprising and inclusive transformation several of its countries has undergone Development and Distribution focuses on South East Asia and more specifically on Malaysia Indonesia and Thailand These three nations have all undergone a major transformation in a way never anticipated from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases How did Malaysia Indonesia and Thailand achieve such a transformation and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive Given that historically it has been thought that structural transformation tends to push up inequality whilst inclusive growth necessitates static or even falling inequality this last point is particularly salient to developing countries Understanding how the transformation was possible in a relatively small space of time the extent to which it was inclusive and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and social transformation

The Creation of the East Timorese Economy Mats Lundahl, Fredrik Sjöholm, 2020-01-03 Very little has been written on the economy of East Timor since the country's independence in 2002 and no comprehensive account exists of the economic history of the country The former cannot be properly understood without a knowledge of the historical process that created the present day
