**Computer-assisted Reporting** Bruce Garrison, 2020-07-20 Reporters in the newsroom are becoming more involved in computer assisted reporting and online news research than ever before This edition introduces readers to computer assisted reporting and to describe how leading journalists are using personal computers for news gathering in modern print broadcast and online newsrooms It provides a thorough discussion of technology and its applications to news reporting Computer Assisted Reporting focuses on the computerization of newsgathering highlighting the fact that the computer assists journalists by making writing easier and also makes gathering and organizing information more efficient As it begins the book demonstrates methods for journalists to get more from their computers such as data retrieval data analysis information storage and dissemination of that information in both processed and unprocessed forms It concludes with a refined proposal originally proposed in the first edition for five stages for development of computer literacy in the newsroom

**Emergency Incident Management Systems** Mark S. Warnick, Louis N. Molino, Sr., 2020-01-13 The second edition was to be written in order to keep both reader and student current in incident management This was grounded in the fact that incident management systems are continually developing These updates are needed to ensure the most recent and relevant information is provided to the reader While the overall theme of the book will remain the same of the first edition research

and research based case studies will be used to support the need for utilizing emergency incident management systems Contemporary research in the use and non use of an incident management system provides clear and convincing evidence of successes and failures in managing emergencies This research provides areas where first responders have misunderstood the scope and use of an emergency incident management system and what the outcomes were Contemporary and historical research based case studies in the United States and around the globe have shown the consequences of not using emergency incident management systems including some that led to increased suffering and death rates Research based case studies from major incidents will be used to show the detrimental effects of not using or misunderstanding these principles One of the more interesting chapters in the new edition is what incident management is used around the world Short Story Index ,1999 *It Was Like a Fever* Francesca Polletta,2009-01-14 Activists and politicians have long recognized the power of a good story to move people to action In early 1960 four black college students sat down at a whites only lunch counter in Greensboro North Carolina and refused to leave Within a month sit ins spread to thirty cities in seven states Student participants told stories of impulsive spontaneous action this despite all the planning that had gone into the sit ins It was like a fever they said Francesca Polletta s *It Was Like a Fever* sets out to account for the power of storytelling in mobilizing political and social movements Drawing on cases ranging from sixteenth century tax revolts to contemporary debates about the future of the World Trade Center site Polletta argues that stories are politically effective not when they have clear moral messages but when they have complex often ambiguous ones The openness of stories to interpretation has allowed disadvantaged groups in particular to gain a hearing for new needs and to forge surprising political alliances But popular beliefs in America about storytelling as a genre have also hurt those challenging the status quo A rich analysis of storytelling in courtrooms newsrooms public forums and the United States Congress *It Was Like a Fever* offers provocative new insights into the dynamics of culture and contention **The Routledge International Handbook of Public Administration and Digital Governance** Sarah Giest,Ian Roberge,2024-12-30 The Routledge Handbook of Public Administration and Digital Governance is a comprehensive cutting edge guide for students scholars practitioners of public policy public administration and digital governance The book demonstrates the diverse nature of digital government through a series of case studies from different regions across the globe including Africa the Americas Asia and Europe The book uses these cases to highlight various aspects and implications of the intersection of digital technologies and public administration These include impact of practices and principles of public administration the effects of particular technologies tools and the relationship between state and citizen The book also addresses barriers and enablers to the adoption of digital technology with select chapters focusing on artificial intelligence AI in governmental contexts by leading practitioners and scholars Rather than providing region specific lessons the cases identify common challenges offering a more holistic understanding of public administration in the digital era With contributions from both practitioners and scholars this handbook will be a compelling resource for

those researching studying or working in public administration public leadership information systems political science and other related fields

Jonathan M. Metzl,2024-01-30 A Kirkus Reviews Best Book of 2024 A searing reflection on the broken promise of safety in America When a naked mentally ill white man with an AR 15 killed four young adults of color at a Waffle House Nashville based physician and gun policy scholar Dr Jonathan M Metzl once again advocated for commonsense gun reform But as he peeled back evidence surrounding the racially charged mass shooting a shocking question emerged Did the public health approach he had championed for years have it all wrong Long at the forefront of a movement advocating for gun reform as a matter of public health Metzl has been on constant media call in the aftermath of fatal shootings But the 2018 Nashville killings led him on a path toward recognizing the limitations of biomedical frameworks for fully diagnosing or treating the impassioned complexities of American gun politics As he came to understand it public health is a harder sell in a nation that

fundamentally disagrees about what it means to be safe healthy or free In What We ve Become Metzl reckons both with the long history of distrust of public health and the larger forces social ideological historical racial and political that allow mass shootings to occur on a near daily basis in America Looking closely at the cycle in which mass shootings lead to shock horror calls for action and ultimately political gridlock he explores what happens to the soul of a nation and the meanings of safety and community when we normalize violence as an acceptable trade off for freedom Mass shootings and our inability to stop them have become more than horrific crimes they are an American national autobiography This brilliant piercing analysis points to mass shootings as a symptom of our most unresolved national conflicts What We ve Become ultimately sets us on the path of alliance forging racial reckoning and political power brokering we must take to put things right
