Faith, Health, and Healing in African American Life Stephanie Y. Mitchem, Emilie M. Townes, 2008-08-30 Black Americans are more likely than Whites to die of cancer and heart disease more likely to get diabetes and asthma and less likely to get preventive care and screening Some of this greater morbidity results from education income level and environment as well as access to health care But the traditional medical model does not always allow for a more holistic approach that takes into account the body the mind the spirit the family and the community This book offers a better understanding of the varieties of religiously based approaches to healing and alternative models of healing and health found in Black communities in the United States Contributors address the communal aspects of faith and health and explore the contexts in which individuals make choices about their health the roles that institutions play in shaping these decisions and the practices individuals engage in seeking better health or coping with the health they have By paying attention to the role of faith spirit and health this book offers a fuller sense of the varieties of ways Black health and health care are perceived and addressed from an inter religious perspective Community and religion based initiatives have emerged as one key way to address the health challenges found in the African American community In cities such as Atlanta Baltimore Dallas and Oakland residents organize exercise groups teach one another how to cook with healthy ingredients and encourage neighbors to get regular checkups Churches have become key sites for health education screening and testing Another set of responses to the challenge of Black health and healthcare in the United States comes from those who emphasize the body as a whole body mind soul and spirit often drawing on religious traditions such as Islam and African based religions such as Spiritism Santeria Vodun aka Voodoo Candomblé and others Understanding the issues and the various approaches is essential to combating the problems and this unique volume sheds light on areas often overlooked when considering the issues

Irenaeus and Genesis Thomas Holsinger-Friesen,2009-06-30 Irenaeus the second century bishop of Lyons left such an impression upon the church that he is sometimes considered to be theology s founding father After all his legacy includes such theological landmarks as the regula fidei or rule of faith and the doctrine of recapitulation Although these ought not to be minimized we may gain a new appreciation for this early bishop by highlighting a facet of his work that is even more central the distinctive shape of the hermeneutic guiding his readings of sacred texts as Christian Scripture Within the

contemporary climate of twenty first century theology the reopening of questions of power truth authenticity and holism points to a critique of hermeneutical process not just theological end product In Irenaeus s day Gnostic Christians on the fringe of the church offered a vision of the telos of faith that many found compelling Responding to this challenge required Irenaeus to articulate an even more satisfying Christian theology and anthropology on the basis of Scripture and received apostolic tradition In this battle of hermeneutics both sides considered protological texts such as Genesis 1 26 and 2 7 to be indispensable Through a sympathetic reading then of Irenaeus and his competitors we aim to better understand why Irenaeus s biblical interpretations ultimately were deemed more plausible faithful and fruitful within the mainstream of the church
