health care policy in the United States **Women's Health, Politics, and Power** Elizabeth Fee, Nancy Krieger, 2020-11-26
This collection of essays addresses the broadening array of issues on the agenda of the women's health movements of the 1980s and 1990s just as a previous collection *Women and Health: The Politics of Sex in Medicine* gathered contributions from the earlier wave of the women's health movement in the 1970s. The papers in both volumes are selected from the *International Journal of Health Services* edited by Vicente Navarro. The essays in this volume were originally published in the 1980s and early 1990s. Together they present a framework for understanding the struggles over women's health that have occurred in this time period and provide specific analyses of women's health in relation to race, ethnicity, and class, the work of health care, the health of women workers, international reproductive health, sexuality, AIDS, and public health policy.

Embodying Inequality Nancy Krieger, 2016-12-05 To advance the epidemiological analysis of social inequalities in health and of the ways in which population distributions of disease, disability, and death reflect embodied expressions of social inequality, this volume draws on articles published in the *International Journal of Health Services* between 1990 and 2000. Framed by ecosocial theory, it employs ecosocial constructs of embodiment, pathways of embodiment, cumulative interplay of exposure, susceptibility, and resistance across the lifecourse, and accountability and agency to address the question of who and what drives current and changing patterns of social inequalities in health.
