Patient Confidentiality United States. Congress. House. Committee on Ways and Means. Subcommittee on Health, 1998 **Clinical Guide to Mental Disability Evaluations** Liza Gold, Donna L. Vanderpool, 2013-01-11

Disability evaluations are the most common clinical mental health evaluations conducted for nontreatment purposes. They place mental health professionals in the role of communicating information that is typically confidential to administrative and legal systems. Unfortunately, mental health professionals receive little to no training in conducting assessments that focus on disability and disability management and often do not understand the implications and risks of providing this information, especially without conducting what are often specialized evaluations. *Clinical Guide to Mental Health Disability Evaluations* is geared for general mental health practitioners, providing them with the basic information needed to competently provide the various types of disability evaluations. It also provides

enough information to inform forensic mental health providers in conducting more specialized evaluations *Code of Federal Regulations*, 2016 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries The Genetic Information Nondiscrimination Act United States.
