Ottati, 2020-10-15 Christianity in the United States is in crisis Liberalism is declining evangelicalism is splintering increasing numbers of Christians are slipping away from churches and more and more young people are for various reasons finding Christianity as they conceive it a metaphysical thought system or society of science deniers or an ideology for oppressors not just implausible but repellent At the same time Christians across denominational and ideological divides are rediscovering a moral core especially in the Jesus of the Gospels that reactivates and unites them and this kind of faith appeals to many who consider themselves averse to all traditional organized religion But any revitalized Christian faith is going to need to understand its rootedness in and interpretation of Christianity's foundational texts and traditions Noted theologian Douglas F Ottati steps in to offer a theology for this new era Combining deep learning in texts and traditions with astute awareness of contemporary questions and patterns of thought and life he asks what does it mean in our time to understand the God of the Bible as Creator and Redeemer Distilling the content of Christian faith into seventy concise propositions he explains each in lucid cogent prose A Theology for the Twenty First Century will be an essential textbook for those training for ministry in our current climate a wise guide for contemporary believers who wonder how best to understand and communicate their faith and an inviting and intelligent resource for serious inquirers who wonder whether the way of Jesus might help them grasp the real world while remaining open to the transcendent *Safer Vaccines, Safer Children* Dr. Robert Caires DC Esq. inactive, 2018-12-23 How many vaccines that contain unnatural to human biology chemicals can be injected before your children suffer autism or some other condition The answer is unclear which is why it is imperative to parents for the sake of their children's health and very future to never inject chemicals that could do irreparable harm Dr Robert Caires DC Esq inactive a doctor and lawyer explains why parents are placed in the uncomfortable position of refusing to vaccinate their children with vaccines that have unhealthy chemicals Parents will consider SAFER vaccines This book is a detailed account on how most vaccines are laced

with harmful chemicals that can degenerate the health of children and even cause autism Children deserve SAFER vaccines and parents need to protect children from CHEMICALIZATION He makes a compelling argument that to assure SAFER vaccines vaccination should not be mandated and that vaccine producers need to be held accountable and liable for injuries induced by vaccine chemicals The priority must be safety but for far too long it s been all about profits Be safe not sorry only consider SAFER vaccines The autism epidemic rages on because the main etiology of autism is the unnatural to human biology chemicals in vaccines that penetrate brain cells Empower yourself keep your children safe and help change the system with the insights in Safer Vaccines Safer Children      **Health Care Turning Point** Roger M. Battistella,2012-02-10 An expert debunks popular misconceptions about health policy including the merits of single payer plans and offers an alternative In the battle over health care reform we can try to fashion new policies based on old ideas or we can acknowledge today s demographic and economic realities In Health Care Turning Point health policy expert Roger Battistella argues that the conventional wisdom that dominates health policy debates is out of date Battistella takes on popular misconceptions about the advantages of single payer plans the role of the market and other health policy issues and outlines a pragmatic new approach Few would disagree that the current system is broken But Battistella asserts provocatively a government takeover of health insurance patterned after Medicare and Medicaid won t work either Battistella argues that contrary to popular belief single payer coverage will not lower health spending but would encourage overconsumption and drive costs up If consumers were responsible for buying their own health insurance as they are for buying their own car and home insurance he argues they d look for value and demand greater price and quality transparency from providers The economic shibboleth that the principles of market competition don t apply to health care is nonsense Battistella says We won t achieve real health care reform until policy makers adjust to this reality and adopt a more pragmatic view      Health Care Proxies, Powers of Attorney, and Living Wills ,1991      *Mental health, human rights and legislation* World Health Organization,Office of the United Nations High Commissioner for Human Rights (UN Human Rights),2023-10-09      Principles of Health Care Ethics Richard Edmund Ashcroft,Angus Dawson,Heather Draper,John McMillan,2007-07-23 Edited by four leading members of the new generation of medical and healthcare ethicists working in the UK respected worldwide for their work in medical ethics Principles of Health Care Ethics Second Edition is a standard resource for students professionals and academics wishing to understand current and future issues in healthcare ethics With a distinguished international panel of contributors working at the leading edge of academia this volume presents a comprehensive guide to the field with state of the art introductions to the wide range of topics in modern healthcare ethics from consent to human rights from utilitarianism to feminism from the doctor patient relationship to xenotransplantation This volume is the Second Edition of the highly successful work edited by Professor Raanan Gillon Emeritus Professor of Medical Ethics at Imperial College London and former editor of the Journal of Medical Ethics the leading journal in this field Developments from the First Edition include The focus on Four Principles
