sources The widespread applicability of foods or botanicals are rarely described and cautionary notes on toxicity are often ignored These issues are explored in Ancient and Traditional Foods Plants Herbs and Spices used in Cardiovascular Health and Disease Features Investigates alternative healthcare paradigms that use traditional dietary foods plant derived materials and extracts to treat cardiovascular diseases Provides information on diets specific agents and extracts Many chapters focus on plant derived material providing a historical background uses toxicity and cautionary notes and summary points With contributions from leading international experts this book is useful for cardiologists nutritionists physicians healthcare workers food scientists and those working in the food industry pharmacologists and research scientists
