Temkin, 2022 How should the well off respond to the world's needy? Renowned ethicist Larry S. Temkin challenges common beliefs about philanthropy and Effective Altruism, exploring the complex ways that global aid may do more harm than good and considers the alternatives available when neglecting the needy is morally impermissible **European Competition Law Annual 2001** Claus-Dieter Ehlermann, Isabela Atanasiu, 2003-07-22 The European Competition Law Annual 2001 is the sixth in a series of volumes following the annual workshops on EU Competition Law and Policy held at the Robert Schuman Centre of the European University in Florence. The volume reproduces the materials of the roundtable debate that took place at the sixth edition of the Workshop 1-2 June 2001, which examined the conditions for an effective private enforcement of EC antitrust rules. The application of EC antitrust rules in the context of private litigation before national courts and arbitration tribunals is becoming a highly topical subject against the background of the on-going debate about the decentralisation of EC antitrust enforcement. The participants, a group of senior representatives of the Commission, national judges, arbitrators, renowned academics and international legal experts in the field of antitrust, discussed in particular the following aspects: a) the availability and effectiveness of substantive remedies in the enforcement of EC antitrust rules at the EU level in general and in four major EU jurisdictions in particular (England, France, Italy and Germany); b) the procedural issues arising in the enforcement of EC antitrust rules by national courts in four EU jurisdictions (England, France, Italy and Germany) and at the EU level in general; c) the problems arising in the application of Article 81(3) EC by arbitration tribunals. In addition to these issues, the participants also discussed whether the public enforcement of EC antitrust rules could be rendered more effective by introducing sanctions applicable to the individuals responsible for their violation **The Security Council as Global Legislator** Vesselin Popovski, Trudy Fraser, 2014-07-11 Security Council resolutions have undergone an important evolution over the last two decades. While continuing its traditional role of determining state-specific threats to peace and engaging accordingly in various peaceful or coercive measures, the Security Council has also adopted resolutions that have effectively imposed legal obligations on all United Nations member states. This book seeks to move away from the discussions of whether the Security Council in the current composition and working methods is representative, capable or productive. Rather, it assesses whether legislative activity by the Security Council can be beneficial to international peace and security. The authors examine and critique the capacities of the Security Council to address thematic international threats such as terrorism, weapons proliferations, targeting of civilians, recruitment of child soldiers, piracy, as an alternative to the traditional model of addressing country-specific situations on a case-by-case basis. Ultimately, the book seeks to assess the efficacy of the Security Council as global legislator in terms of complementing the Security Council's mandate for the maintenance of international peace and security with a preventative

and norm setting capacity The book presents views from a diverse range of Security Council stakeholders including academic scholars political analysts and international lawyers This resource will be of great interest to students of international relations international organizations and international security studies alike
