Heart Clock:

Heart Clock Reginald Hill, 1973 *Out of Heart* Irfan Master, 2017-04-20 Donating your heart is the most precious gift of all LONGLISTED for the 2018 CILIP CARNEGIE MEDAL Adam is a teenage boy who lives with his mum and younger sister His dad has left them although lives close by His sister no longer speaks and his mum works two jobs Adam feels the weight of the world upon his shoulders Then his grandfather dies and in doing so he donates a very precious gift his heart William is the recipient of Adam s grandfather s heart He has no family and feels rootless and alone In fact he feels no particular reason to live And then he meets Adam s family William has received much but it appears that he has much to offer Adam and his family too A powerful tale of love and strength in adversity **Thoracic Radiology for the Small Animal Practitioner**

Robert O'Brien, 2001 This very useful book for the general practitioner offers a practical approach to general film interpretation and a prioritized approach to differential diagnoses The systemic approach and well structured text that is organized into key points and important features make this an ideal quick reference guide to thoracic radiology It covers interpretation of thoracic radiographs for the diagnosis in dogs and cats how to increase the quality of images background information about the possible causes of various abnormal finding and corresponding diagnostic tests and treatments The presentation reminds practitioners of the basics with useful hints on radiographic techniques and positioning of dogs and cats Normal and abnormal finds of the dog and cat are discussed as well as possible causes suggestion for additional diagnostic test and treatment approaches Excellent quality images and diagrammed overlays well illustrate the difference between normal and abnormal findings The easy to follow format which includes diagrams charts and outlines makes it a fast and convenient reference Published by Teton New Media in the USA and distributed by Manson Publishing outside of North America The Restless Clock Jessica Riskin, 2016-03-10 A wide ranging witty and astonishingly learned scientific and

cultural history of the concept of the capacity to act in nature London Review of Books Today a scientific explanation is not meant to ascribe agency to natural phenomena we would not say a rock falls because it seeks the center of the earth Even for living things in the natural sciences and often in the social sciences the same is true A modern botanist would not say that plants pursue sunlight This has not always been the case nor perhaps was it inevitable Since the seventeenth century many thinkers have made agency in various forms central to science The Restless Clock examines the history of this principle banning agency in the life sciences It also tells the story of dissenters embracing the opposite idea that agency is essential to nature The story begins with the automata of early modern Europe as models for the new science of living things and traces questions of science and agency through Descartes Leibniz Lamarck and Darwin among many others Mechanist science Jessica Riskin shows had an associated theology the argument from design which found evidence for a designer in the mechanisms of nature Rejecting such appeals to a supernatural God the dissenters sought to naturalize agency rather than outsourcing it to a divine engineer Their model cast living things not as passive but as active self making machines The

conflict between passive and active mechanist approaches maintains a subterranean life in current science shaping debates in fields such as evolutionary biology cognitive science and artificial intelligence This history promises not only to inform such debates but also our sense of the possibilities for what it means to engage in science and even what it means to be alive

Praise for *The Restless Clock* A wonderful contribution and much needed corrective to the history of European ideas about life and matter Evelyn Fox Keller author of *The Mirage of a Space between Nature and Nurture* Engrossing and illuminating Nature A sweeping survey of the search for answers to the mystery of life Riskin writes with clarity and wit and the breadth of her scholarship is breathtaking Times Higher Education UK

Remodeling of cardiac passive electrical properties and susceptibility to ventricular and atrial arrhythmias George E. Billman, 2015-09-25 The effective management of cardiac arrhythmias either of atrial or of ventricular origin remains a major challenge Sudden cardiac death due to ventricular tachyarrhythmias remains the leading cause of death in industrialized countries while atrial fibrillation is the most common rhythm disorder an arrhythmia that s prevalence is increasing and accounts for nearly one quarter of ischemic strokes the elderly population Yet despite the enormity of the problem effective therapeutic interventions remain elusive In fact several initially promising antiarrhythmic agents were found to increase rather than decrease mortality in patients recovering from myocardial infarction The question then is what went wrong why have these interventions proven to be so ineffective An obvious answer is the drugs were designed to attack the wrong therapeutic target Clearly targeting single ion channels using either isolated ion channels or single myocytes preparations has proven to be less than effective What then is the appropriate target It is well established that cardiac electrical properties can vary substantially between single cells and intact preparations One obvious example is the observation that action potential duration is much longer in isolated cells as compared to multi cellular preparations or intact hearts Due to the low electrical resistance between adjacent myocytes the cells act in coordinated fashion producing electrotonic interdependence between neighboring cells Myocardial infarction and or acute ischemia provoke profound changes in the passive electrical properties of cardiac muscle In particular electrotonic uncoupling of the myocytes disrupts the coordinated activation and repolarization of cardiac tissue The resulting compensatory changes in ionic currents decrease cardiac electrical stability increasing the risk for life threatening changes in the cardiac rhythm Thus the electrical properties of myocardial cells must be considered as a unit rather than in isolation It is the purpose of this Research Topic to evaluate the largely neglected relationship between changes in passive electrical properties of cardiac muscle and arrhythmia formation

Aspects of Pacemakers Oliver Vonend, Siegfried Eckert, 2011-09-15 Outstanding steps forward were made in the last decades in terms of identification of endogenous pacemakers and the exploration of their controllability New artificial devices were developed and are now able to do much more than solely pacemaking of the heart In this book different aspects of pacemaker functions and interactions in various organ systems were examined In addition various areas of application and the potential side effects and complications of the devices were discussed

Shea, Ph.D., 2010-11-30 Dr Michael J Shea's series on Biodynamic Craniosacral Therapy is based on healthcare providers physically sensing love and accessing a deep sense of warmth and stillness in the heart He

begins this third volume by emphasizing the therapeutic application of touch therapy skills. As in the previous two books, he teaches these skills by explaining the importance of practitioners being able to perceive Primary Respiration, a slow rhythmic tidal movement in the fluids of the body. He goes on to discuss the distinctive influence of human embryology on any therapeutic modality. A number of other experts in the field contribute chapters that illuminate the spiritual and psychological dimensions of human embryonic development, especially the heart. Dr. Shea offers valuable new skills for anyone from midwives to pediatricians working therapeutically with infants. In addition, he summarizes current thinking on infant brain development, discusses the long-term consequences of attachment issues between the mother and infant, and explores the importance of understanding the similarities of the mother-infant and the therapist-patient relationships. **Victorian**

Poetry and the Culture of the Heart Kirstie Blair, 2006-04-27 Victorian Poetry and the Culture of the Heart is a significant and timely study of nineteenth-century poetry and poetics. It considers why and how the heart became a vital image in Victorian poetry and argues that the intense focus on heart imagery in many major Victorian poems highlights anxieties in this period about the ability of poetry to act upon its readers. In the course of the nineteenth century, this study argues, increased doubt about the validity of feeling led to the depiction of the literary heart as alienated, distant, outside the control of mind and will. This coincided with a notable rise in medical literature specifically concerned with the pathological heart and with the development of new techniques and instruments of investigation such as the stethoscope. As poets feared for the health of their own hearts, their poetry embodies concerns about a widespread culture of heartsickness in both form and content. In addition, concerns about the heart's status and actions reflect upon questions of religious faith and doubt and feed into issues of gender and nationalism. This book argues that it is vital to understand how this wider culture of the heart informed poetry and was in turn influenced by poetic constructs. Individual chapters on Barrett Browning, Arnold, and Tennyson explore the vital presence of the heart in major works by these poets, including Aurora Leigh, Empedocles on Etna, In Memoriam, and Maud. While the wide-ranging opening chapters present an argument for the mutual influence of poetry and physiology in the period and trace the development of new theories of rhythm as organic and affective, The Transatlantic Longitude, as Determined by the Coast Survey Expedition of 1866 Benjamin Apthorp Gould (Jr.), 1869
