Corvin,2007 Apoptosis is the regulated form of cell death It is a complex process defined by a set of characteristic morphological and biochemical features that involves the active participation of affected cells in a self destruction cascade This programmed cell death plays a critical role in physiological functions such as cell deletion during embryonic development balancing cell number in continuously renewing tissues and immune system development Additionally a dysregulation of apoptosis is underlying in numerous pathological situations such as Parkinson Alzheimer s disease and cancer fruits and vegetables and certain beverages such as tea and wine which are rich in polyphenols with reduced risk of chronic diseases including cancer Apoptosis is also the regulatory mechanism involved in the removal of unnecessary cells during development and in tissue homeostasis in a wide range of organisms from insects to mammals The aim of this book is to provide new studies in the field of apoptosis research

**Oncothermia: Principles and Practices** Andras Szasz,Nora Szasz,Oliver Szasz,2010-11-23 Oncothermia is the next generation medical innovation that delivers selective controlled and deep energy for cancer treatment The basic principles for oncothermia stem from oncological hyperthermia the oldest approach to treating cancer Nevertheless hyperthermia has been wrought with significant controversy mostly stemming from shortcomings of controlled energy delivery Oncothermia has been able to overcome these insufficiencies and prove to be a controlled safe and efficacious treatment option This book is the first attempt to elucidate the theory and practice of oncothermia based on rigorous mathematical and biophysical

analysis not centered on the temperature increase It is supported by numerous in vitro and in vivo findings and twenty years of clinical experience This book will help scientists researchers and medical practitioners in understanding the scientific and conceptual underpinnings of oncothermia and will add another valuable tool in the fight against cancer Professor Andras Szasz is the inventor of oncothermia and the Head of St Istvan University s Biotechnics Department in Hungary He has published over 300 papers and lectured at various universities around the world Dr Oliver Szasz is the managing director of Oncotherm the global manufacturer and distributor of medical devices for cancer treatment used in Europe Asia since the late 1980s Dr Nora Szasz is currently a management consultant in healthcare for McKinsey Co *Cancer Research* ,2007-03
