Digital Literary Redlining Amy E. Earhart, 2025-06-24 Though canon concerns seem to be a relic of 1990s academia we are once again at a historical moment when there is resistance to teaching texts by writers of color and texts that deal with race ethnicity and gender At the same time algorithmic bias scholars are locating systemic bias encoded into systems from policing software to housing software Bringing these divergent areas together Amy E Earhart examines how technological and institutional infrastructures construct and deconstruct race ethnicity and gender identities Focusing on two central infrastructures the database a commonly used technological infrastructure in the digital humanities and the anthology a scholarly and pedagogical infrastructure Earhart considers how such seemingly naturalized infrastructures impact the

representation and modeling of identity The book draws upon the building and use of DALA a collection of almost 100 years of generalist American and African American literature anthologies constructed to investigate questions of identity and representation in literary anthologies and by extension the larger literary canon The resulting examination and its rigorous discussion of how identities are created and recreated within Black literary histories has important implications for contemporary cultural and political debates about canon formation literary scholarship and the bias embedded in technological infrastructures

Does It Really Mean That? Interpreting the Literary Ambiguous Janka Kaščáková, Janka Kaščáková, 2011-01-18 However disconnected the essays in the volume might appear to be at first glance the unifying factor is the very notion of ambiguity which is one of the essential features of the postmodern age how it can be defined as opposed to what it means or is where it can be found to what purposes it can be put including questions of whether it is a positive or negative factor But this of course is not a new phenomenon Writers have always depended on equivocation multiplicity of meaning uncertainty of meaning deliberate mystification one might say Language itself is the base of ambiguity not only in literature but in everyday public discourse Thus the papers in the volume

should appeal not only to scholars working in the fields of modern or postmodern literature but those who see the importance of ambiguity in the earlier texts and perhaps their influences in later writing Finally the essays included here not only provide specific analyses and proposed solutions for specific works or authors they also open the reader to other appearances of ambiguity often not simply in literature or critical theory but in the kinds of social issues the literary works deals with

Teaching Tainted Lit Janet G. Casey, 2015-11-15 Popular American fiction has now secured a routine position in the higher education classroom despite its historic status as culturally suspect This newfound respect and inclusion have almost certainly changed the pedagogical landscape and *Teaching Tainted Lit* explores that altered terrain If the academy has historically ignored or even sneered at the popular then its new accommodation within the framework of college English is noteworthy surely the popular introduces both pleasures and problems that did not exist when faculty exclusively taught literature from an established high canon How then does the assumption that the popular matters affect teaching strategies classroom climates and both personal and institutional notions about what it means to study literature The essays in this collection presume that the popular is here to stay and that its instructive implications are not merely noteworthy but richly nuanced and deeply compelling They address a broad variety of issues concerning canonicity literature genre and the classroom as its contributors teach everything from Stephen King and Lady Gaga to nineteenth century dime novels and the 1852 best seller *Uncle Tom's Cabin* It is no secret that teaching popular texts fuels controversies about the value of cultural studies the alleged relaxation of aesthetic standards and the possible dumbing down of Americans By implicitly and explicitly addressing such contentious issues these essays invite a broader conversation about the place of the popular not only in higher education but in the reading lives of all Americans

Dancing on the Color Line Gretchen Martin, 2015-12-09 The extensive influence of the creative traditions derived from slave culture particularly black folklore in the work of nineteenth and twentieth century black authors such as Ralph Ellison and Toni Morrison has become a hallmark of African American scholarship Yet similar inquiries regarding white authors adopting black aesthetic techniques have been largely overlooked Gretchen Martin examines representative nineteenth century works to explore the influence of black authored or narrated works on well known white authored texts particularly the impact of black oral culture evident by subversive trickster figures in John Pendleton Kennedy's *Swallow Barn* Harriet Beecher Stowe's *Uncle Tom's Cabin* Herman Melville's *Benito Cereno* Joel Chandler Harris's short stories as

well as Mark Twain's *Adventures of Huckleberry Finn* and Pudd'nhead Wilson. As Martin indicates, such white authors show themselves to be savvy observers of the many trickster traditions, and indeed a wide range of texts suggest stylistic and aesthetic influences representative of the artistry, subversive wisdom, and subtle humor in these black figures of ridicule, resistance, and repudiation. The black characters created by these white authors are often dismissed as little more than limited, demeaning stereotypes of the minstrel tradition, yet by teasing out important distinctions between the wisdom and humor signified by trickery rather than minstrelsy, Martin probes an overlooked aspect of the nineteenth-century American literary canon and reveals the extensive influence of black aesthetics on some of the most highly regarded work by white American authors.

Eco-Thoughts Anna Lisa Tota, 2024-10-08 What if the pollution of the world did not only concern the environment in which we live but also the flow of our thoughts in every moment of everyday life? What if those thoughts, invasive like locusts, could transform and become eco thoughts that make us and others feel good? Ecology concerns us from the inside; it passes through us and literally shapes us: what is inside is outside. This book offers eco words and eco thoughts as it sheds light on the traps that our minds construct for ourselves that we so often fall into, whether we mean to or not. It examines the erroneous paths that we sometimes meander down while we are thinking in our everyday lives in order to help us to identify and avoid them. The thoughts we formulate are not really ours, as if our mind prefers to flow in what has already been thought, lived, and felt. The author offers her reflections and insights to those who wish to direct their minds towards streams of thought that really do belong to us, that make us feel good. In order to do this, we must learn how to disable the traps and free ourselves of what is contaminating before they take hold and harm us. An original and thought-provoking examination of how our own internal lives can become toxic and how to prevent this, that will be of particular value to students and scholars of sociology, philosophy, communication studies, memory studies, and social psychology.

A Rosetta Key for U.S. History Michael A. Susko, 2023-12-21 This work explores a generational history from America's Colonial period to the United States of contemporary times. A novel historical approach will rely on generational markers every 15th year rather than yearly astronomical dates. This method will make history more accessible and its patterns more apparent. Identified from cultures presented in an earlier volume, the phasings are: 1 Invisible Beginnings, 2 Establishment and Testing, 3 Novel Consolidation and Opening Up, 4 Crisis and Creativity, 5 Empire and Inclusion, and 6 Rigidification or Renewal. This history does not seek to hide or obscure the shadow side of America, nor does it fail to present beauty and light, especially during the 30s generational phase. One discovery prompted by this generational time chart was to more fully consider the importance of New Spain in understanding U.S. history. A second and related theme is inclusion of the Indigenous, whose influence extends to all phases of American history. Come journey with us and experience historical events and people's lives generation by generation and see how they fit into historical phases. Such an awareness, the author contends, will help us to make the generational choice of our times.

Generational Key to History Michael A. Susko, 2025-01-17
Generational Key to History Tracing Phases From Ancient Egypt to America This work reveals how generations form the hidden rhythm of history By charting time in 15 year generational intervals an approach first used by the medieval historian Bede and later championed by the twentieth century philosopher Jos Ortega y Gasset the author uncovers distinct phases that recur across civilizations Rather than relying solely on yearly dating which can fragment historical awareness this generational lens exposes history s deeper coherence The phases found are 1 Beginnings and testing 0 15 generations 2 Establishment and unifying image beginning at 15 20 generations 3 Consolidation and opening up 30 generations 4 Crisis and creativity 40 generations 5 Universalization and inclusion 50 generations and 6 Renewal or rigidification 60 generations Through detailed case studies Egypt Israel Judah Rome the Medieval Modern era and the United States the author shows how each culture moves through these generational arcs revealing a pattern that mirrors the human life cycle The 30th generation often neglected by historians emerges as a pivotal phase of openness justice and illumination In sum A Rosetta Key for History does not merely present a new way to measure time it reveals the living architecture of history itself Across continents and centuries generations become the Rosetta key for understanding time s unfolding design Publications of the Modern Language Association of America, 2006
