Ecology and Restoration of Northern California Coastal Dunes Andrea J. Pickart, John Orvel Sawyer, 1998 Restoration of Coastal Dunes Luisa M Martínez, Juan B. Gallego-Fernández, Patrick A. Hesp, 2013-01-30 The continuously growing human population along the world's coasts will exacerbate the impact of human activities on all coastal environments Restoration activities will therefore become increasingly important In particular sandy shores and coastal dunes will require significant restoration efforts because they are preferred sites for human settlement industrial and urban development and tourism With this book experts in the field present a comprehensive review of restoration studies and activities where successful and failed studies or approaches from around the world are contrasted and compared A major asset the book provides is a compendium of studies showing that coastal dune restoration has many definitions and thus leads to many different actions This volume addresses those with an interest in conservation ecology and biology coastal dune dynamics and geomorphology and coastal management who are seeking information on the different strategies for coastal dune restoration applied in different regions of the world Finally it will be a valuable resource for coastal scientists and planners as well as for local and state officials residents of coastal communities environmental advocates and developers *Coastal Dunes* M. L. Martínez, Norbert P. Psuty, 2007-09-14 Coastal dunes occur in almost every latitude from tropical to polar and have been substantially altered by human activities Many are already severely and irreversibly degraded Although these ecosystems have been studied for a long time as early as 1835 there has been a strong emphasis on the mid latitude dune systems and a lack of attention given to the tropics where unfortunately much of the modern exploitation and coastal development for tourism is occurring This book brings together coastal dune specialists from tropical and temperate latitudes which together cover a wide set of topics including geomorphology community dynamics ecophysiology biotic interactions and environmental problems and conservation A major product of this book is a set of recommendations for future research identifying relevant topics where detailed knowledge is still lacking It also identifies management tools that will promote and maintain the rich diversity of the dune environments in the context of continuing coastal development **Terrestrial Vegetation of California, 3rd Edition** Michael Barbour, Todd Keeler-Wolf, Allan A.
