The Politics of Unsustainability Ingolfur Bluhdorn,Ian Welsh,2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of *Environmental Politics*

Toxic Sexual Politics

Melina Packer, 2025-01-28 A bold exposé of how the very foundation of toxicology has been contaminated by sexist and racist ideologies. The first critical understanding of the field of toxicology from a feminist and antiracist perspective, *Toxic Sexual Politics* asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines. Drawing upon in-depth interviews and extensive ethnographic and archival research, including participant observations in toxicology classrooms, conferences, and laboratories, Melina Packer urges environmental health advocates to place toxicant science within its masculinist, militarist, and eugenicist history. *Toxic Sexual Politics* shows how the founding fathers of U.S. toxicology were ideologically aligned with the chemical industry, inventing a science that could make chemicals safe as opposed to one that could adequately protect planetary health from toxicants' hazards. While many toxicologists today are critical of the chemical industry, they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity, as do government regulators, the courts, and environmental advocates. Unlike most critiques of the chemical industry and narratives of environmental health movements, *Toxic Sexual Politics* refuses to take the science at face value. By focusing on the sexist, racist, and ableist biases reinforced by toxicology, Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place. The field of toxicology can explicitly confront chemical corporate power by building from queer feminist, anti-ableist, and antiracist movements for environmental and reproductive justice. *Global Visions* Jeremy

Brecher, John Brown Childs, Jill Cutler, 1993 The authors provide both a realistic assessment of the contemporary efforts to perpetuate imperial domination and the various visions and strategies that could knit together global popular struggles into a vibrant democratic transnational movement for a humane and ecologically balanced world. **Animals, Justice, and the**

Politics of Violence Sezai Ozan Zeybek, 2025-09-26 This book explores the intricate relationship between humans and animals in the context of modern Turkish history. From drafted animals in war to urban stray dogs and the role of cattle in the Kurdish conflict, the cases developed in this book show how animal lives are deeply entangled with human affairs, including complex social organisations such as families, states, and nations. In doing so, the book exposes power dynamics, exploitative practices, and the discursive regimes that underpin development, nationalism, and urban growth. This important book offers a timely exploration of human-animal relations, critically revising a number of concepts such as human rights, productivity, health, and efficiency from a multispecies perspective. *The Routledge Companion to Photography Theory* Mark

Durden, Jane Tormey, 2019-11-07 With newly commissioned essays by some of the leading writers on photography today, this companion tackles some of the most pressing questions about photography theory's direction, relevance, and purpose. This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory. Having assimilated the histories of semiotic analysis and post-structural theory, critiques of representation continue to move away from the notion of original and copy and towards

materiality process and the interdisciplinary The implications of what it means to see an image is now understood to encompass not only the optical but the conceptual ethical and haptic experience of encountering an image The fractal is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to photographs and lend nuances to what essentially underlies any photography theory that is the relationship of the image to the real world and how we conceive what that means Diverse in its scope and themes The Routledge Companion to Photography Theory is an indispensable collection of essays and interviews for students researchers and teachers The volume also features extensive images including beautiful colour plates of key photographs **New Earth Politics** Simon Nicholson, Sikina Jinnah, 2016-03-04 Prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field's deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs included are reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action The Corporate Planet Joshua Karliner, 1997 Citing case histories such as Chevron Shell and Mitsubishi CORPORATE WATCH editor Joshua Karliner brilliantly exposes how transnationals aided by free trade agreements World Bank policies and massive consumer campaigns play central roles in environmental destruction This important and timely book is a significant contribution to the battle against irresponsible corporate behavior
