policies of poverty reduction Despite this the crisis has only deepened in the first years of the new millennium This brilliant group of contributions assesses why this has occurred In plain language it considers why debt relief has been so long in coming for poor countries It evaluates the cost of a persistent overhang in debt for those countries It also examines head on whether enhanced debt relief initiatives offer a permanent exit from over indebtedness or are merely a short term respite Above all this volume for the first time addresses the issues on the ground that is the views and opinions about debt relief on the part of leaders in advanced nations and the probability of further support for the most impoverished lands In this approach the editors and contributors have made an explicit and successful attempt to be inclusive and relevant at all stages of the analysis This volume covers the full range of the poorest countries with contributions by John Serieux Lykke Anderson and Osvaldo Nina Befekadu Degefe Ligia Maria Castro Monge and Peter B Mijumbi Collectively they offer a sobering scenario unless measures are put in place now in anticipation of further crises the future of the very poorest nations will remain bleak and troublesome

*The Politics of Poverty Reduction* Paul Mosley,2012-03-29 Globally there is a commitment to eliminate poverty and yet the politics that have caused anti poverty policies to succeed in some countries and to fail in others have been little studied The Politics of Poverty Reduction focuses on these political processes Analysis is based partly on global comparisons and partly on case studies of nine countries that span the developing world Where governments are politically weak they need to make alliances with other groups to stay in power and where these have been with low income groups the result may be a lasting and effective pro poor strategy Often pro poor policies have been brought in not with progressive intentions but out of fear that the state will fall apart unless pro poor elements are incorporated into government and the most effective regimes in reducing poverty have seldom been the kindest and most benevolent The ability to provide the poor with access to key markets and in particular labour and capital is crucial and this in turn requires fiscal strength Two crucial elements in the story are the ability to frame labour intensive policies given that labour is often the only thing that poor people are able to sell and the design of effective tax and expenditure policies Aid donors can make a key contribution partly through reinforcing recipients fiscal capacity but much more through providing technical support of the right kind
