The Concept and Method of Cultural Ecology Julian Haynes Steward, 1969      *Ecology, Culture, and Change* Veena Bhasin, 1989 Sikkim has a population of 3 16 355 people 1981 census and an area of 4276 Sq Kms Despite its small area much ethnic linguistic and cultural diversity is exhibited Very few studies on the diverse tribal culture were undertaken in the eighteenth and early nineteenth century No anthropological studies have been undertaken on Sikkim since its integration with India This work prepared under Man and Biosphere Programme of UNESCO is a significant contribution to the knowledge of this little known part of the mountain world In the present book Dr Veena Bhasin who carried out field work during 1981 to 1983 in North Sikkim records the complex patterns of the two diverse culture of the Lepchas and the Bhutias of North Sikkim A micro approach has been used to explore indepth the myriad aspects of life at Dzongu reserve habited by Pepaches and Lachen and Lachung valleys habited by Bhutias The Social organisation religious beliefs economic structure and social control have been described in detail      **Human Ecology and Climate Change** David Lawrence

**From Energetics to Ecosystems: The Dynamics and Structure of Ecological Systems** N. Rooney, K.S. McCann, D.L.G. Noakes, 2006-12-02 Ecosystems are complex and enigmatic entities that are ultimately our life support systems Understanding these systems to the point of being able to predict their behaviour in the face of perturbations requires that researchers adopt a number of strategies that vary in both approach and scale This book in a sense is representative of some of the developments that have unfolded when math and physics met ecology Here some of the world s leading ecologists examine ecosystems from theoretical experimental and empirical viewpoints from energetics to ecosystems The book begins with simplifying and synthesizing nature s complex relationships It then moves on to explore the mapping between food web structure and function and ends with the role of theory in integrating different research areas From the breadth of systems analyzed to the rigor of approaches taken this book is not only a useful resource for students and researchers in ecology but serves as a fitting tribute to the life and work of Peter Yodzis      Ecology, Sustainable Development and Accounting Seleshi Sisaye, 2015-08-11 Accounting literature has viewed sustainability in terms of social economic and environmental performances There have been concerns that the relationship between sustainability accounting and organizational performance cannot be explained unless we can deduce patterns of administrative behaviour that chronicle management practices Ecology Sustainable Development and Accounting argues that despite the broader social and economic development dimensions of sustainability and the limitations of its extension to corporate and organizational behaviour an ecological framework is capable of providing the overall societal and community chronologies that describe corporate sustainable operations Drawing examples from international development and federal government organizations this book documents the link between ecology corporate sustainable development and sustainability accounting and

reporting It draws together the literature from several disciplines to elaborate the contribution of the ecological approach to sustainable development in the accounting literature This book will be of particular interest to students academics and practitioners in the areas of environmental studies ecological economics sustainable development studies and social and environmental accounting The sociological and anthropological perspectives make this book the first of its kind to apply the population ecology of sociology to both the sustainability and accounting literature

**Ecological Planning** Forster Ndubisi, 2003-04-30 Chosen by Choice Magazine as an Outstanding Academic Title for 2003 Ecological planning is the process of understanding evaluating and providing options for the use of landscape to ensure a better fit with human habitation In this ambitious analysis Forster Ndubisi provides a succinct historical and comparative account of the various approaches to this process He then reveals how each of these approaches offers different and uniquely useful perspectives for understanding the dialogue between human and environmental processes Ndubisi begins by examining the philosophies behind and major contributors to ecological thinking during the past 150 years as well as the paradigm shift in planning that occurred in recent decades as a result of a growing global ecological awareness He then turns to landscape suitability analysis and discusses alternative approaches to ecological planning such as applied human ecology applied landscape ecology and others Finally he offers a comparative synthesis of the approaches in order to reveal the theoretical and methodological assumptions inherent when planners choose one approach over the other Ndubisi concludes that no one approach can by itself adequately address the whole spectrum of ecological planning issues For this reason he offers guidance as to when it may be appropriate for landscape architects and planners to emphasize one approach rather than another

Transforming Ethnohistories Sebastian Felix Braun, 2013-08-26 Anthropologists need history to understand how the past has shaped the present Historians need anthropology to help them interpret the past Where anthropologists and historians needs intersect is ethnohistory The contributors to this volume have been inspired in large part by the teaching and writing of distinguished ethnohistorian Raymond J DeMallie whose exemplary combination of ethnographic and archival research demonstrates the ways anthropology and history can work together to create an understanding of the past and the present Transforming Ethnohistories comprises ten new avenues of ethnohistorical research ranging in topic from fiddling performances to environmental disturbance and spanning places from North Carolina to the Yukon The authors seek to understand communities by finding and interpreting their stories in a variety of different texts some of which lie outside academic understanding and research methodology It is exactly those stories conventionally labeled myths or oral tradition that ethnohistorians demand we pay attention to Although historians cannot see or talk to their informants as anthropologists do both anthropologists and historians can listen to oral histories and written documents for the essential stories they contain The essays assembled here use DeMallie s approach to contribute to the history and anthropology of Native North America and address issues of literary criticism and contexts sociolinguistics performance theory identity and historical change historical and anthropological methods and theory and the interpretation of histories cultures and stories Debates over the legitimacy of ethnohistory as a specialization have led some scholars to declare its decline This volume shows ethnohistory to

be alive and well and continuing to attract young scholars      Political Ecology Across Spaces, Scales, and Social Groups Susan Paulson, Lisa L. Gezon, 2005 Environmental issues have become increasingly prominent in local struggles national debates and international policies In response scholars are paying more attention to conventional politics and to more broadly defined relations of power and difference in the interactions between human groups and their biophysical environments Such issues are at the heart of the relatively new interdisciplinary field of political ecology forged at the intersection of political economy and cultural ecology This volume provides a toolkit of vital concepts and a set of research models and analytic frameworks for researchers at all levels The two opening chapters trace rich traditions of thought and practice that inform current approaches to political ecology They point to the entangled relationship between humans politics economies and environments at the dawn of the twenty first century and address challenges that scholars face in navigating the blurring boundaries among relevant fields of enquiry The twelve case studies that follow demonstrate ways that culture and politics serve to mediate human environmental relationships in specific ecological and geographical contexts Taken together they describe uses of and conflicts over resources including land water soil trees biodiversity money knowledge and information they exemplify wide ranging ecological settings including deserts coasts rainforests high mountains and modern cities and they explore sites located around the world from Canada to Tonga and cyberspace      Nature and Culture Sarah Pilgrim, Jules N. Pretty, 2010 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity      **Introducing Cultural Anthropology** Brian M. **Mountains** Dane Kennedy, 2023-11-10 Perched among peaks that loom over heat shimmering plains hill stations remain among the most curious monuments to the British colonial presence in India In this engaging and meticulously researched study Dane Kennedy explores the development and history of the hill stations of the raj He shows that these cloud enshrouded havens were sites of both refuge and surveillance for British expatriates sanctuaries from the harsh climate as well as an alien culture artificial environments where colonial rulers could nurture educate and reproduce themselves commanding heights from which orders could be issued with an Olympian authority Kennedy charts the symbolic and sociopolitical functions of the hill stations over the course of the nineteenth and early twentieth centuries arguing that these highland communities became much more significant to the British colonial government than mere places for rest and play Particularly after the revolt of 1857 they became headquarters for colonial political and military authorities In addition the hill stations provided employment to countless Indians who worked as porters merchants government clerks domestics and carpenters The isolation of British authorities at the hill stations reflected the paradoxical character of the British raj itself Kennedy argues While attempting to control its subjects it remained aloof from Indian society Ironically as more Indians were drawn to these mountain areas for work and later for vacation the carefully guarded boundaries between the British and their subjects eroded Kennedy argues that after the turn of the century the hill stations were increasingly incorporated into the landscape of Indian social and cultural life This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1996 **The Ecology of Power** Michael Heckenberger, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company
