## **Economic Futures On The North Atlantic Margin:**

Economic Futures on the North Atlantic Margin Reginald Byron, 1995 This are the proceedings of the 12th seminar of marginal regions They attempt to look into the future and to assess the probable consequences of economic development s being implemented by four countries neighbouring on the North Atlantic Britain Ireland Norway and Canada The hinterlands of these countries sparsely populated and heavily dependent on primary production fishing farming forestry and mineral extraction are threatened with the loss of their capacity to maintain their populations sparse as they are already as heavy industries retrench agricultural subsidies are scaled down fishing grounds are depleted and the end of the Cold War brings about the closure of military installations in remote areas

## **Sustainable Development of the North Atlantic Margin**

Reginald Byron, James Walsh, Proinnsias Breathnach, 2019-01-22 First published in 1997 this timely collection of papers takes an interdisciplinary approach to examining sustainable development in a wide range of countries such as Ireland Norway and Wales on the North Atlantic Margin It features specialists in geography social anthropology tourism sociology regional studies business municipality studies health policy and the rural economy The contributors argue that a free marketplace and natural resource sustainability are not always incompatible for green policies to be successful

*Revival: Community Development on the North Atlantic Margin (2001)* John Hutson, Reginald Byron, 2017-07-12 This title was first published in 2001 Isolated communities dependent upon fishing farming and forestry which are scattered around the North Atlantic coast have shared a disastrous decline during the last decade These communities are in the peripheries of advanced industrial nation states such as Canada and supra national alliances such as the European Community yet despite this there are no easy solutions to the development of these regions This volume argues that the productive assets of these regions and how they can be used to sustain household incomes need to be better understood The assets need to be converted into products and services and they need to be marketed profitably The diminishing flow of young people who leave these areas to obtain higher education and who do not return must be turned around and efforts must be concentrated on the creation or strengthening of economic conditions which satisfy the younger generation s employment aspirations consumer requirements and social needs

**Local Enterprise on the North Atlantic Margin** Reginald Byron, John Hutson, 2018-12-18 First published in 1999 this volume offers contrasting views from a variety of academic disciplines including agriculture anthropology economics geography management studies planning and sociology which focus on the single two fold problem of how to understand these issues and what practically might be done about them

*Regulation and Compliance in the Atlantic Fisheries* Stig S. Gezelius, 2012-12-06 This is a book about fishermen s reasons for obeying fisheries law The fish harvesting industry has become subject to state interference to an increasing extent over the past twenty years As natural resources become scarce and subsequent fisheries regulations abound the question of law abidingness is brought to the public agenda However there is still little empirical data as regards the dynamics of compliance in this field and this book aims to meet a demand for in

depth knowledge The cases studied can be regarded as instances of economies dependent on the harvesting of natural resources for both household and the market and the study aims to contribute to the building of more adequate theory on the dynamics of compliance in such economies However focusing on a specific type of setting seldom constitutes a safe escape route for getting away from more pervasive sociological questions and it certainly does not in this case As any attempt to explain social phenomena this study is faced with the fundamental sociological question of how the acts of individuals can best be understood The question concerns the interface between the individual and the collectivity between collective morality and self interest It thus deals with classical sociological issues such as the nature and regulatory capacity of group norms and sanctions and the forms and roles of rationality and strategic action
