**Handbook of Research on Ethical Challenges in Higher Education Leadership and Administration** Wang, Viktor, 2020-04-03 Higher education institutions

are more so than other organizations deeply complex and they present a unique challenge to their leaders and administrators. The unique complexities of higher education call for governance founded on thoughtful consideration of leadership practices, theory and styles that reflect the values of the institution and its mission. Embedded in a rapidly changing society, the future of higher education leadership and administration is necessarily dynamic and demands a strong ethical core to guide research, knowledge production and organizational behavior. *The Handbook of Research on Ethical Challenges in Higher Education Leadership and Administration* is a cutting edge research publication that examines leadership ethics that higher education institutions must employ to be proactive, visionary and ethically sound. The publication covers the importance of leadership ethics in higher education as well as the foundation for developing frameworks in which to ground the presence of leadership ethics in higher education. Featuring a wide range of topics such as distance education, free speech and leadership, this book is ideal for librarians, academicians, administrators, researchers, education professionals, policymakers and students.

**Economics of Higher Education** Robert K. Toutkoushian, Michael B. Paulsen, 2016-03-18. This book examines the many ways in which economic concepts, theories and models can be used to examine issues in higher education. The topics explored in the book include how students make college-going decisions, the payoffs to students and society from going to college, markets for higher education services, demand and supply in markets for higher education, why and how state and federal governments intervene in higher education markets, college and university revenues and expenditures, how institutions use net pricing strategies and non-price product differentiation strategies to pursue their goals and to compete in higher education markets as well as issues related to faculty labor markets. The book is written for both economists and non-economists who study higher education issues and provides readers with background information and thorough explanations and illustrations of key economic concepts. In addition to reviewing the contributions economists have made to the study of higher education, it also examines recent research in each of the major topical areas. The book is policy focused and each chapter analyses how contemporary higher education policies affect the behaviour of students, faculty and/or institutions of higher education. Toutkoushian and Paulsen attempted a daunting task to write a book on the economics of higher education for non-economists that is also useful to economists. A book that could be used for reference and as a textbook for higher education classes in economics, finance and policy. They accomplish this tough balancing act with stunning success in a large volume that will serve as the go-to place for anyone interested in the history and current thinking on the economics of higher education. William E. Becker Jr, Professor Emeritus of Economics, Indiana University.

**The Economic Institutions of Higher Education** J. Patrick Raines, Charles G. Leathers, 2003-01-01. Working within the context of the evolutionary institutional transformation of higher education, the authors trace the development of an economic model by which the behavioral tendencies of modern universities can be evaluated. That model is expanded to provide insights to the following questions: Why do universities compete and how do they develop and implement their competitive strategies? How do

universities make critical institutional decisions about operational missions academic policies and internal resource allocation Do universities efficiently and effectively pursue the special social functions assigned to them Patrick Raines and Charles Leathers present an integrated coherent theory to explain the behavior of universities and provide a realistic economic model that predicts how universities allocate their scarce educational resources This alternative view is contrasted with the mainstream explanations of university behavior based on the maximization of student welfare or faculty influences The authors extend the existing literature on the operation of universities by presenting a history of the evolution of the modern entrepreneurial universities as well as an explanation of academic capitalism This absorbing volume will appeal to anyone interested in the history of economic thought or the history of education Scholars of Veblen Smith and Malthus will be fascinated by their individual and comparative theories of the purpose and failures of higher education

**Meeting Economic and Social Challenges** Western Interstate Commission for Higher Education,1992 The project has been an examination of the broad relationship between higher education and the economy and the ways in which higher education in the WICHE states must change in order to be more responsive to the needs of the region in the 1990s and beyond

*Higher Education: Handbook of Theory and Research* J.C. Smart,2012-12-06 To recapitulate Greeks differ from Independents and from the academy s value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy s value priorities i e students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system s effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy s agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy s educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy s agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks
