## **Economic Justice The Market Socialist Vision:**

Economic Justice James A. Yunker, 1997 This volume thoroughly examines the case for democratic market socialism in light of both the real world and intellectual history of socialism James Yunker provides a clear and jargon free account of this highly controversial issue Covering the history of the market socialist idea from the precursors of Oskar Lange to the present Yunker examines the subject not only in terms of formal economic theory but in the context of the actual history of communistic socialism as practiced in the U S S R Eastern Europe the P R C and elsewhere The book s historical content and readability will make it of great interest not only to economists and historians of socialism but to any reader seeking to learn more about the place of market socialism in history and its potential for future application On the Political Economy of

Market Socialism James A. Yunker, 2018-05-08 This title was first published in 2001 Spanning a quarter of a century this collection makes conveniently accessible 14 of Yunker s thorough and highly illuminating contributions to the literature on market socialism **Explorations and Proposals toward Market Socialism and World Government** James A.

Yunker, 2022-09-26 This book blends real world history intellectual history and personal history into a compelling case for a new way of thinking about such highly controversial and highly misunderstood concepts as market socialism a Global Marshall Plan and world government It argues that if properly designed according to clear and specific blueprints all three of these possibilities would indeed greatly benefit humanity if they were fully implemented The book puts a human face on these proposals by documenting their origin and development through a detailed account of the author s professional efforts over a long and productive academic career This story of steadfast determination in the face of steep odds will resonate deeply with every person who has nourished a vision that is commonly dismissed as excessively idealistic and unrealistic

**The Grand Convergence** J. Yunker, 2010-09-13 This book describes evaluates and advocates for sweeping changes in our global economic and political structure to ensure the prospects of global human civilization as we confront an uncertain future It argues both for the Marshall Plan and for a limited federal world government to replace the quasi anarchic international regime of today **Beyond Global Governance** James A. Yunker, 2014-05-05 In these ground breaking essays

James A Yunker issues a powerful challenge to conventional thinking on world government Based on an innovative plan for a limited world government tentatively designated the Federal Union of Democratic Nations this book envisions a legitimate world government a quantum leap beyond the United Nations of today The Federal Union proposed would operate under some key restraints such as a dual voting system in the world legislature and two key reserved rights of the member nations to withdraw from the Federal Union at their own unilateral discretion and to maintain independent control over whatever military forces they feel are necessary to their national security Yunker demonstrates how these restraints would minimize the possibility that the world government would result in such adverse outcomes as global tyranny bureaucratic overload or cultural homogenization **Alternative Political Economy Models of Transition** John Marangos, 2017-07-05 The collapse

of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition

**The Road from Empire to Eco-Democracy** Gene Marshall, Gene Marshall Et Al,2011-12 An examination of Social Awakening History Long Vision Holistic Social Understanding Strategies of Transformation Though vast changes are necessary we believe humanity can find a vision and plan of action that is both satisfying and realistic Our aim is to fertilize the fruitful imagination and courage it will require to walk this Road to Eco Democracy This book is not about making piecemeal repairs on understandable problems It is about contributing to a massive social transition that we will never fully understand in our lifetimes We who call ourselves progressives tend to each be doing our own good things but in the main we lack a comprehensive overview of how we exit the deathtrap into which humanity has cornered itself and how we construct a social vehicle within which humanity can survive and thrive We see the fully progressive vision as an intimation of a much better future but also as a fight against a set of illusions that characterize our age Our fight is against a set of lies that are given sacred standing in the hearts and minds and commitments of most people resulting in a set of compulsions that enslave rich and poor alike It is a fight against a matrix of malice toward realism toward real people toward the real Earth a malice that sickens the whole of humanity and undermines the wider community of Earth life Publisher s description
