Economics Of Business Decision Making Pb:

Competition, Diversity and Economic Performance C. A. Tisdell, 2013-02-01 Ecological and economic systems share some fundamental characteristics that Clem Tisdell has beautifully illuminated. He has given us a much better handle on the roles of competition, diversity, evolution, and sustainability in complex interdependent ecological and economic systems. Our ability to build a sustainable and desirable future fundamentally depends on this integrated understanding. Robert Costanza, Portland State University, US. This thought-provoking book explores the influences of market competition and diverse behaviours of economic agents on economic performance, particularly dynamic economic performance. Clem Tisdell illustrates within evolutionary, dynamic, and static contexts how diversity can improve or impede economic performance. He addresses the fact the role of diversity in improving economic performance has been neglected by economic theorists by making economic diversity a focal point of economic analysis. In particular, special attention is given to the value of economic diversity and economic imperfections in improving the performance of economic processes in particular identified situations. Limitations of using market-like mechanisms for managing public bodies and business firms are discussed, and the value of business cooperation, economic mutualism, as a means for improving economic performance is examined. It is also observed that as economies develop, different forms of economic competition and business cooperation evolve. Challenging yet accessible, this book will prove a stimulating read for academics and students in the fields of economics, industrial organization, and business and management.

As problems become increasingly complex and wicked, conventional reductive approaches and data-based solutions are limited. The authors argue that practical wisdom is required. This book provides an integral and practical model for incorporating wisdom into management decision making. Based on a cross-disciplinary conceptualization of practical wisdom, the authors distinguish systematically between data, information, knowledge, and wisdom-based decision making. While they suggest that data analytics, information, and knowledge can assist decision makers to better deal with complex and wicked problems, they argue that data-based systems cannot replace optimized human

decision making capabilities These capabilities the authors explain include a range of qualities and characteristics inherent in philosophical psychological and organizational conceptions of practical wisdom Accordingly in this book the authors introduce a model that identifies the specific qualities and processes involved in making wise decisions especially in management The model is based on the empirical findings of the authors studies in the areas of wisdom and management This book is a practical resource for professionals practitioners and consultants in both the private and public sectors The theoretical discussions critical arguments and practical guidelines provided in the book will be extremely valuable to students at the undergraduate and postgraduate levels as well as upper level postdoctoral researchers looking at business management strategies
