**Linguistic Reconstruction** Anthony Fox,1995 How and why are languages constantly changing Historical linguistics seeks to find out by going beyond the history of individual languages to discover the general principles which underlie language change But our evidence is severely limited Most of the world s languages are still unwritten and even in areas with long written traditions such as Europe and the Near East documentary evidence stretches only a little way back along the path of the historical development of languages How then can we uncover our long linguistic prehistory and what can it tell us about language change This new textbook is an accessible general guide for students with an elementary knowledge of linguistics to the methods and theoretical bases of linguistic reconstruction and of newer less well established principles such as the application of linguistic universals and language typology and quantitative techniques Finally he reviews the principles for establishing language relationships and for uncovering information about the homelands and cultures of the prehistoric speakers of reconstructed languages    [The Comparative Method](#) Reviewed Mark Durie,Malcolm Ross,1996-05-16 Historical reconstruction of languages relies on the comparative method which itself depends on the notion of the regularity of change The regularity of

sound change is the famous Neogrammarian Hypothesis sound change takes place according to laws that admit no exception The comparative method however is not restricted to the consideration of sound change and neither is the assumption of regularity Syntactic morphological and semantic change are all amenable in varying degrees to comparative reconstruction and each type of change is constrained in ways that enable the researcher to distinguish between regular and more irregular changes This volume draws together studies by scholars engaged in historical reconstruction all focussing on the subject of regularity and irregularity in the comparative method A wide range of languages are represented including Chinese

Germanic and Austronesian     *Historical Romance Linguistics* Randall Gess, Deborah Arteaga, 2006-05-03 This volume contains 17 studies on historical Romance linguistics within a variety of current theoretical frameworks it includes studies on phonology morphology and syntax focusing solely or comparatively on all five major Romance languages French Italian Portuguese Romanian and Spanish An introduction by the eminent Romance Linguist Jürgen Klausenburger addresses the fit of these studies in the overall development of the field of historical Romance linguistics since the 19th century The studies in this volume demonstrate an organic link between Malkiel's 1961 classic definition of Romance linguistics and the field of Romance linguistics today because just as scholars of the field in the 19th century successfully applied the dominant paradigm of historical linguistics of their time Neogrammarian theory so do the authors contained in the present volume avail themselves of current linguistic advances to achieve equally significant results     **Rethinking Languages in Contact**
