**Potsdamer Platz** Joachim Fischer, Michael Makropoulos, 2004 Sp testens mit seiner spektakulären Neubebauung ist der Potsdamer Platz in Berlin vollends zum geschichtlichen gegenwärtigen und zukünftigen Ort einer realen wie imaginären Topologie der Moderne geworden Der Band verfolgt ein Gedankenexperiment Dieses sozio kulturelle Artefakt das wie kaum ein anderes verdichtete Urbanität verkörpert und deshalb exemplarischen Rang für die Polyvalenz der Moderne hat aus verschiedenen theoretischen Perspektiven heraus zu erschließen Die Komposition der Beiträge Rational Choice Theorie Kritische Theorie Cultural Studies Systemtheorie Gender Studies Diskursanalyse und Philosophische Anthropologie hat zwei Ziele die über einen bloßen Theorienvergleich hinausgehen Die polyperspektivische Deutung soll zum einen an einem gemeinsamen Gegenstand Modernität je verschieden sehen lassen Zum anderen geht es darum die voneinander isolierten Theorieperspektiven an einem Fall als differente Theorien der Moderne zu bewähren Visual Culture in Twentieth-century Germany Gail Finney, 2006 Visual Culture in Twentieth Century Germany explores a wide spectrum of visual media in 20th century Germany in their critical and social contexts Contributors examine film photography cabaret performances advertising architecture painting dance television and cartography **Berlin - The Symphony Continues** Carol Anne Costabile-Heming, Rachel J. Halverson, Kristie A. Foell, 2013-02-18 The sudden fall of the Berlin Wall is one of the defining images of the late twentieth century The subsequent unification of Germany and the decision to return Berlin to its status as capital has made the constant changes within the city a matter of public interest It also offered Berlin the opportunity to create a new image for itself one that can serve as a counterbalance to the politically charged recent history of Berlin as the capital of Nazi Germany and former East Berlin as the capital of the German Democratic Republic Poised between capitalist Western Europe and the former communist powers in Eastern Europe Berlin occupies a fascinating geopolitical space This anthology presents a unique glimpse into the various constituencies that make up Berlin and that impact the city's challenges and promises *Ein Stück Großstadt als Experiment* Vittorio Magnago Lampugnani, Romana Schneider, 1994 Building the State: Architecture, Politics, and State Formation in Postwar Central Europe Virag Molnar, 2013-10-08 The built environment of former socialist countries is often deemed uniform and drab an apt reflection of a repressive regime Building the State peeks behind the grey facade to reveal a colourful struggle over competing meanings of the nation Europe modernity and the past in a divided continent Examining how social change is closely intertwined with transformations of the built environment this volume focuses on the relationship between architecture and state politics in postwar Central Europe using examples from Hungary and Germany Built around four case studies the book traces how architecture was politically mobilized in the service of social change first in socialist modernization programs and then in the postsocialist transition Building the State does not only offer a comprehensive survey of the diverse political uses of architecture in postwar Central Europe but is the first book to explore how transformations of the built environment can offer a lens into broader processes

of state formation and social change      The Limits Of Globalization Alan Scott,2013-01-11 Both the force and the limitations of the globalizing forces operating in the world today can best be understood through an analysis of their concrete manifestations Using examples from the people s art of Potsdammer Platz to the ways in which Western cultural icons are reinterpreted in Asian magazines this collection of essays unpicks the rhetoric of globalization in political analysis cultural theory and urban and economic sociology and exposes the myth of the global society as in many cases a dangerous exaggeration      *Staging the New Berlin* Claire Colomb,2013-06-17 This book explores the politics of place marketing and the process of urban reinvention in Berlin between 1989 and 2011 In the context of the dramatic socio economic restructuring processes changes in urban governance and physical transformation of the city following the Fall of the Wall the new Berlin was not only being built physically but staged for visitors and Berliners and marketed to the world through events and image campaigns which featured the iconic architecture of large scale urban redevelopment sites Public private partnerships were set up specifically to market the new Berlin to potential investors tourists Germans and the Berliners themselves The book analyzes the images of the city and the narrative of urban change which were produced over two decades In the 1990s three key sites were turned into icons of the new Berlin the new Postdamer Platz the new government quarter and the redeveloped historical core of the Friedrichstadt Eventually the entire inner city was staged through a series of events which turned construction sites into tourist attractions New sites and spaces gradually became part of the 2000s place marketing imagery and narrative as urban leaders sought to promote the creative city By combining urban political economy and cultural approaches from the disciplines of urban politics geography sociology and planning the book contributes to a better understanding of the interplay between the symbolic politics of representation through place marketing and the politics of urban development and place making in contemporary urban governance      Historical Dictionary of Berlin Ulrike Zitzlsperger,2021-01-21 After World War II Berlin became one of the playgrounds of the Cold War the Berlin Wall made the division between East and West between capitalism and communism in 1961 highly visible though it did remove Berlin from front line politics East and West Berlin had turned into shop windows of ideologies West Berlin representing the lure of a market economy East Berlin the promise of socialism It is then fitting that the fall of the Wall in 1989 awarded Berlin such a prominent role It was here that the development after Reunification of East and West became a closely observed event and well beyond Germany Berlin appeared to represent fundamental developments throughout Europe at the time Today Berlin is the capital of reunified Germany and therefore one of the key political players in the European Union EU and it s now a desirable destination for young entrepreneurs The Historical Dictionary of Berlin contains a chronology an introduction and an extensive bibliography The dictionary section has more than 300 cross referenced entries on important personalities places institutions and events This book is an excellent resource for students researchers and anyone wanting to know more about Berlin      **Avery Index to Architectural Periodicals, 1995** Avery
