**Vermeer's Family Secrets** Benjamin Binstock, 2013-03-07 Johannes Vermeer one of the greatest Dutch painters and for some the single greatest painter of all produced a remarkably small corpus of work In Vermeer s Family Secrets Benjamin Binstock revolutionizes how we think about Vermeer s work and life Vermeer The Sphinx of Delft is famously a mystery in art despite the common claim that little is known of his biography there is actually an abundance of fascinating information about Vermeer s life that Binstock brings to bear on Vermeer s art for the first time he also offers new interpretations of several key documents pertaining to Vermeer that have been misunderstood Lavishly illustrated with more than 180 black and white images and more than sixty color plates the book also includes a remarkable color two page spread that presents the entirety of Vermeer s oeuvre arranged in chronological order in 1/20 scale demonstrating his gradual formal and conceptual development No book on Vermeer has ever done this kind of visual comparison of his complete output Like Poe s purloined letter Vermeer s secrets are sometimes out in the open where everyone can see them Benjamin Binstock shows us where to look Piecing together evidence the tools of art history and his own intuitive skills he gives us for the first time a history of Vermeer s work in light of Vermeer s life On almost every page of Vermeer s Family Secrets there is a perception or an adjustment that rethinks what we know about Vermeer his oeuvre Dutch painting and Western Art Perhaps the most arresting revelation of Vermeer s Family Secrets is the final one in response to inconsistencies in technique materials and artistic level Binstock posits that several of the paintings accepted as canonical works by Vermeer are in fact not by Vermeer at all but by his eldest daughter Maria How he argues this is one of the book s many pleasures

**Images of the Art Museum** Eva-Maria Troelenberg, Melania Savino, 2017-02-06 In recent years the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions To contribute differentiated viewpoints to the currently evolving meta discourse on the museum this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions In this interdisciplinary collection scholars from a variety of academic backgrounds including art history heritage museums studies and architectural history explore a broad range of case studies stretching across the globe The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum including the transformation or adaptation of the image of the art museum across periods and cultures In this context this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale *Studio Secrets* Frederic Taubes, 2013-05-31 Were there paints used by the old masters better than ours today And were their methods superior Is turpentine a good painting medium Why do some paintings darken discolour or crack with age while others do not What varnish should I use to restore the brilliancy of a painting which has grown dull Which is better a sable or a bristle brush These are typical of hundreds of questions which painters and students all over the land are constantly asking Particularly since I started my Question and Answer Department in the Taubes Page in the magazine *AMERICAN ARTIST* have come to realize what a strong interest exists today in all such technical matters This was not always so In fact this present keen attention to sound craftsmanship in painting is most gratifying to those of us who have long worked toward this very goal For far too lengthy a period we might even say for scores of years many painters

were so immersed in the purely aesthetic aspects of their art that they neglected those equally important technical phases which must always be observed if results are to be enduring A gradual awakening has taken place only as one horrible example after another of fading darkening discoloration cracking or like type of failure has come to the fore Even in the recent past there have been those who have treated craftsmanship so lightly that their paintings have already badly deteriorated or are doomed to an early demise Small wonder then that more and more contemporary painters profiting from all this are turning to the investigation of the chemical and physical nature and action of pigments the respective functions of oils varnishes and other media the preparation of grounds the possibilities of underpainting etc My personal feeling has always been that if a painting is worth doing at all it is worth doing well And by well I mean not only aesthetically well but technically well At the very outset of my career I was so impressed by the needless deterioration of thousands of paintings that the mastery of craftsmanship became a consuming passion By good fortune I was able to indulge this passion by studying at first hand the works of those leading exponents of sound craftsmanship the old masters In Paris in Italy in Vienna in the Bauhaus in Weimar under the famous Doerner in Munich for years I was able to gratify my inquisitiveness along technical lines One by one I inspected the great masterpieces of old I compared I analysed I investigated I asked questions I read assiduously everything I could lay my hands on And gradually I arrived at a conviction which decades of subsequent painting and teaching have served only to strengthen that a regeneration of art will be possible only when painters cease to look on technical matters as superficial and return to the sound basic principles long ago established by the old masters
