Einführung in Die Vergleichende Sprachwissenschaft Reinhard Sternemann, Karl Gutschmidt, 1990-01-14

Einführung in die vergleichende Sprachwissenschaft Oswald Szemerényi, 1970 **Methods in Contemporary Linguistics** Andrea Ender, Adrian Leemann, Bernhard Wälchli, 2012-08-31 The present volume is a broad overview of methods and methodologies in linguistics illustrated with examples from concrete research It collects insights gained from a broad range of linguistic sub disciplines ranging from core disciplines to topics in cross linguistic and language internal diversity or to contributions towards language space and society Given its critical and innovative nature the volume is a valuable source for students and researchers of a broad range of linguistic interests *Ancient Greek Dialects and Early Authors* D. Gary Miller, 2013-12-12 Epic is dialectally mixed but Ionic at its core The proper dialect for elegy was Ionic even when composed by Tyrtaeus in Sparta or Theognis in Megara both Doric areas Choral lyric poets represent the major dialect areas Aeolic Sappho Alcaeus Ionic Anacreon Archilochus Simonides and Doric Alcman Ibycus Stesichorus Pindar Most distinctive are the Aeolic poets The rest may have a preference for their own dialect some more than others but in their Lesbian veneer and mixture of Doric and Ionic forms are to some extent dialectally indistinguishable All of the ancient authors use a literary language that is artificial from the point of view of any individual dialect Homer has the most forms that occur in no actual dialect In this volume by means of dialectally and chronologically arranged illustrative texts translated and provided with running commentary some of the early Greek authors are compared against epigraphic records where available from the same period and locality in order to provide an appreciation of the internal history of the Ancient Greek language and its dialects the evolution of the multilectal artificial poetic language that characterizes the main genres of the most ancient Greek literature especially Homer epic with notes on choral lyric and even the literary language of the prose historian Herodotus the formulaic properties of ancient poetry especially epic genres the development of more complex meters colometric structure and poetic conventions and the basis for decisions about text editing and the selection of a manuscript alternant or emendation that was plausibly used by a given author **The Indo-European Syllable** Andrew Byrd, 2015-06-02 In *The Indo European Syllable* Andrew Miles Byrd investigates the process of syllabification within Proto Indo European PIE revealing connections to a number of seemingly unrelated phonological processes in the proto language Drawing from insights in linguistic typology and synchronic theory he makes two significant advances in our understanding of PIE phonology First by analyzing securely reconstructable consonant clusters at word s edge he devises a methodology which allows us to predict which types of consonant clusters could occur word medially in PIE Thus a number of previously disconnected phonological rules can now be understood as being part of a conspiracy motivated by violations in syllable structure Second he uncovers evidence of morphological influence within the syllable created by processes such as quantitative ablaut These advances allow us to view PIE as a synchronic grammar one which can be described by and

contribute to modern linguistic theory The Typology and Dialectology of Romani Yaron Matras, Peter Bakker, Hristo Kyuchukov, 1997-12-11 Contributions to this collection focus on the unity and diversity of the language of the Roma Gypsies the only Indic language spoken exclusively in Europe Properties discussed include the distinct inflectional and derivational patterns applied to Asian and European lexical layers the distribution of inflectional agglutinative and analytic formation among syntactic categories regularities in the ongoing shift from inflectional to analytic case formation suppletion aspects of syntactic convergence and patterns of morphological transitivization and de transitivization causatives and passives These phenomena are considered in the light of contemporary discussions on language universals with reference to a variety of different approaches including Prague School Typology Functional Sentence Perspective Functional Grammar functional pragmatic typology and general grammaticalization theory Chapters partly adopt a comparative approach covering all major dialects of the language and are partly devoted to single dialect corpuses Special attention is given to the Czech Slovak and Hungarian varieties to previously undescribed dialects from Bulgaria and Turkey to codified varieties in Macedonia and to the variety of dialects discussed in the popular works of the Victorian author George Borrow An extensive Introduction outlines the principal morphosyntactic features of the language and provides a classification of Romani dialects including an overview of those mentioned in the volume **Infinitive im R̥gveda: Formen, Funktion, Diachronie** Götz

Keydana, 2013-04-15 Infinitive im R̥gveda is an in depth study of infinitives in Early Vedic the language of the R̥gveda Infinitives in Vedic have been studied from various perspectives This book however is the first to give a detailed account of the full range of the attested morphological syntactic and semantic types Based on insights from formal semantics and syntactic theory the author gives explicit analyses for each type paying special attention to the grammatical functions involved and to the control relations which govern the reference of subjects in infinitive phrases On a more general level the book provides a framework for historical syntax and heuristics for studying syntactic categories in ancient languages Infinitive im R̥gveda wirft einen frischen Blick auf die umstrittene Kategorie Infinitiv im frhen Vedisch der Sprache des R̥gveda Unter Berücksichtigung von Methoden und Erkenntnissen der Syntaxtheorie und der formalen Semantik wird die gesamte Bandbreite der belegten morphologischen Kodierungen der syntaktischen Verwendungen und ihrer Semantik herausgearbeitet und ausführlich dokumentiert *Latin Suffixal Derivatives in English* D. Gary Miller, 2006-07-20 This is the fullest account ever published of Latin suffixes in English It explores the rich variety of English words formed by the addition of one or more Latin suffixes such as -ial -able -ability -ible and -id It traces the histories of over 3 000 words revealing the range of derivational patterns in Indo European Latin and English It describes the different kinds of suffixes shows how they entered English via different channels at different times and considers the complexity of competition between native and borrowed forms The author examines postclassical medieval and early modern Latin derivatives and demonstrates that Latin is still and likely to remain a productive source of English words He traces the suffixes back to their Proto Indo European

origins and provides copious examples for every aspect of his discussion Professor Miller's innovative book makes an important contribution to the history of both English and Latin morphology and etymology as well as to the history of suffixal derivation in Indo-European. It will interest scholars and students of comparative morphology, historical and comparative linguistics, etymology and lexicography.

Word Prosodic Systems in the Languages of Europe Typology of Languages in Europe (Project), 1999 The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages whose analysis may shed new light on long-standing problems in general linguistics.

The Syntax of the Sentence in Old Irish Pádraig MacCoisdealbha, 2012-10-29 Old Irish is the language of Ireland in the period from the 8th to the 10th century AD and is the oldest Celtic language well enough attested for adequate grammatical study. The book provides the only available detailed linguistic analysis of the syntactic structure of the Old Irish sentence. The basic form of the simple sentence with the usual order of elements verb-subject-object is unproblematic from a synchronic viewpoint but certain sentence types show more complex patterns of syntax which have important implications for the typological, diachronic and comparative historical analysis of Old Irish in particular and Celtic and Indo-European languages in general. Sentence types which contain obligatory cataphoric pronouns referring to elements later in the same sentence are examined in detail as well as constructions with marked initial topics and the focussing construction of the cleft sentence. The approach is functional and typological on the basis of a text corpus from the glosses on the Pauline epistles at Würzburg with further material from Old Irish legal texts. The emphasis is on the communicative content and intent of the sentences of the corpus. The book is a newly edited version of MacCoisdealbha's Bochum dissertation of 1974, previously unpublished due to the author's death in 1976 and includes textual notes by the editor indicating progress and indeed lack of progress in the meantime in areas covered by the book.

The Cambridge History of the English Language Richard M. Hogg, Norman Francis Blake, Suzanne Romaine, Roger Lass, R. W. Burchfield, 1992-07-31 The Cambridge History of the English Language is the first multi-volume work to provide a full account of the history of English. Its authoritative coverage extends from areas of central linguistic interest and concern to more specialised topics such as personal and place names. The volumes dealing with earlier periods are chronologically based whilst those dealing with more recent periods are geographically based, thus reflecting the spread of English over the last 300 years. Volume 1 deals with the history of English up to the Norman Conquest and contains chapters on Indo-European and Germanic phonology and morphology, syntax, semantics and vocabulary, dialectology, onomastics and literary language. Each chapter as well as giving a chronologically oriented presentation of the data, surveys scholarship in the area and takes full account of the impact of developing and current linguistic theory on the interpretation of the data. The chapters have been written with both specialists and non-specialists in mind; they will be essential reading for

Lehmann, 2015-01-28 This book presents for the first time in English a complete critical survey of the theory and methodology of Indo European linguistics from its origins two centuries ago to the present day **Reshaping of the Nominal Inflection in Early Northern West Germanic** Elżbieta Adamczyk, 2018-04-20 The book is a comprehensive corpus study of analogical developments in the nominal morphology of four Northern West Germanic languages Old English Old Frisian Old Saxon and Old Low Franconian It examines the patterns of reorganisation of the nominal paradigms focusing on the analogical interdeclensional shifts of nouns affiliated with historical minor classes The wide scope and comparative nature of the study facilitate identifying the major patterns of inflectional restructuring both language specific and those of a more general character demonstrating that the process was far from random By framing the investigated phenomena quantitatively the study affords insight into the dynamics of the changes their scope in individual languages the mechanisms underlying the restructuring process and the factors conditioning it The book may be of interest to both historical linguists who may appreciate its descriptive aspects as well as morphologists concerned with the mechanisms of morphological processes especially analogy *Thoughts on grammaticalization* Christian Lehmann, 2015-12-24 After a short review of the history of research the work introduces and delimits the concepts related to grammaticalization It then provides extensive exemplification of grammaticalization phenomena in diverse languages ordered by grammatical domains such as the verbal pronominal and nominal sphere and clause level relations The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes This is the basis of the structural parameters that constitute grammaticalization They are operationalized to the point of rendering degrees of grammaticalization measurable The present edition contains corrections of the 1995 edition **Introduction to Indo-European Linguistics** Oswald Szemerényi, Oswald John Louis Szemerényi, 1999 Professor Szemerényi s Einführung in die vergleichende Sprachwissenschaft first published in 1970 remains the standard introduction to comparative Indo European linguistics Updated and revised for its English translation it appears here in a new paperback format The introductory section presents a general survey of the principles of diachronic comparative linguistics and the remainder of

the book is a thorough and detailed analysis according to those principles of the phonological and morphological structure of the Indo European group of languages Each section of the book has a detailed bibliography so that the student can progress from the general overview to a more detailed examination of particular topics Thoughts on grammaticalization Christian Lehmann,2024-05-23 Thoughts on grammaticalization was first published in a working paper version in 1982 and became very influential immediately even though it was properly published only in 1995 Despite its modest title the book can be read as an advanced introduction to grammaticalization though its conception is very original The present edition contains a number of corrections of the 1995 edition After a short review of the history of research the work introduces and delimits the concepts related to grammaticalization It then provides extensive exemplification of grammaticalization phenomena in diverse languages ordered by grammatical domains such as the verbal pronominal and nominal sphere and clause level relations The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes This is the basis of the structural parameters that constitute grammaticalization They are operationalized to the point of rendering degrees of grammaticalization measurable
