Calder,1985 *Einstein's Universe* Nigel Calder,1982 Nigel Calder's landmark book has been acclaimed for making Albert Einstein's theories of relativity accessible to the public The universe that Einstein built is an astonishing skyscape of bent starlight high speed astronauts black holes stormy galaxies and exploding spacetime Today it seems more certain than ever that we live in the cosmos he described yet often we still fail to understand it Einstein's Universe unlocks the secrets of an astounding vision of the world How can a black hole keep you young Why does a falling person feel no force of gravity Answering these and many other questions Einstein's Universe makes plain the debt that humanity owes to the man who completely reshaped our ideas of energy time and motion *Einstein's Universe* ,1982 **The EINSTEIN-STEFAN**

**A Fundamental Mistake** Graham Cliff, 2012-06-01 Does it puzzle you that despite ever increasing rules controls and counter measures antisocial behaviour is seemingly spiralling out of control Why have there been riots in Britain Why is law enforcement failing to make our society a better place in which to live Have our politicians lost the plot Are our values wrong A Fundamental Mistake explains why a change of direction is needed in society's thinking about how to get people to behave themselves it also offers a carefully argued strategy by which to achieve this The emphasis needs to shift away from coercion and punishment and towards inducement and reward The remarkable thing is that although we already have the necessary knowledge it's not put to good use Taking a fresh approach Graham Cliff draws on mainstream behavioural psychology and applied ethics to make his case for challenging some of our time honoured cultural assumptions and practices Be prepared to re think your position Despite the weightiness of the subject this is a book for everyone because it works up from first principles in a readily readable way No expertise is needed to follow the flow from the basics of human nature to the way our minds work then through the web of customs and rules that make up society on to government laws and punishment and finally to how and why things might be done differently Nobody will agree with everything that A Fundamental Mistake has to say because that's what debate is all about However it's as well to remember this when it comes to tackling antisocial behaviour it's not enough just to get tough we must get clever too
