From Red To Green Interviews With New Left Review:

From Red to Green Rudolf Bahro, 2020-05-05 When Rudolf Bahro left East Germany in 1979 two years after publication of *The Alternative in Eastern Europe* very little was known about the background to this imposing study of the structures and suppressed potential of actually existing socialism In this series of interviews organized by New Left Review he systematically discusses his childhood years in Nazi Germany his political and intellectual development as a loyal though never unthinking supporter of the Ulbricht regime the emergence of his critique of the Soviet Union and his close identification with the Prague Spring The invasion of Czechoslovakia had a profound effect on Bahro who immediately set to work on the massive project that would occupy nearly a decade of his life A central section of the book addresses the intellectual influences and personal circumstances surrounding its accomplishment before going on to the significance of his arrest in 1977 Released from prison under a general amnesty then forced into exile Bahro has since enthusiastically embraced the Green Party and ecology movement in West Germany becoming its most forceful advocate of industrial disarmament In the concluding interviews he analyses his own response to this new opposition in West Germany situating it in relation to the new cold war and tensions within the Social Democratic Party on the one hand and to the traditional perspectives of historical materialism on the other The fruitful and wide ranging exchange of ideas in *From Red to Green* will be of interest to everyone concerned with the pressing social and political problems of the late twentieth century

One Hundred Years of Socialism Donald Sassoon, 2010-07-30 On 14 July 1889 the centenary of the French Revolution socialist parties from all corners of Europe met in Paris On the same day in the same city the Exposition Universelle was launched to mark the achievements of capitalist production The two events symbolized the beginning of the epic struggle between socialism and capitalism in Europe In this comprehensive study of a century of socialism the author traces the fortunes of the political parties of the Left in Western Europe From the rise of the Bolsheviks to the fall of the Berlin wall from the Second International through two world wars to the Cold War and the birth of the welfare state from the working class militancy and student uprisings of the 1960s through the revival of feminism and the arrival of green politics to the reluctant embrace of market economics en route to the millennium Donald Sassoon charts the course of socialism across 14 countries He shows that throughout their history the fortunes of socialism and capitalism have been inextricably linked They have grown up side by side each one challenging and seeking to destroy yet nourishing and shaping the other

Environment and Society Erika Cudworth, 2005-08-04 At the start of the twenty first century it can be argued that human societies have a greater impact on the environment than ever before We have always been dependent upon and interacted with the natural environment However the dramatic social changes of the past three centuries have altered the form of our relationship with non human nature to the extent that some would see people planet relations as in a situation of crisis Environment and

Society provides a comprehensive and critical account of the ways in which we can think about the relationship between human societies and the environments with which they interact. It argues that human societies are ecologically embedded and that environments are often socially embedded and constituted. It makes the different theoretical positions and empirical studies accessible to students and includes chapter outlines and summaries, annotated further reading, boxed case studies and discussion points.

Marxism, Morality, and Social Justice Rodney G. Peffer, 2014-07-14. The interpreter of Marx's writings faces the task of reconciling on the one hand Marx's frequent explicit condemnations and criticisms of morality and on the other the obvious way in which his world view reflects substantive moral judgments. In this book R. G. Peffer tackles the challenges of finding in Marx's work an implicit moral theory of answering claims that Marxism is incompatible with morality and of developing the outlines of an adequate Marxist moral and social theory. Peffer analyzes the moral components of Marx's thought and considers all the major interpretations of his moral perspective. He concludes that Marx is a mixed deontologist who is most committed to a maximum system of equal freedoms both positive and negative. He then utilizes contemporary metaethical theory to show that Marxism is compatible with morality in general and with the concepts of justice and rights in particular. Peffer proposes a radically egalitarian theory of social justice which subsumes Marx's own moral theory and a minimal set of Marxist empirical theses which together entail the Marxist's basic normative political positions. This book demonstrates that contemporary analytic political philosophy is invaluable for coming to terms with Marxism and that it is only Marx's less abstract empirical theories about classes and class struggle, the dysfunctions of capitalism and the possibility of creating democratic self-managing postcapitalist societies that are needed for the development of an adequate Marxist moral and social theory. Sandino's Communism Donald C. Hodges, 2014-02-01. Drawing on previously unknown or unassimilated sources, Donald C. Hodges here presents an entirely new interpretation of the politics and philosophy of Augusto C. Sandino, the intellectual progenitor of Nicaragua's Sandinista revolution. The first part of the book investigates the political sources of Sandino's thought in the works of Babeuf, Buonarroti, Blanqui, Proudhon, Bakunin, Most, Malatesta, Kropotkin, Ricardo Flores Magón and Lenin, a mixed legacy of pre-Marxist and non-Marxist authoritarian and libertarian communists. The second half of the study scrutinizes the philosophy of nature and history that Sandino made his own. Hodges delves deeply into this philosophy as the supreme and final expression of Sandino's communism and traces its sources in the Gnostic and millenarian occult undergrounds. This results in a rich study of the ways in which Sandino's revolutionary communism and communist spirituality intersect a spiritual politics that

Hodges presents as more realistic than the communism of Karl Marx While accepting the current wisdom that Sandino was a Nicaraguan liberal and social reformer Hodges also makes a persuasive case that Sandino was first and foremost a communist although neither of the Marxist nor anarchist variety He argues that Sandino's eclectic communist spirituality was more of an asset than a liability for understanding the human condition and that his spiritual politics promises to be more relevant than Marxism Leninism for the twenty first century Indeed Hodges believes that Sandino's holistic communism embraces both deep ecology and feminist spirituality a finding that is sure to generate lively and productive debate

Nature's Web Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them
