From Religion To Philosophy:

From Religion to Philosophy F.M. Cornford, 1965 The words Religion and Philosophy perhaps suggest to most people two distinct provinces of thought between which if like the Greeks we include Science under Philosophy there is commonly held to be some sort of border warfare It is however also possible to think of them as two successive phases or modes of the expression of man's feelings and beliefs about the world and the title of this book implies that our attention will be fixed on that period in the history of the western mind which marks the passage from the one to the other It is generally agreed that the decisive step was taken by the Greeks about six centuries before our era At that moment a new spirit of rational inquiry asserted its claim to pronounce upon ultimate things which had hitherto been objects of traditional belief What I wish to prove however is that the advent of this spirit did not mean a sudden and complete breach with the older ways of thought There is a real continuity between the earliest rational speculation and the religious representation that lay behind it and this is no mere matter of superficial analogies such as the allegorical equation of the elements with the Gods of popular belief Philosophy inherited from religion certain great conceptions for instance the ideas of God Soul Destiny Law which continued to circumscribe the movements of rational thought and to determine their main directions Religion expresses itself in poetical symbols and in terms of mythical personalities Philosophy prefers the language of dry abstraction and speaks of substance cause matter and so forth But the outward difference only disguises an inward and substantial affinity between these two successive products of the same consciousness The modes of thought that attain to clear definition and explicit statement in philosophy were already implicit in the unreasoned intuitions of mythology

Excerpt from Religion and Philosophy It was my intention to write this book as an essay in philosophy addressed in the first instance to philosophers But the force of circumstances has to some extent modified that plan To make of it an academic treatise armed at all points against the criticism of the professed specialist would require time far beyond the few years I have spent upon it The claims of a temporary occupation very different from that in which I began to write leave no opportunity for the rewriting and careful revision which such a work demands and I had set it aside to await a period of greater leisure But the last year has seen a considerable output of books treating of religion from a philosophic or intellectual rather than either a dogmatic or a devotional point of view and I believe that this activity corresponds to a widespread reawakening of interest in that aspect of religion among persons not specially trained in technical philosophy or theology In the hope of making some small contribution to this movement I venture to publish this book as it stands About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the

original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Experience, Explanation and Faith Anthony O'Hear, 2013-05-02 In this book Anthony O'Hear examines the reasons that are given for religious faith His approach is firmly within the classical tradition of natural theology but an underlying theme is the differences between the personal Creator of the Bible or the Koran and a God conceived of as the indeterminate ground of everything determinate Drawing on several religious traditions and on the resources of contemporary philosophy specific chapters analyse the nature of religious faith and of religious experience They examine connections between religion and morality and religion and human knowledge the cosmological teleological and ontological arguments process thought and the problem that evil presents for religion The final chapter returns to the inherently dogmatic nature of religious faith and concludes that rational people should look beyond religion for the fulfilment of their spiritual needs **World and Life**

The Pre-Socratics Dr Zeus, 2022-09-26 Conford traces the remarkable burst of abstract speculation among pre Socratic thinkers The first philosophers assumed quite naturally that there is a physical world that could be observed The first philosophy was natural philosophy The world is physical because what we can observe are things They went so far as to believe that consciousness is also physical and consists of very fine particles It made it easier to understand sensation which is a physical effect on sensitive parts of the body's surface eyes ears nose tongue and skin But the senses contained secrets that the first philosophers could not penetrate so they oriented themselves only on the outside of the difference between the observer and the observed Themselves as observers the inside of observation were bracketed Here is an essential book for students and scholars alike Students of the Pre Socratics must be grateful to Mourelatos and his publishers for making these essays available to a wider public *Readability (2/2)* - Annandreas, 2021-09-21 This book is the second part of the two part book *Readability Birth of the Cluster text Introduction to the Art of learning* i.e. do not forget the first part This book is the definitive guide to reading and learning or to learn about philosophy science and pedagogy After having read this book you should have become a better reader and learner and you should also know a little more about philosophy Hence this book could also be seen as a general introduction to philosophy It can be seen in its content Part One 524 pages 1 Reading instructions 25 2 Pedagogical psychology and pedagogical points 87 3 Power analytics an initial relationship to Foucault 52 4

Design and Destiny Ronald Cole-Turner, 2008 Scholars discuss the genetic modification of embryonic cells from the viewpoints of traditional Jewish and Christian teaching considering both the possible therapeutic benefits of this technology and moral concerns about its implementation We are approaching the day when advances in biotechnology will allow parents to design a baby with the traits they want The continuing debate over the possibilities of genetic engineering has been spirited but so far largely confined to the realms of bioethics and public policy *Design and Destiny* approaches the question in religious terms discussing human germline modification the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons although they offer certain moral conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism's traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter
