From Sea To Sea In A Model T:

Farewell to Model T E. B. White, 2003-05-31 In 1922 just out of college and at loose ends E B White set off across America in a Model T He left his map at home but packed his typewriter his true destination he tells us was the world of letters White wrote the richly humorous Farewell to Model T for The New Yorker in 1936 it was the first of his essays to bring him fame In From Sea to Shining Sea White conjures the unspoiled America that remained his most enduring subject The first essay of E B White s to become famous Farewell to Model T originally appeared in 1936 in The New Yorker as Farewell My Lovely It is rich in comic descriptions of the eccentricities of the car the demands it put on its devoted owners and the hardware and decorative accessories from 98 cent anti rattlers to the de luxe flower vase of the cut glass anti splash type that kept them pouring over the Sears Roebuck catalog If there was an owner s manual for the flivver it didn t begin to divulge what the owner needed to know That s where theory speculation superstition and metaphysics came in I remember once spitting into a timer White recalls not in anger but in a spirit of research It is published for the first time with Sea to Shining Sea in which White conjures the America that he had discovered as a 22 year old during a cross country trip in his Model T The year was 1922 the same the year that Fitzgerald and Hemingway went to Paris to find themselves In it he would write My own vision of the land my own discovery of it was shaped more than by any other instrument by a Model T Ford a slow motion roadster of miraculous design strong tremulous and tireless from sea to shining sea From Sea to Sea in a Model T Yvonne Ellingson, 1990 **Dominion from Sea to Sea** Bruce Cumings, 2009-11-17 America is the first world power to inhabit an immense land mass open at both ends to the world s two largest oceans the Atlantic and the Pacific This gives America a great competitive advantage often overlooked by Atlanticists whose focus remains overwhelmingly fixed on America s relationship with Europe Bruce Cumings challenges the Atlanticist perspective in this innovative new history arguing that relations with Asia influenced our history greatly Cumings chronicles how the movement westward from the Middle West to the Pacific has shaped America s industrial technological military and global rise to power He unites domestic and international history international relations and political economy to demonstrate how technological change and sharp economic growth have created a truly bicoastal national economy that has led the world for more than a century Cumings emphasizes the importance of American encounters with Mexico the Philippines and the nations of East Asia The result is a wonderfully integrative history that advances a strong argument for a dual approach to American history incorporating both Atlanticist and Pacificist perspectives Greetings from the Lincoln Highway Brian Butko, 2019-05-31 The Lincoln Highway was the first continuous road to connect the coasts allowing newly motorized Americans to cross the country by car This book allows readers to travel across 100 years of the highway from New York City to San Francisco with stops at historic landmarks bridges taverns movie palaces diners gas stations ice cream stands tourist cabins and roadside attractions Color maps and stories of the highway take readers through 14 states with excerpts from memoirs and old postcards giving a feel

for what early motoring was like the good the bad and the muddy The book is organized by state with narrative information on what the original Lincoln Highway crossed through There are historical tidbits and nostalgic details along with information on what remains This book is a useful treasure for travel planning and armchair reading

The Car Bryan Appleyard, 2022-09-06 A spirited insightful exploration of our favorite machine and its cultural impact on society over the past one hundred and fifty years. More than any other technology, cars have transformed American popular culture. Cars have created vast wealth as well as novel dreams of freedom and mobility. They have transformed our sense of distance and made the world infinitely more available to our eyes and our imaginations. They have inspired cinema, music, and literature. They have, by their need for roads, bridges, filling stations, huge factories, and global supply chains, re-engineered the world. Almost everything we now need, want, imagine, or aspire to, assumes the existence of cars in all their limitless power and their complex systems of meanings. This book celebrates the immense drama and beauty of the car, of the genius embodied in the Ford Model T, of the glory of the brilliant red Mercedes Benz S-Class, made by workers for Nelson Mandela on his release from prison, of Kanye West's chopped Maybach, of the salvation of the Volkswagen Beetle by Major Ivan Hirst, of Elvis Presley's 1955 Cadillac, of the Rolls Royce Silver Ghost, and the BMC Mini, and even of that harbinger of the end, the Tesla Model S and its creator, Elon Musk. As the age of the car as we know it comes to an end, Bryan Appleyard's brilliantly insightful book tells the story of the rise and fall of the incredible machine that made the modern world what it is today.
