## **From Soul To Mind The Emergence Of Psychology From Erasmus Darwin To William:**

**From Soul to Mind** Edward S. Reed, 1998-10-11 In a lively and original account of psychology's formative years the late Edward S. Reed describes the attempts of 19th century thinkers and practitioners to make psychology into a science. Setting psychological developments within the social, religious, and literary contexts of the time, Reed counters the widespread belief that psychology emerged from philosophy.

**The Poetry of Erasmus Darwin** Martin Priestman, 2016-02-24 While historians of science have focused significant attention on Erasmus Darwin's scientific ideas and milieu, relatively little attention has been paid to Darwin as a literary writer. In *The Poetry of Erasmus Darwin: Enlightened Spaces, Romantic Times*, Martin Priestman situates Darwin's three major poems: *The Loves of the Plants* (1789), *The Economy of Vegetation* (1791), and *The Temple of Nature* (1803), and Darwin himself within a large polymathic late Enlightenment network of other scientists, writers, thinkers, and social movers and shakers. Interpreting Darwin's poetry in terms of Darwin's broader sense of the poetic text as a material space, he posits a significant shift from the Enlightenment's emphases on conceptual spaces to the Romantic period's emphases on historical time. He shows how Darwin's poetry illuminates his stance toward all the major physical sciences and his well-formulated theories of evolution and materially based psychology. Priestman's study also offers the first substantial accounts of Darwin's mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry, and of the reading of history that emerges from the fragment poem *The Progress of Society*, a first ever printed edition of which is included in an appendix. Ultimately, Priestman's book offers readers a sustained account of Darwin's polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism.

**Matters of the Heart** Fay Bound Alberti, 2010-01-14 The heart is the most symbolic organ of the human body. Across cultures it is seen as the site of emotions as well as the origin of life. This book traces the ways emotions have been understood between the 17th and 19th centuries as both physical entities and spiritual experiences.

**Philosophy of Mind in the Nineteenth Century** Sandra Lapointe, 2018-07-09 Between the publication of Kant's *Critique of Pure Reason* in 1781 and Husserl's *Ideas* in 1913, the nineteenth century is a pivotal period in the philosophy of mind, witnessing the emergence of the phenomenological and analytical traditions which continue to shape philosophical debate in fundamental ways. The nineteenth century also challenged many prevailing assumptions about the transparency of the mind, particularly in the ideas of Nietzsche and Freud, whilst at the same time witnessing the birth of modern psychology in the work of William James. Covering the main figures of German idealism to the birth of the phenomenological movement under Brentano and Husserl, *Philosophy of Mind in the Nineteenth Century* provides an outstanding survey to these new directions in philosophy of mind. Following an introduction by Sandra Lapointe, fourteen specially commissioned chapters by an international team of contributors discuss key topics, thinkers, and debates, including German idealism, Bolzano, Johann Friedrich Herbart, Ernst Mach, Helmholtz, Nietzsche, William James, Sigmund Freud, Brentano's early philosophy of mind.
