From The Roots Up Economic Development As If Community Mattered:

From the Roots Up Ross, David, Peter J. Usher, Peter, 1986 This document analyses the social aspects of industrial development focusing on the role of the informal sector in economic development It sets out to analyze measure and describe the characteristics of the informal economy contrast it with the fully commercialized sector in terms of purpose and social function and suggest the kind of changes in economic policy that would enable the informal economy to offer new kinds of work to strengthen local self reliance and to meet a wide variety of economic and social needs at the local community level

Life Spaces Caroline Andrew, Beth Moore Milroy, 2011-11-01 Written by some of Canada's top researchers in the field the articles in this collection introduce a new chapter in feminist literature focusing on women and their experiences in Canadian urban settings and illustrating the importance of gender in the development of urban areas While the articles represent diverse approaches and methodologies they all point out that the specific needs of women are not being met and that women must create opportunities for democratic participation in the institutions that affect their lives In the introduction the editors develop the broad area of gender relations in urban society and describe how this field of study has evolved in Canada The following seven chapters deal with women's experiences in the city emphasizing the complex interrelations between individuals and their environments Three main themes stand out in the book the changing relationships between women's roles as paid labour and in the household the interconnection between public and private activities and the way our understanding of these is linked to changing urban milieux Specific policy areas particularly housing but also leisure recreation and transportation are examined by some of the contributors while in the concluding chapter the editors discuss directions for further study and suggest appropriate research methods The annotated bibliography in itself a major contribution to the field will prove invaluable to future scholars **From the Roots Up**

David"" ""Ross, 2000 Economic Development for Everyone Mark M. Miller, 2017-05-09 How do we create employment grow businesses and build greater economic resilience in our low income communities How do we create economic development for everyone everywhere including rural towns inner city neighborhoods aging suburbs and regions such as Appalachia American Indian reservations the Mexican border and the Mississippi Delta and not just in elite communities *Economic Development for Everyone* collects organizes and reviews much of the current research available on creating economic development in low income communities Part I offers an overview of the harsh realities facing low income communities in the US today their many economic and social challenges debates on whether to try reviving local economies vs relocating residents and current trends in economic development that emphasize high tech industry and high levels of human capital Part II organizes the sprawling literature of applied economic development research into a practical framework of five dynamic dimensions empower your residents begin with basic education enhance your community build on existing assets encourage your entrepreneurs diversify your economy and sustain your development This book assembled and

presented in a unified framework will be invaluable for students and new researchers of economic development in low income communities and will offer new perspectives for established researchers professional economic developers and planners and public officials Development practitioners and community leaders will also find new ideas and opportunities along with a broad view on how the many complex parts of economic development interconnect *"Enough to Keep Them Alive"* Hugh Shewell,2004-01-01 *Enough to Keep Them Alive* explores the history of the development and administration of social assistance policies on Indian reserves in Canada from confederation to the modern period demonstrating a continuity of policy with roots in the pre confederation practices of fur trading companies **Deadhead Social Science** Rebecca G. Adams,Robert Sardiello,2000-05-30 *Deadhead Social Science* is a collection of papers examining various aspects of the complex subculture surrounding the rock band the Grateful Dead Deadheads as Grateful Dead fans are called followed the band from venue to venue until the band announced their dissolution in December of 1995 and have continued to follow bands including various surviving members of the Grateful Dead since then *Deadhead Social Science* addresses the questions What is a Deadhead How does a Deadhead identity evolve Why would a person choose an identity that would be viewed negatively by a larger society Why are Deadheads viewed negatively by the larger society Is the Deadhead community a popular religion How did a rock band develop a religious following The book also examines the music the role of vendors and the reaction by host communities to the Grateful Dead and its following One key theme in *Deadhead Social Science* is the interconnections among teaching research and personal interests written from a variety of social science disciplinary traditions Empowerment John Friedmann,1992-07-27 Two thirds of the population of the world are poor and their number is growing in the first as well as in the third world despite billions of dollars of aid The economic development policies of the last two decades and the theory which gave rise to them have been discredited The rich are disillusioned apprehensive or uninterested while the poor are embittered and without hope the victims and agents of ignorance instability and environmental degradation The need for radical rethinking is urgent this book makes an important contribution towards that end John Friedmann argues that poverty should be seen not merely in material terms but as social political and psychological powerlessness He presents the case for an alternative development committed to empowering the poor in their own communities and to mobilizing them for political participation on a wider scale In contrast to centralized development policies devised and implemented at the national and international level alternative development restores the initiative to those in need on the grounds that unless people have an active role in directing their own destinies long term progress will not be achieved The author takes the household as the strategic starting point stressing its moral political and economic potential as a source of continuity and as a location for production From this basis he propounds a politics of emancipation that would enable the disempowered poor to assert their rights *Empowerment* provides a morally informed theoretical framework for a development policy that meets the needs of its recipients rather than of its makers *Arctic Politics* Oran

R. Young, 1992-11-01 Long recognized by naturalists and adventurers as a dramatically unique region the Arctic has recently emerged as an area of increasing political strategic and economic importance The Arctic is both one of the world's largest and smallest regions encompassing 15% of the earth's land mass yet inhabited by fewer than 1% of the world's population Its physical vastness is coupled with a wealth of natural resources in oil alone the Far North contributes that majority of Russia's production and 25% of US output At the same time the Circumpolar North is home to diverse indigenous peoples and cultures thus setting the stage for conflicts of international scope In this collection of essays Oran Young provides a foundation for studying the politics of the Arctic as a distinctive international region Expanding the traditional approach to area studies he examines the Far North not only for its unique features but also as an arena within which to develop new approaches to various issues of worldwide interest Young challenges persistent stereotypes that marginalize the region moving beyond the romanticism of many observers to arrive at an understanding of the complex social and ecological systems of the Far North In doing so Young thoughtfully establishes the Arctic as an area of international importance both in its own right and in relation to other geopolitical regions *Karl Polanyi on Ethics and Economics* Gregory Baum, 1996 Breaking new ground in Polanyi scholarship Gregory Baum explores the relation between ethics culture and economics in Karl Polanyi's writings He identifies and analyses key concepts of Polanyi's thought and shows how they apply to the contemporary debate on ethics and economics **Future Survey Annual 1986** Michael Marien, 1987-01-01

Community Economic Development in Canada David James Anthony Douglas, 1994 **Global Challenge and Local Response** Walter B. Stöhr, 1990 The volume grew out of research undertaken as a part of the UN University's European Perspectives Project It addresses the consequences of the failure of large scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe East and West rural and industrial have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration Annotation copyrighted by Book News Inc Portland OR *Ripples from the Zambezi* Ernesto Sirotli, 1999-04-01 After six years of economic development work in Africa Ernesto Sirotli witnessed how little most foreign aid programs were actually doing for the people they hoped to help from creating a communal tomato field on the banks of the Zambezi river only to be demolished by the river's hippos at harvest time to donating snow plows to African nations However well intentioned Sirotli points out inappropriate development often creates more problems than it solves Thus was the genesis of this exciting and unique alternative to traditional economic development termed Enterprise Facilitation where depressed communities can build hope and prosperity by first helping individuals to recognize their talents and business passion and then providing the skills to transform their dreams into meaningful and rewarding work *The Lichen Factor* Jim Lotz, 1998 **Critical Evaluations of Economic Development Policies** Laura Ann Reese, David Fasenfest, 2004 This ground breaking text offers

alternative models for critical evaluation of the values behind and the success of local level economic development policies. The values that shape present day economic development policies are often not plainly expressed. *Critical Evaluations of Economic Development Policies* shows how the use of nontraditional methods of evaluation can foreground the values that inform public policy and determine whether or not those values and the policies that arise from them are in the best interests of the community that adopts them. The methodology defined in this book not only provides means for judging the success or failure of economic development programs but also offers tactics for judging how well policies address needs according to a community's own value system. The essays in *Critical Evaluations of Economic Development Policies* establish critical models, illustrate how such models may be applied, and show how evaluations of a single program made from the perspectives of differing value systems lead to different conclusions about the success or failure of the program. In doing so, these essays demonstrate the crucial importance of continuing dialogue between those who make policies and those who assess them. This dynamic collection proposes to stimulate discussion among scholars, developers, and urban administrators to build awareness of the ways to foster completely informed policies and evaluate their outcomes.

Alternatives, 1987 Perspectives on society and environment

Resources and Sustainable Development in the Arctic Chris Southcott, Frances Abele, David Natcher, Brenda Parlee, 2018-10-04 Over the past thirty years we have witnessed a demand for resources such as minerals, oil, and gas which is only set to increase. This book examines the relationship between Arctic communities and extractive resource development. With insights from leading thinkers in the field, the book examines this relationship to better understand what, if anything, can be done in order for the development of non-renewable resources to be of benefit to the long-term sustainability of these communities. The contributions synthesize circumpolar research on the topic of resource extraction in the Arctic and highlight areas that need further investigation, such as the ability of northern communities to properly use current regulatory processes, fiscal arrangements, and benefit agreements to ensure the long-term sustainability of their culture, communities, and to avoid a new path dependency. This book provides an insightful summary of issues surrounding resource extraction in the Arctic and will be essential reading for anyone interested in environmental impact assessments, globalization, and Indigenous communities and the future of the Arctic region.

Law and Poverty Frank Munger, 2017-11-28 Socio-legal research on the legal experiences of the poor reflects an understanding of the close connection between economic inequality and law. The first two parts of this volume illustrate general analytical approaches to law and poverty. The remaining parts include essays which examine more specific issues such as race and gender, access to law, legal consciousness, and social change. Research on the relationships between poverty, inequality, and governance still leaves many questions unanswered, but the work presented here reflects the important contribution that socio-legal research makes to the ongoing debate.

Community Economic Development Eric Shragge, 1997 Revised and expanded, this second edition looks at situations anew in terms of current contexts of community economic development. Chapters on women, on an

African example and community ownership on marginalized peoples and on community corporations have been added

Planning in the Public Domain John Friedmann, 2020-06-16 John Friedmann addresses a central question of Western political theory: how and to what extent history can be guided by reason. In this comprehensive treatment of the relation of knowledge to action, which he calls planning, he traces the major intellectual traditions of planning thought and practice. Three of these: social reform, policy analysis, and social learning are primarily concerned with public management. The fourth, social mobilization, draws on utopianism, anarchism, historical materialism, and other radical thought and looks to the structural transformation of society from below. After developing a basic vocabulary in Part One, the author proceeds in Part Two to a critical history of each of the four planning traditions. The story begins with the prophetic visions of Saint Simon and assesses the contributions of such diverse thinkers as Comte, Marx, Dewey, Mannheim, Tugwell, Mumford, Simon, and Habermas. It is carried forward in Part Three by Friedmann's own nontechnocratic dialectical approach to planning as a method for recovering political community.
