From the Tigris to the Tiber Tom B. Jones,1983 From the Tigris to the Tiber Tom Bard Jones,1972 **Law from the Tigris to the Tiber** Raymond Westbrook,2009-06-23 Raymond Westbrook 1946 2009 was acknowledged by many as the world's foremost expert on the legal systems of the ancient Near East and a leading scholar in the study of biblical and classical law This collection brings together the 44 most important articles that Westbrook published in the 25 years following the completion of his Ph D at Yale University in 1982 The first volume *The Shared Tradition* contains 16 articles that lay out Westbrook's theory of a common legal tradition that spanned the ancient world from Mesopotamia to Israel and even to Greece and Rome The second volume *Cuneiform and Biblical Sources* provides 28 articles that demonstrate Westbrook's unique method of legal analysis that he applied to the numerous texts he worked with as an Assyriologist and biblical scholar from law codes to contracts to narratives Each volume contains its own comprehensive bibliography as well as subject author and text indexes Together they represent the life's work of one of the most important legal historians of our era *The Tower of Babel in Genesis* James Austin,2012-11-29 This book takes the reader back to the Tower of Babel and discusses themes and ideas present that resonate throughout Genesis the Bible and into modern history The reader will more fully understand why the Tower of Babel narrative appears where it does in biblical history Furthermore the reader will learn why this event in human history remains one of the single most important events in the interaction of humanity and the divine **Philosophy and History of Education** Antoinette Errante,Jackie Blount,Bruce A. Kimball,2017-02-10 The studies of philosophy and history of education are under siege These studies do not attract large grant funds and to many do not seem useful even while much of educational research is dismissed as inconsequential or self evident and the crisis in American education deepens Philosophy and history of education have therefore been pushed to the margin or beyond in colleges and schools of education commensurate with the decline of the humanities in higher education generally Philosophy and History of Education examines the complex relationship between these studies and the value of these related studies for improving educational knowledge policy and practice From diverse perspectives the philosophers and historians in this volume explore how bringing these disciplines together yields insights about unacknowledged or occult aspects of education problems that neither could achieve on their own Floods of the Tiber in Ancient Rome Gregory S. Aldrete,2007-03-05 A study of the impact of flooding on the ancient city during the classical period While the remains of its massive aqueducts serve as tangible reminders of Rome's efforts to control its supply of drinking water there are scant physical reminders that other waters sometimes raged out of control In fact floods were simply a part of life in ancient Rome where proximity to the Tiber left a substantial part of the city vulnerable to the river's occasional transgressions Here in the first book length treatment of the impact of floods on an ancient city Gregory S Aldrete draws upon a diverse range of scientific and cultural data to develop a rich and detailed account of flooding in Rome throughout the classical period Aldrete explores in detail the

overflowing river's destructive effects drawing from ancient and modern written records and literary accounts analyses of the topography and hydrology of the Tiber drainage basin visible evidence on surviving structures and the known engineering methods devised to limit the reach of rising water He discusses the strategies the Romans employed to alleviate or prevent flooding their social and religious attitudes toward floods and how the threat of inundation influenced the development of the city's physical and economic landscapes *Floods of the Tiber in Ancient Rome* is that rare thing in scholarship a work that genuinely fills a gap in the scholarly literature Professor Aldrete has brilliantly illuminated an aspect of ancient Rome that was ever present to the city's inhabitants but almost invisible to modern historians Stanley Burstein history teacher Raises important questions about the effects of flooding of the Tiber on the city of ancient Rome and its inhabitants and explores why Romans did not take more sweeping steps to reduce if not eliminate the dangers of urban flooding There is no comparable book length study of this topic so this work fills a real need It will be of interest not only to students of ancient history but to hydrologists and students of urban studies as well Certainly it will give us classicists much to think about in our assessment of urban life in ancient Rome Harry B Evans Fordham University author of *Aqueduct Hunting in the Seventeenth Century*

Athens on Trial Jennifer T. Roberts, 2011-10-23 The Classical Athenians were the first to articulate and implement the notion that ordinary citizens of no particular affluence or education could make responsible political decisions For this reason reactions to Athenian democracy have long provided a prime Rorschach test for political thought Whether praising Athens's government as the legitimizing ancestor of modern democracies or condemning it as mob rule commentators throughout history have revealed much about their own notions of politics and society In this book Jennifer Roberts charts responses to Athenian democracy from Athens itself through the twentieth century exploring a debate that touches upon historiography ethics political science anthropology sociology philosophy gender studies and educational theory

Rachel Magdalene, Cornelia Wunsch, Bruce Wells, 2019-10-23 This book presents a reassessment of the governmental systems of the Late Babylonian period specifically those of the Neo Babylonian and early Persian empires and provides evidence demonstrating that these are among the first to have developed an early form of administrative law The present study revolves around a particular expression that in its most common form reads *u a arri i addad* and can be translated as he will be guilty of an offense against the king The authors analyze ninety six documents thirty two of which have not been previously published discussing each text in detail including the syntax of this clause and its legal consequences which involve the delegation of responsibility in an administrative context Placing these documents in their historical and institutional contexts and drawing from the theories of Max Weber and S N Eisenstadt the authors aim to show that the administrative bureaucracy underlying these documents was a more complex systematized and rational system than has previously been recognized Accompanied by extensive indexes as well as transcriptions and translations of each text analyzed here this book breaks new ground in the study of ancient legal systems
