From White Dwarfs To Black Holes The Legacy Of S Chandrasekhar:

From White Dwarfs to Black Holes G. Srinivasan, 2000-05-15 From White Dwarfs to Black Holes chronicles the extraordinarily productive scientific career of Subrahmanyan Chandrasekhar one of the twentieth century's most distinguished astrophysicists Among Chandrasekhar's many discoveries were the critical mass that makes a star too massive to become a white dwarf and the mathematical theory of black holes In 1983 he shared the Nobel Prize for Physics for these and other achievements Over the course of more than six decades of active research Chandrasekhar investigated a dizzying array of subjects G Srinivasan notes in the preface to this book that the range of Chandra's contributions is so vast that no one person in the physics or astronomy community can undertake the task of commenting on his achievements Thus in this collection ten eminent scientists evaluate Chandrasekhar's contributions to their own fields of specialization Donald E Osterbrock closes the volume with a historical discussion of Chandrasekhar's interactions with graduate students during his more than quarter century at Yerkes Observatory Contributors are James Binney John L Friedman Norman R Lebovitz Donald E Osterbrock E N Parker Roger Penrose A R P Rau George B Rybicki E E Salpeter Bernard F Schutz and G Srinivasan

Eclipse: A Celestial Shadow Play B. S. Shylaja, H. R. Madhusudan, 1999

S. Chandrasekhar Dilip M. Salwi, 2004 As a young man he presented a paper on astrophysics that was publicly ridiculed by the eminent astrophysicist A S Eddington However this did not stop S Chandrasekhar from becoming one of the giants of astrophysics and winning the Nobel Prize This is the story of a true polymath whose interests ranged from interstellar galaxies and neutron stars to classical music and English literature Recognised among the greatest astrophysicists of the twentieth century Chandrasekhar till his last day remained a true scientist devoted to his research his students and to sharing his knowledge with the astrophysicist community

Discovery and Classification in Astronomy Steven J. Dick, 2013-09-09 Astronomical discovery involves more than detecting something previously unseen The reclassification of Pluto as a dwarf planet in 2006 and the controversy it generated shows that discovery is a complex and ongoing process one comprising various stages of research interpretation and understanding Ranging from Galileo's observation of Jupiter's satellites Saturn's rings and star clusters to Herschel's nebulae and the modern discovery of quasars and pulsars Steven J Dick's comprehensive history identifies the concept of extended discovery as the engine of progress in astronomy The text traces more than 400 years of telescopic observation exploring how the signal discoveries of new astronomical objects relate to and inform one another and why controversies such as Pluto's reclassification are commonplace in the field The volume is complete with a detailed classification system for known classes of astronomical objects offering students researchers and amateur observers a valuable reference and guide

Negative Frequency at the Horizon Maxime Jacquet, 2018-04-26 This book is part of a large and growing body of work on the observation of analogue gravity effects such as Hawking radiation in laboratory systems The book is highly didactic skillfully navigating between concepts ranging from quantum field theory on curved space times nonlinear fibre optics and the theoretical and experimental foundations in the physics of optical analogues to the Event Horizon It presents a

comprehensive field theoretical framework for these systems including the kinematics governing the fields This allows an analytical calculation of the all important conversion of vacuum fluctuations into Hawking radiation Based on this emission spectra are computed providing unique insights into the emissions from a highly dispersive system In an experimental part the book develops a clear and systematic way to experimentally approach the problem and demonstrates the construction of an experimental setup and measurements of unprecedented sensitivity in the search for stimulation of the Hawking effect
