## **From One Child To Two:**

From One Child to Two Judy Dunn, 1995-01-31 Most mothers and fathers are surprised at how different parenthood feels when the second child arrives Even before the birth a host of new questions arises can you possibly love a second child as much as the first Is it better to have them close in age or farther apart What about sibling rivalry In *From One Child to Two* Judy Dunn gives parents all the information emotional support and reassurance they need to handle the stress and relish the joys of raising two children An internationally recognized expert in the field of sibling relations Dunn draws on her own decade long study of siblings at home as well as from extensive interviews and observations of parents and children How the second pregnancy differs from the first How and when to break the news to the first child How to manage the days surrounding the birth the hospital visit and the crucial first month Being prepared for your firstborn's reaction to the new sibling by age group toddlers preschoolers or children in early elementary school How to cope with the new demands on your marriage The major milestones that families face together the changing role of fathers and grandparents managing new schedules and coping with parental burnout Sibling rivalry what to do about fighting when to intervene and when it's supposed to get better Whether you're contemplating a second child expecting one any day or trying to cope with the changing dynamics of your newly expanded family *From One Child to Two* is an indispensable guide Filled with common sense down to earth and eminently practical advice this is the one parenting book that you will refer to again and again

*From One Child to Two Children* Shibe Ni, 2023-12-30 This book dissects the reproductive intentions and behaviours of the one child generation cohort in China situated in the wider context of changing family life patterns and gendered lenses Demonstrating that the one child family is still favoured by the one child generation this book uncovers the socioeconomic dimensions and mechanisms of family relations underlying young people's decision making processes It also incorporates individual considerations and experiences of childbearing from over 50 interviews to contribute to the development of China's social policy Whereas men's childbearing beliefs were relatively unexplored in the literature the author included male interviewees to better reflect gender differences in relation to childbearing employment and family Analysing the relationship between life routine and the desire or lack thereof to increase China's population the author argues that the current childbearing policy fails to accommodate the needs and demands of young people thus limiting the uptake of China's new policy

**1978 Survey of Disability and Work** Mordechai E. Lando, Richard R. Cutler, Edward Gamber, 1982 *Valuing Children* Nancy Folbre, 2010-03-15 Nancy Folbre challenges the conventional economist's assumption that parents have children for the same reason that they acquire pets primarily for the pleasure of their company Children become the workers and taxpayers of the next generation and investments in them offer a significant payback to other participants in the economy Yet parents especially mothers pay most of the costs The high price of childrearing pushes many families into poverty often with adverse consequences for children themselves Parents spend time as well as money on children Yet most

estimates of the cost of children ignore the value of this time Folbre provides a startlingly high but entirely credible estimate of the value of parental time per child by asking what it would cost to purchase a comparable substitute for it She also emphasizes the need for better accounting of public expenditure on children over the life cycle and describes the need to rethink the very structure and logic of the welfare state A new institutional structure could promote more cooperative sustainable and efficient commitments to the next generation

*Inquiries in the Economics of Aging* David A. Wise, 2008-04-15

For over a decade the National Bureau of Economic Research has sponsored the Economics of Aging Program under the direction of David A. Wise. The program addresses issues that affect the well being of individuals as they age and a society that is composed increasingly of older people. Within the next twenty years an unprecedented proportion of Americans will be over sixty five. New research in the economics of aging is an essential element of understanding what the future holds for this aging population. *Inquiries in the Economics of Aging* presents both empirical papers that consider questions that are fundamental to public policy and more theoretical contributions that lay new groundwork for future research in the economics of aging. *Inquiries in the Economics of Aging* provides a timely overview of some of the most important questions facing researchers on aging and outlines new techniques and models that may help to answer these questions. This important volume will be of great interest to specialists and policy makers as it paves the way for future analysis.
