From Padua To The Trianon 1918-1920:

From Padua to the Trianon, 1918-1920 Mária Ormos, 1990 **Sovereignty at the Paris Peace Conference of 1919** Leonard V. Smith, 2018-03-02 We have known for many decades that the Paris Peace Conference of 1919 failed in the sense that it did not prevent the outbreak of World War II This book investigates not whether the Paris Peace Conference succeeded or failed but the historically specific international system it created It explores the rules under which that system operated and the kinds of states and empires that inhabited it Deepening the dialogue between history and international relations theory makes it possible to think about sovereignty at the Paris Peace Conference in new ways Sovereignty in 1919 was about not just determining of answers demarcating the international system but also the questions Sovereignty in 1919 was about remaking the world Most histories of the Paris Peace Conference stop with the signing of the Treaty of Versailles with Germany on 28 June 1919 Sovereignty at the Paris Peace Conference of 1919 considers all five treaties produced by the conference as well as the Treaty of Lausanne with Turkey in 1923 It is organized not chronologically or geographically but according to specific problems of sovereignty A peace based on justice produced a criminalized Great Power in Germany and a template problematically applied in the other treaties The conference sought to unmix lands and peoples in the defeated multinational empires by drawing boundaries and defining ethnicities The conference sought not so much to oppose revolution as to instrumentalize it in the new international system The League of Nations so often taken as the supreme symbol of the failure of the conference is better considered as a continuation of the laboratory of sovereignty established in Paris **The Encyclopedia of Diplomacy, 4 Volume Set** Gordon Martel, 2018-04-30 The Encyclopedia of Diplomacy is a complete and authoritative 4 volume compendium of the most important events people and terms associated with diplomacy and international relations from ancient times to the present from a global perspective An invaluable resource for anyone interested in diplomacy its history and the relations between states Includes newer areas of scholarship such as the role of non state organizations including the UN and M decins Sans Fronti res and the exercise of soft power as well as issues of globalization and climate change Provides clear concise information on the most important events people and terms associated with diplomacy and international relations in an A Z format All entries are rigorously peer reviewed to ensure the highest quality of scholarship Provides a platform to introduce unfamiliar terms and concepts to students engaging with the literature of the field for the first time *Britain and Danubian Europe in the Era of World War II, 1933-1941* Andras Becker, 2021-03-24 This book is a study of British official attitudes towards the Danubian countries Hungary Czechoslovakia Romania and Yugoslavia from Hitler s rise to power in 1933 to the year 1941 a period that marked serious but fruitless British political and economic efforts to unite this unruly part of Europe against Nazi ascendancy Set against an international backdrop of regional revanchist revisionist and irredentist tendencies particularly in Hungary and Bulgaria the book explores how these movements affected international relations in the region as they aimed to overturn the territorial order set down in

Versailles following the Great War to restore the status quo of a more glorious national past Offering fresh insights into the British East Central and South East European relationship the book charts the shifts in British official policy towards Danubian Europe amidst competing regional nationalisms and the sudden and abrupt shifts in British global priorities during the early part of World War II

Nationalism and Territory George W. White, 2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nation's identity both past and present With his detailed analysis of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war

Borders on the Move Leslie Waters, 2020 An examination of territorial changes between Czechoslovakia and Hungary and their effects on the local populations of the borderlands in the World War II era Historical Knowledge Production Cultures in Late Socialist Hungary and Croatia Réka Krizmanics, 2024-01-08 Historical Knowledge Production Cultures in Late Socialist Hungary and Croatia Expertise Unsettled offers a comparative study and analysis from the Hungarian case and integrating academic party and popular historiography into a single analytical framework Narratives concerning the history of the interwar period and the Second World War and circumstances of their elaboration are at the forefront of this study R ka Krizmanics argues that even within state socialist Eastern Europe different enabling and restrictive factors were at play and investigates the specificities of late socialism while embedding them in the context of their interwar Stalinist and post

Stalinist legacies Expertise Unsettled refers to the growing peril of historians who proved to be often divided among themselves and were increasingly on the defense as a guild when literature cinema and interested non professionals got involved in making and criticizing narratives of the recent past Party history and party historians have been often sidelined in intellectual history but the author argues that their inclusion is crucial both for a more complex understanding of what late state socialism meant for historians and to historicize practices of contemporary post socialist especially illiberal memory regimes

Austria in the Nineteen Fifties Gunter Bischof, 2020-03-09 In American history the 1950s are remembered as an affluent and harmonious decade Not so in Austria That nation emerged out of World War II with tremendous war related destruction and with a four power occupation that would last for ten years until 1955 Massive American economic aid enabled the Austrian economy to start recovering in the 1950s and reorient it from East to West Unlike the United States however general affluence did not set in until the 1960s and 1970s even though Austria s dramatic baby boom enabled it to recover from the demographic catastrophe resulting from manpower losses of World War II This volume deals with these larger trends Stephen E Ambrose discusses American European relations and sets the larger international context for the Austrian scene Oilver Rathkolb retraces the changing importance of the Austrian question for the Eisenhower administration Michael Gehler presents an in depth analysis of the intriguing question of whether Austria s unification at the price of permanent neutrality might have been a model for Germany Franz Mathis and Kurt Tweraser look at economic reconstruction and the roles played by both the Austrian public industrial sector and the American Marshall Plan Karin Schmidlechner looks at the youth culture of the era Franz Adlgasser shows how Herbert Hoover s food aid was instrumental in the containment of communism in Hungary Beth Noveck analyzes Austrian political culture of the First Republic from the perspective of Hugo Bettauer Rolf Steininger presents an insightful historical overview of how the Austro Italian South Tyrol conflict was resolved after seventy five years of tension

Central and Eastern Europe after the First World War Burkhard Olschowsky, Piotr Juskiewicz, Jan Rydel, 2021-11-22 The volume focuses on the years following the First World War 1918 1923 when political military cultural social and economic developments consolidated to a high degree in Eastern Europe This period was shaped on the one hand by the efforts to establish an international structure for peace and to set previously oppressed nations on the road to emancipation On the other hand it was also defined by political revisionism and territorial claims as well as a level of political violence that was effectively a continuation of the war in many places albeit under modified conditions Political decision makers sought to protect the emerging nation states from radical political utopias but simultaneously had to rise to the challenges of a social and economic crisis manage the reconstruction of the many extensively devastated landscapes and provide for the social care and support of victims of war

Social Transformations and Revolutions Johann P. Arnason, 2016-07-10 Prompted by the 25th anniversary of the Soviet collapse this volume reflects on revolutions and transformations around the collapse of the Soviet Bloc the political transformations after 9 11 the

important changes following the global economic crisis and the revolutionary transformations of India and China The authors stress that the United States military actions after the 9 11 terrorist attacks have had a major transformative impact on the global arena More recently the economic crisis that began in 2007 8 caused a series of breakdowns and provoked demands for social and political transformation so far unfulfilled The repercussions of the Arab Spring and transformations linked to the rise of BRICS are altering the patterns of international and global relations All these processes have unfolded within the framework of global capitalism whose reproduction on an expanding scale involved multiple economic political ecological and civilizational transformations

Landscaping the Human Garden Amir Weiner, 2003 This volume is an ambitious study of efforts by twentieth century states to reshape either through social policy or brute force their societies and populations according to ideologies based on various theories of human perfectibility

Social History of Hungary from the Reform Era to the End of the Twentieth Century Gábor Gyáni, György Kövér, Tibor Valuch, 2004 This volume analyses the important structural changes and mobility that occurred in Hungary from the middle of the 19th to the end of the 20th centuries by using rich statistical and narrative sources sometimes reaching to certain social states The period extending to WWI was the time of the establishment of the capital market economy which went with the change of the occupational structure the hierarchy of the status and the culture During the period between the two world wars the territory and the population of the country greatly diminished This was also a reason of the slackening of the social mobility and the rigidity of the structure After WWII especially during the period of socialism the political led change of structure became determinant All of these made possible the so called goulash communism a change of life style from the sixties From 1989 on the return of the market capitalism has been forming the structure
