mediums of interpretation and presentation a range of actors which include museums archives government agencies community history societies and the media and digital media make history accessible to a wider audience It provides the reader with an overview of the wider world application and communication of history beyond the classroom through core case studies for each sector that include ideas for best practice in the field This book offers an accessible and engaging synopsis of a topic that has not previously been covered By focusing on an area of study that has changed substantially in the last decade Public History A Practical Guide presents a comprehensive outline of the practice of public history and provides ideas for future methodological approaches as well as a reference point for planning professional development in order to gain future employment in these sectors In the current economic climate students need to understand the potential use of history beyond university this book contains the tools and advice needed for them to get one step ahead in terms of knowledge skills and experience Evolutionary and Interpretive Archaeologies Ethan Cochrane, Andrew Gardner, 2016-09-16 This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions **Finders Keepers** Craig Childs, 2010-08-25 To whom does the past belong Is the archaeologist who discovers a lost tomb a sort of hero or a villain If someone steals a relic from a museum and returns it to the ruin it came from is she a thief Written in his trademark lyrical style Craig Childs's riveting new book is a ghost story an intense impassioned investigation into the nature of the past and the things we leave behind We visit lonesome desert canyons and fancy Fifth Avenue art galleries journey throughout the Americas Asia the past and the present The result is a brilliant book about man and nature remnants and memory a dashing tale of crime and detection Ethics and Archaeological Praxis Cristóbal Gnecco, Dorothy Lippert, 2014-11-10 Restoring the historicity and plurality of archaeological ethics is a task to which this book is devoted its emphasis on praxis mends the historical condition of ethics In doing so it shows that nowadays a multicultural sometimes also called public ethic looms large in the discipline By engaging communities differently archaeology has explicitly adopted an ethical outlook purportedly striving to overcome its colonial ontology and metaphysics In this new scenario respect for other historical systems worldviews and social accountability appear to be prominent Being ethical in archaeological terms in the multicultural context has become mandatory so much that most professional international and national archaeological associations have ethical principles as guiding forces behind their openness towards social sectors traditionally ignored or marginalized by their practices This powerful new ethics its

newness is based to a large extent in that it is the first time that archaeological ethics is explicitly stated as if it didn't exist before emanates from metropolitan centers only to be adopted elsewhere In this regard it is worth probing the very nature of the dominant multicultural ethics in disciplinary practices because a it is at least suspicious that at the same time archaeology has tuned up with postmodern capitalist market needs and b the discipline along with its ethical principles is contested worldwide by grass roots organizations and social movements Can archaeology have socially committed ethical principles at the same time that it strengthens its relationship with the market and capitalism Is this coincidence just merely haphazard or does it obey more structural rules The papers in this book try to answer these two questions by examining praxis based contexts in which archaeological ethics unfolds

Remains of the Past in Old English Literature Jan-Peer Hartmann, 2025-02-11 Argues for a new understanding of Old English responses to materiality and historical change Human communities have interacted with the material remains of earlier periods for millennia Such archaeological objects including bones coins weapons building materials and architectural landmarks were physically handled reused transformed and reinterpreted they were also depicted in literature This book examines how Old English texts imagine such human encounters with the remnants of the past It explores Elene's perspective on the discovery of the True Cross as a narrative of political spiritual and epistemic translatio and the multiple ways in which *The Wanderer* and *The Ruin* use images of ruins and the poetic formula work of giants to construct an unknown and unrecoverable past it also considers the engagements with untimely objects in *Beowulf* and the Anonymous Old English Legend of the Seven Sleepers and how the *Ruthwell Cross Poem* and *The Dream of the Rood* play off figural against literal history As this study demonstrates Old English texts combined and creatively adapted a broad variety of ways of conceptualizing not merely history but indeed the very processes by which historical thought operates Its careful readings show that these texts not only display a deep and conflicted understanding of the philosophical implications of viewing history and temporality through the prism of material objects but also exhibit a powerful capacity for expressing such an understanding through aesthetic strategies

Antiquarianisms Benjamin Anderson, Felipe Rojas, 2017-05-31

Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises although both existed long before the early modern period and both were and continue to be practiced in places other than Europe. Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions but the clear cut distinction between indigenous and colonial archaeologies has obscured the intense and dynamic interaction between these seemingly different endeavours. This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas. Both regions host robust pre modern antiquarian traditions that have continued to develop during periods of colonialism. In both regions moreover colonial encounters have been mediated by the antiquarian practices and preferences of European elites. The two regions also exhibit salient differences. For example Europeans claimed the antiquities of the eastern Mediterranean as part of their own classical heritage whereas they perceived those of the Americas as essentially alien even as they attempted to understand them by analogy to the classical world. These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross bred antiquarianisms. Rather than assuming that interest in antiquity is a human universal this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation.
