evil and otherness continue to shape our relationship to crime and punishment through contemporary penal policy Inspired by people who have lived worked and studied in U S prisons Stern invites us to rethink the current punishment crisis in the United States Based on in depth interviews with people who were incarcerated as well as extensive conversations with students teachers corrections staff and prison administrators the book introduces the voices of those who have participated in the few remaining post secondary education programs that exist behind bars Drawing on individual narrative and various modern day case examples Stern focuses on dehumanization resistance and community transformation She demonstrates how prison education is essential can provide healing and yet is still not enough to interrupt mass incarceration In short this book explores the possibility of transformation from a retributive punishment system to a system of justice The book s engaging human accounts and multidisciplinary perspective will appeal to criminologists sociologists historians theologians and scholars of education alike Voices from American Prisons will also capture general readers who are interested in learning about a timely and often silenced reality of contemporary modern society

### **The Moral Psychology of Sadness**

Anna Gotlib, 2017-11-30 What does it mean to be sad What difference does it make whether how and why we experience our own and other people s sadness Is sadness always appropriate and can it be a way of seeing more clearly into ourselves and others In this volume a multi disciplinary team of scholars from fields including philosophy women s and gender studies bioethics and public health and neuroscience addresses these and other questions related to this nearly universal emotion that all of us experience and that some of us dread Somewhat surprisingly sadness has been largely ignored by philosophers and others within the humanities or else under theorized as a subject worthy of serious and careful attention This volume reverses this trend presenting sadness as not merely a feeling or affect but an emotion of great moral significance that in important ways underwrites how we understand ourselves and each other
