Frontier Justice Weapons Of Mab Destruction And The Bushwhacking Of America:

The Real Axis of Evil Stephen Kaposi, 2004-09 In The Real Axis of Evil author Stephen Kaposi has utilised extensive research to provide a tough and uncompromising indictment of the US invasion of Iraq Western imperialism globalisation the Israeli treatment of the Palestinians and the Police State being created in the name of security He reveals clearly how the mainstream media has provided a pro establishment coverage to convince people of the need for war and increased security measures that are intended to control their populations He demolishes the facades of George W Bush and Tony Blair to reveal dangerous war makers intent on controlling the world and destroying opposition to their new Empires He shows why Iraq has descended into chaos by revealing the extraordinary level of opposition to America not just in Iraq but around the world The Real Axis of Evil is the necessary perspective to the sanitised pro American image the mainstream media has built to deceive people of the real world situation The Real Axis of Evil provides the truths that the government and their media allies don t want you to know and do their best to cover up

Media Spectacle and the Crisis of Democracy Douglas Kellner, 2015-12-03 Douglas Kellner s Media Spectacle and the Crisis of Democracy 9 11 the War on Iraq and Election 2004 investigates the role of the media in the momentous political events of the past four years Beginning with the role of the media in contested election of 2000 Kellner examines how corporate media ownership and concentration linked with a rightward shift of establishment media have disadvantaged the Democrats and benefited George W Bush and the Republicans Exploring the role of media spectacle in the 9 11 attacks and subsequent Terror War in Afghanistan and Iraq Kellner documents the centrality of media politics in advancing foreign policy agendas and militarism Building on his analysis in Media Spectacle Routledge 2003 Kellner demonstrates in detail how conflicting political forces ranging from Al Qaeda to the Bush administration construct media spectacles to advance their politics Two chapters critically engage the role of the media in the buildup to the Iraq war and the media centric nature of Bush s Iraq invasion and occupation Final chapters delineate the role of the media in the highly contested and significant 2004 election campaign that many believe to be one of the key political struggles of the contemporary era Criticizing Bush s unilateralism Kellner argues for a multilateral and cosmopolitan globalization and the need for democratic media to help overcome the current crisis of democracy in the United States

Frontier Justice Scott Ritter, 2003 Former U N weapons inspector Scott Ritter analyzes the overall strategy of the Bush presidency national security through global domination and the Big Lie he used to sell his brand of frontier justice to the world **BOOK JACKET**

Mass Deception Scott A. Bonn, 2010 Mass Deception argues that the George W Bush administration manufactured public support for the war on Iraq Page 4 of cover

Globalization and Terrorism Jamal R. Nassar, 2004-08-19 Globalization and terrorism are both charged concepts people use the terms loosely without regard for exactitude often to further political ends This book carefully defines these concepts puts them in historical as well as political context and amplifies the basics with an exploration of the way in which the dreams inspired by globalization can translate all

too easily into the nightmare of terrorism The author writes beautifully about the harshest of circumstances endured by victims of globalization the root causes we give lip service to discovering but often without effect He develops two key cases the conflicts in Palestine and Northern Ireland and applies their lessons to other examples including the Congo Chechnya and Colombia in an effort to internationalize our understanding of how globalization and terrorism operate in a variety of contexts Finally a chapter on Middle Eastern Islamist terrorism is a tour de force of incisiveness with balance Nassar presents the dominant view along with the perspective of those dominated by forces beyond their control Even as he offers a profound critique of Western hegemony Nassar conveys his respect and hope for an enlightened global interdependence embracing the power of the dream over the nightmare

[American Anthrax](#) Jeanne Guillemin, 2024-03-26 From Jeanne Guillemin one of the world's leading experts on anthrax and bioterrorism the definitive account of the anthrax investigation It was the most complex case in FBI history In what became a seven year investigation that began shortly after 9 11 with America reeling from the terror attacks of al Qaeda virulent anthrax spores sent through the mail killed Bob Stevens a Florida tabloid photo editor His death and days later the discovery in New York and Washington D C of letters filled with anthrax sent shock waves through the nation Federal agencies were blindsided by the attacks which eventually killed five people Taken off guard the FBI struggled to combine on the ground criminal investigation with progress in advanced bioforensic analyses of the letters contents While the criminal eluded justice disinformation swirled around the letters erroneously linking them to Iraq's WMD threat and foreign bioterrorism Without oversight billions were lavished on biomedical defenses against anthrax and other exotic diseases Worst of all faith in federal justice faltered American Anthrax is a gripping tale of terror intrigue madness and cover up

American Book Publishing Record, 2003

Jihad, Hindutva and the Taliban Iftikhar Haider Malik, 2005 Tracing the historical origins of the ideology of Jihad since the classical Islamic era this book deliberates the more recent typologies of resistance during colonial and contemporary times The intricate relationship in Afghanistan between the erstwhile Mujahideen and Western powers during the Cold War and its break up following 9 11 has been examined in detail The salience of Hindutva in India and demands for a Sunni state in Pakistan simultaneous with similar espousals in Bangladesh Nepal Bhutan and Sri Lanka reveal unique regional congruities on ideological issues Issues of contested statehood and national identity have assumed an added significance which this book addresses within a changed regional and global political context Other than ideology and pluralism the book also investigates problems of governance

The Final Frontier Dominick Jenkins, 2002-11-17 In this highly original and provocative work Dominick Jenkins provides a meticulously researched history of US weapons policy from the First World War to the present day In the first part Jenkins shows how the US presidency and its advisers portrayed Americans as living on a new high technology frontier faced by a German outlaw whose chemical and air weapons would make it an ever greater threat In so doing they helped produce the very enemies they warned against and raised the probability of further war and terror The

comparisons Jenkins draws with the contemporary situation are clear and compelling As with the German sinking of the Lusitania in 1915 the September 11 attacks are now being used to convince Americans to back the expansion of presidential power and a permanent war against rogue states armed with chemical biological and nuclear weapons But the history of the weapons laboratories underscores the danger With the end of the Cold War the opportunity for a long term just peace may be lost and the memory of that chance erased

Weapons of Mass Destruction Edward M. Spiers, 2000 Far from producing a new era of peace tranquillity and respect for international law the ending of the Cold War has fuelled fresh concerns about the proliferation of weapons of mass destruction These anxieties mounted both during and after the Gulf War and were compounded by the revelations of the UN inspectors in Iraq and the belated Russian admission that scientists in the former Soviet Union had been engaged in a covert biological weapons programme for some twenty years This book examines the changing pattern both of incentives and of disincentives for such proliferation including the utility of these weapons at state and sub state levels It also considers how other states should respond assessing the achievements and limitations of arms and export controls the evolving concept of deterrence the debates about counter proliferation policies and the problems in developing defences that will effectively counter an inherently dynamic phenomenon
