are representative of the study of the Old Testament at the beginning of the third millennium *Ancient Ammon B. MacDonald, Younker, 2023-11-13* This work is a presentation on a people of Transjordan known to readers of the Bible as a neighbour and often an enemy of first millennium B C Israel Topics include a review of archaeological research in Ammon the emergence of the Ammonites and Ammonite territory and sites *The Iron Age I Structure on Mt. Ebal* Ralph K. Hawkins, 2012-06-01 In Josh 8 30 35 Israel constructs an altar on Mt Ebal in fulfillment of the command of Deut 27 1 8 This structure had very important social political and religious implications for Israel for it was the first structure to be built after the people entered the land of Canaan Once the altar was completed sacrifices were to be offered on it and a renewal of the covenant was to be carried out patterned after the ritual of Deut 31 9 13 This covenant renewal was necessary to integrate the people into the covenant who had not been a part of the Sinai experience The event was significant enough to establish nearby Shechem as the tribal league shrine and it was the first political and religious ceremony that the Israelites undertook following their entry into the land As a covenant ratification it could be described as their ratification as a nation The altar on Mt Ebal and its concomitant ceremony were therefore according to the claims of the Hebrew Bible of supreme importance in the life of ancient Israel In 1980 during the survey of the territory of Manasseh Israeli archaeologist Adam Zertal discovered a site on Mt Ebal dating to the period of Iron I during which the Israelites began to sedentarize in the central hill country of Canaan The site was excavated over eight seasons from 1982 to 1989 under the auspices of the University of Haifa and the Israel Exploration Society In 1985 Zertal published an article in which he suggested that the structure on Ebal may have been the altar of Josh 8 30 35 In *The Iron Age I Structure on Mt Ebal* Ralph Hawkins reviews the excavation on Mt Ebal and its results including the scarabs seals and animal bones found there He examines the architecture of the site in relation to Mesopotamian watchtowers altars and the descriptions of altars in mishnaic materials Ezekiel and Deuteronomic passages This fascinating book examines the Mt Ebal site using a comparative method for both the physical data and the textual data The site and its artifacts are analyzed and then compared with alternative proposals and literary traditions The site is placed in its broader regional context in order to determine how it might relate to the larger settlement picture of Iron Age I The primary purpose is to examine the data with a view to determining the nature and function of the site and its possible relation to Josh 8 30 35 A compelling read for biblical and archaeological students and scholars who will better be able to envision sites of past events *Israel's History and the History of Israel* Mario Liverani, 2014-12-18 In *Israel's History and the History of Israel* one of the world's foremost experts on antiquity addresses the birth of Israel and its historic reality Many stories have been told of the founding of ancient Israel all rely on the biblical story in its narrative scheme despite its historic unreliability Drawing on the literary and archaeological record this book completely rewrites the history of Israel The study traces the textual material to the times of its creation reconstructs the evolution of political and religious ideologies and firmly inserts the history of Israel into its ancient oriental context **Ancient Israel's History and Historiography**

Nadav Na'aman, 2006-06-30 Throughout the past three decades Nadav Na'aman has repeatedly proved that he is one of the most careful historians of ancient Canaan and Israel. With broad expertise he has brought together archaeology, text, and the inscriptional material from all of the ancient Near East to bear on the history of ancient Israel and the land of Canaan during the second and first millennia B C E. Many of his studies have been published as journal articles or notes, and yet together they constitute one of the most important bodies of literature on the subject in recent years, particularly because of the careful attention to methodology that Na'aman always has brought to his work. This final volume in the 3-volume set of Na'aman's collected essays contains 29 essays. Among the topics addressed are the sources available to Israel's historians late in the first millennium B C E, the reality behind the narratives relating to the history of the United Monarchy, the effect of the author's own time on the composition of the histories of Saul, David, and Solomon, and the contributions of archaeology to the study of the tenth century B C E. In the course of covering these themes, Na'aman touches on topics such as history and historiography, textual and literary problems, historical geography, society, administration, cult, and religion.

Ancient Israel: What Do We Know and How Do We Know It? Lester L. Grabbe, 2017-02-23 In *Ancient Israel*, Lester L. Grabbe sets out to summarize what we know through a survey of sources and how we know it by a discussion of methodology and by evaluating the evidence. The most basic question about the history of ancient Israel, how do we know what we know, leads to the fundamental questions of Grabbe's work: what are the sources for the history of Israel, and how do we evaluate them? How do we make them speak to us through the fog of centuries? Grabbe focuses on original sources, including inscriptions, papyri, and archaeology. He examines the problems involved in historical methodology and deals with the major issues surrounding the use of the biblical text when writing a history of this period. *Ancient Israel* provides an enlightening overview and critique of current scholarly debate. It can therefore serve as a handbook or reference point for those wanting a catalogue of original sources, scholarship, and secondary studies. Grabbe's clarity of style makes this book eminently accessible, not only to students of biblical studies and ancient history, but also to the interested lay reader. For this new edition, the entire text has been reworked to take account of new archaeological discoveries and theories. There is a major expansion to include a comprehensive coverage of David and Solomon, and more detailed information on specific kings of Israel. Throughout, Grabbe has also added material on the historicity of the Exodus and provided a thorough update of the material on the later bronze age.

Defining the Sacred Nicola Laneri, 2015-05-08 Religion is a phenomenon that is inseparable from human society It brings about a set of emotional ideological and practical elements that are pervasive in the social fabric of any society and characterizable by a number of features These include the establishment of intermediaries in the relationship between humans and the divine the construction of ceremonial places for worshipping the gods and practicing ritual performances and the creation ritual paraphernalia Investigating the religious dimensions of ancient societies encounters problems in defining such elements especially with regard to societies that lack textual evidences and has tended to lead towards the identification of differentiation between the mental dimension related to religious beliefs and the material one associated with religious practices resulting in a separation between scholars able to investigate and possibly reconstruct ritual practices i.e. archaeologists and those interested in defining the realm of ancient beliefs i.e. philologists and religious historians The aim of this collection of papers is to attempt to bridge these two dimensions by breaking down existing boundaries in order to form a more comprehensive vision of religion among ancient Near Eastern societies This approach requires that a higher consideration be given to those elements either artificial buildings objects texts etc. or natural landscapes animals trees etc. that are created through a materialization of religious beliefs and practices enacted by members of communities These issues are addressed in a series of specific case studies covering a broad chronological framework that from the Pre-pottery Neolithic to the Iron Age Cover illustration German Archaeological Institute photo N Becker
