Anaximander and the Architects Robert Hahn, 2012-02-01 Anaximander and the Architects opens a previously unexplored avenue into Presocratic philosophy the technology of monumental architecture The evidence coming directly from sixth century B C E building sites and bypassing Aristotle shows how the architects and their projects supplied their Ionian communities with a sprouting vision of natural order governed by structural laws Their technological innovations and design techniques formed the core of an experimental science and promoted a rational not mythopoetical discourse central to our understanding of the context in which early Greek philosophy emerged Anaximander s prose book and his rationalizing mentality are illuminated in surprising ways by appeal to the ongoing extraordinary projects of the archaic architects and their practical techniques *The Development of the Polis in Archaic Greece* Lynette Mitchell, P.J. Rhodes, 2003-10-04 Beyond the historical development of the Greek polis the authors ask questions about the civic institutions of ancient Greece as a whole and their relationships to each other *The Oxford Handbook of Warfare in the Classical World* Brian Campbell, Lawrence A. The Professoriate Anthony Welch, 2005-08-31 What does it mean to be an academic in the twenty first century Clearly there is no one answer to this question as the diversity evident in the following chapters reveals Elite research universities often tend to join with others of their kind so that a professor from an elite US institution may well undertake a Japanese sabbatical if at all at the University of Tokyo a UK semester at Oxford or Cambridge or an Australian semester at the University of Sydney or perhaps Melbourne At each they can expect to have at their disposal well stocked libraries replete with requisite books journals and databases many now available electronically as well as highly regarded specialist peers in their research areas with whom they can discuss their work in detail How can this academic lifeworld be compared with that of a member of the South East Asian professoriate for example or many in Latin America and Africa where inadequate wages often necessitate taking on a second job often at a lower quality private institution which however likely offers better remuneration and or perhaps conducting a small business on the side Welch 2003 Tipton Jarvis and Welch 2003 and where the lack of basic infrastructure as well as research training means that teaching and perhaps some administration is perhaps the limit of one's activities The story of differentiation however is not limited to differences between elite institutions in OECD countries and more modest institutions elsewhere
