## **From Times Past Medieval Wisdom And Music:**

**Medieval Wisdom and Music** Olivia Warburton, 2004 Insights from the past to shed light on the present Music and Performance in the Book of Hours Michael Alan Anderson, 2022-06-14 This study uncovers the musical foundations and performance suggestions of books of hours guides to prayer that were the most popular and widespread books of the late Middle Ages Exploring a variety of musical genres and sections of books of hours with musical implications this book presents a richly textured sound world gleaned from dozens of extant manuscript sources from fifteenth century France It offers the first overview of the musical content of these handbooks to liturgy and devotional prayer together with cues that show scribal awareness for the articulation of sacred plainchants Although books of hours lack musical notation this survey elucidates the full range of musical genres and styles suggested both within and beyond the liturgical offices prescribed in books of hours Privileging sound and ritual enactment in the experience of the hours the survey complements studies of visual imagery that have dominated the category The book's interdisciplinary approach within a musical context and beautiful full color illustrations will attract not only specialists in musicology liturgy and late medieval studies but also those more broadly interested in the history of the book memory performance studies and art history *Medievalisms* Tison Pugh, Angela Weisl, 2012-11-12 From King Arthur and Robin Hood through to video games and jousting themed restaurants medieval culture continues to surround us and has retained a strong influence on literature and culture throughout the ages This fascinating and illuminating guide is written by two of the leading contemporary scholars of medieval literature and explores The influence of medieval cultural concepts on literature and film including key authors such as Shakespeare Tennyson and Mark Twain The continued appeal of medieval cultural figures such as Dante King Arthur and Robin Hood The influence of the medieval on such varied disciplines such as politics music children's literature and art Contemporary efforts to relive the Middle Ages *Medievalisms Making the Past in the Present* surveys the critical field and sets the boundaries for future study providing an essential background for literary study from the medieval period through to the twenty first century Theory and Method in Historical Ethnomusicology Jonathan McCollum, David G. Hebert, 2014-09-11 Historical ethnomusicology is increasingly acknowledged as a significant emerging subfield of ethnomusicology due to the fact that historical research requires a different set of theories and methods than studies of contemporary practices and many historiographic techniques are rapidly transforming as a result of new technologies In 2005 Bruno Nettl observed that the term historical ethnomusicology has begun to appear in programs of conferences and in publications Nettl 2005 274 and as recently as 2012 scholars similarly noted an increasing concern with the writing of musical histories in ethnomusicology Ruskin and Rice 2012 318 Relevant positions recently advanced by other authors include that historical musicologists are all ethnomusicologists now and that all ethnomusicology is historical Stobart 2008 yet we sense that such arguments while useful and theoretically correct may ultimately distract from careful consideration of the kinds of contemporary theories and

rigorous methods uniquely suited to historical inquiry in the field of music In *Theory and Method in Historical Ethnomusicology* editors Jonathan McCollum and David Hebert along with contributors Judah Cohen Chris Goertzen Keith Howard Ann Lucas Daniel Neuman and Diane Thram systematically demonstrate various ways that new approaches to historiography and the related application of new technologies impact the work of ethnomusicologists who seek to meaningfully represent music traditions across barriers of both time and space Contributors specializing in historical musics of Armenia Iran India Japan southern Africa American Jews and southern fiddling traditions of the United States describe the opening of new theoretical approaches and methodologies for research on global music history In the Foreword Keith Howard offers his perspective on historical ethnomusicology and the importance of reconsidering theories and methods applicable to this field for the enhancement of musical understandings in the present and future

*Music as Concept and Practice in the Late Middle Ages* Reinhard Strohm, Bonnie J. Blackburn, 2001 *Music as Concept and Practice in the Late Middle Ages* is an entirely new addition to the New Oxford History of Music series rather than a revision of the volume's predecessor published in 1960 It takes account not only of the developments in late medieval music scholarship during the latter decades of the twentieth century but also of the experience gained through significant changes in the performance practice of the late medieval repertory witnessed during this period All the chapters include areas of discussion whose coverage in the series hitherto has been either wholly lacking or at best marginal Muslim and Jewish musical traditions of the Middle Ages late medieval office chant medieval dance music musical instruments in society music in Central and Eastern Europe music theory of the fourteenth and fifteenth centuries music and early Renaissance humanism The first chapter and the last three present the conceptualization of music in speculative theory philosophy compositional and didactic practice and musical historiography Four chapters and part of the first illustrate important musical repertories and genres as they were developed within diverse societies The eight authors all of them with a long standing interest in their respective subjects have created through their collaboration a blend of mature scholarship and original investigation The volume's novelty of approach and content is complemented by a firm anchorage in the specialist literature and documentary source material Today no single view of the Middle Ages can be acceptable to the musician or to the historian The present volume which addresses itself to both provides solid information on formerly marginal themes and advocates further exploration of the other Middle Ages

**The Musical Times & Singing-class Circular**, 1910 **The British National Bibliography** Arthur James Wells, 2007 *Why the Middle Ages Matter* Celia Chazelle, Simon Doubleday, Felice Lifshitz, Amy G. Remensnyder, 2012-02-20 The word medieval is often used in a negative way when talking about contemporary issues *Why the Middle Ages Matter* refreshes our thinking about this historical era and our own by looking at some pressing concerns from today's world asking how these issues were really handled in the medieval period and showing why the past matters now The contributors here cover topics such as torture animal rights marriage sexuality imprisonment refugees poverty and

end of life care They shed light on relations between Christians and Muslims and on political leadership This collection challenges many negative stereotypes of medieval people revealing a world from which for instance much could be learned about looking after the spiritual needs of the dying and about integrating prisoners into the wider community with the emphasis on reconciliation between victim and criminal It represents a new level of engagement with issues of social justice by medievalists and provides a highly engaging way into studying the middle ages for students

**Sacred Treasure** Joseph Peter Swain, 2012 In the discussions and debates surrounding liturgical music of the past fifty years music theorists critics and historians have contributed little and their counsel has rarely been sought Whenever the matter of liturgical music arises most often in parishes but sometimes in episcopal conferences or in the academy or in Vatican documents the nature of the music as music almost never affects the discussion With Sacred Treasure Joseph Swain a distinguished musicologist and accomplished performer attempts to change that He offers a theory for building authentic traditions of liturgical music for Roman Catholic parishes This book is an exercise in pragmatic music criticism By providing a rational basis for evaluating the essential issues Swain seeks to show how a spiritually wholesome stability might supplant the confusion Sacred Treasure shows how the hard facts of music must be taken into account in any holistic conception and any lasting form of liturgical music

### **Magic and Magicians in the**

**Middle Ages and the Early Modern Time** Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

### **Leon Battista Alberti and**

**Nicholas Cusanus** Charles H. Carman, 2016-04-22 Providing a fresh evaluation of Alberti's text On Painting 1435 along with comparisons to various works of Nicholas Cusanus particularly his Vision of God 1450 this study reveals a shared epistemology of vision And the author argues it is one that reflects a more deeply Christian Neoplatonic ideal than is typically

accorded Alberti Whether regarding his purpose in teaching the use of a geometric single point perspective system or more broadly in rendering forms naturalistically the emphasis leans toward the ideal of Renaissance art as highly rational There remains the impression that the principle aim of the painter is to create objective even illusionistic images A close reading of Alberti's text however including some adjustments in translation points rather towards an emphasis on discerning the spiritual in the material Alberti's use of the tropes Minerva and Narcissus for example indicates the opposing characteristics of wisdom and sense certainty that function dialectically to foster the traditional importance of seeing with the eye of the intellect rather than merely with physical eyes In this sense these figures also set the context for his and as the author explains Brunelleschi's earlier invention of this perspective system that posits not so much an objective seeing as an opposition of finite and infinite seeing which moreover approximates Cusanus's famous notion of a coincidence of opposites Together with Alberti's and Cusanus's ideals of vision extensive analysis of art works discloses a ubiquitous commitment to stimulating an intellectual perception of divine essential and unseen realities that enliven the visible material world
